GENERAL DIRECTIONS FOR REGISTRATION

To Every Student:

You should at once look over the HEADINGS, at least, of ALL the paragraphs, numbered 1-22, which follow. It is certain that one or two of them, and probable that several others, are OF VITAL IMPORTANCE to YOU individually at this time.

Special Note to Freshmen: *All freshmen should consult the program for Freshman Week printed separately.*

1. New Students WITHOUT Permits to Register

A new student *who has not yet secured a permit to register* should proceed at once to the Registrar's Office, 100-A Administration Building, taking with him his credit statements from all former schools attended (high school, academy, normal school, junior college, or college), and make application for a permit.

The foregoing direction applies to all new students without permits except:

(1) LIBRARY SCHOOL STUDENTS—see page 69.

(2) APPLICANTS FOR ADMISSION AS "UNCLASSIFIED STUDENTS"—see paragraph 10.

(3) STUDENTS DROPPED FROM OTHER INSTITUTIONS—see paragraph 8.

2. New Students WITH Permits to Register

A new student *who has already received a permit to register* need not go to the Registrar's Office, but will receive his study-list, together with further detailed instructions, at one of the following points, according to the college or school which his permit entitles him to enter:

College of Liberal Arts and Sciences—at the head of the main staircase, University Hall

College of Commerce and Business Administration—Commerce Building

College of Education, including the Curricula in Athletic Coaching and Industrial Education—Room 104 Administration Building

College of Engineering—Engineering Hall

College of Agriculture, including the Curriculum in Home Economics—New Agricultural Building

School of Music—Room 100 Smith Memorial Hall

School of Journalism—Room 101 University Hall

College of Law—Room 301 Law Building

Library School—Room 331 Library Building

Graduate School—Room 109 Administration Building

Students in the Colleges of Liberal Arts and Sciences, Commerce and Business Administration, Education, Engineering, and Agriculture should see the posters on University bulletin boards regarding "Order of Registration."

3. Former Students in Attendance Last Semester

A former student *in attendance the second semester of the year 1929-30,* and in all respects in good standing (see paragraph 5), should call for his study-list at one of the points mentioned in paragraph 2, according to the college or school in which he is enrolled.

Students in the Colleges of Liberal Arts and Sciences, Commerce, Education, Engineering, and Agriculture should see the posters on the University bulletin boards regarding "Order of Registration."

4. Former Students Not in Attendance Last Semester

A former student *not in attendance the second semester of the year 1929-30,* but in all respects in good standing (see paragraph 5), must first secure a permit to re-enter, if a man, from the Dean of Men, if a woman, from the Dean of Women, and must then obtain a study-list at the Registrar's Office.

A former student who has withdrawn from the University within the last three weeks of his last term of attendance may register again only with the approval of the Council of Administration.

5. Former Students Not in Good Standing

A former student, whether or not in attendance the last semester, *if not in good standing,* either—

(a) Because he has been registered for two years as an *unclassified student* without matriculating; or—

(b) Because he has been *dropped for poor scholarship* or *dismissed on disciplinary grounds*—

may not register except on the recommendation of the dean of his college and with the approval of the Council of Administration, evidenced by a permit from the Secretary of the Council. Such a student should go first to see the dean or the assistant dean of his college.

6. Students Changing Colleges or Curricula within the University

A student who desires to transfer from one college or school of the University of Illinois to another college or school of the University must (1) secure from the dean or director of the college or school in which he was formerly enrolled a statement of his record therein; (2) secure from the Registrar's Office a statement of his entrance credits; and (3) submit these papers to the dean of the college or the director of the school which he wishes to enter; except that students transferring to the College of Law, the College of Education, or the School of Journalism from one of the undergraduate colleges of the University, need only a permit from the Registrar's Office.

A student who wishes to transfer from the curriculum in which he was last registered to another curriculum *in the same college* must consult the dean or the assistant dean of his college. He must also register the change with the Registrar in order to determine whether or not he is able to meet the requirements for admission.

7. Students with Advanced Standing

A student transferring from another university, a college, a normal school, or a junior college must submit his credits from that institution, or his "Estimate of Advanced Standing," if he has already obtained an "Estimate" from the Registrar, to his adviser when consulting the latter about his curriculum. Then, whether he has already had an "Estimate" made or not, he should call between October 1 and October 15 at the Registrar's Office to file a formal petition for transfer of credits. For the rules governing such transfers see the *Regulations for the Guidance of Undergraduate Students,* Appendix III.

8. Students Dropped from Other Institutions

A student who has been dropped from another institution may be admitted to the University of Illinois only on the recommendation of the dean of the college or school of the University which he desires to enter, approved by the Council of Administration. Such a student must first see the dean or the assistant dean of the college of his choice. If admitted, it will be with the understanding that he shall be on probation and in addition shall be required to pass with a grade of C or better at least three-fourths of the work for which he is registered for the first session after admission, as a condition of further registration.

9. Students Earning Their Way

Students who are earning their way, in whole or in part, during the school year should state that fact to their advisers when registering. Such students should carry light work.

10. Unclassified Students

Persons over twenty-one years of age may be admitted as unclassified students, provided they secure (1) the recommendation of the instructors whose courses they wish to take, and (2) the approval of the dean of the college in which the course is given. They must give evidence that they possess the requisite information and ability to pursue profitably, as unclassified students, their chosen subjects, and must meet the special requirements of the particular college in which they wish to enroll.

An unclassified student is not matriculated and must pay a tuition fee of $7.50 a semester in addition to the regular incidental fee of $25 a semester for Illinois students, or $37.50 for non-Illinois students.

No one may enroll as an unclassified student for more than two years, except by special permission, application for which must be made through the dean of the college.

An unclassified student in any college desiring to take a course in another college of the University must obtain the approval of the dean of the latter college.

A person desiring admission as an unclassified student must first see the dean or the assistant dean of the college he wishes to enter (see the directory on pages 4 and 5).

11. Number of Hours[1] Prescribed

Every student must pursue studies aggregating *not fewer than fifteen nor more than eighteen hours,* except in curricula requiring more than such number of hours in any semester; and except further that a student who has received grades of A in not less than one-half of his work for the preceding semester with no grades lower than B may take for the semester studies aggregating not more than twenty hours. A student may be permitted to take more or less than the amount of work prescribed above only by permission of the dean of his college or the director of his school.

A student who cannot devote his entire time to his studies because of illness, or outside work necessary to meet expenses, or for some other good reason, may be required by the dean of his college or the director of his school to take fewer than fifteen hours.

12. Required Subjects Take Precedence

Any required subject in which there is a failure must on the first recurrence of such subject take precedence over all other subjects.

13. Credit Forfeited by Reregistering

By reregistering in a subject for which he has received credit, a student forfeits his credit. When a course is thus repeated the grade given at the end of the repetition becomes the official grade.

14. Candidacy for Graduation

A candidate for graduation must have completed by the beginning of his final semester (or summer session) all studies required for the degree, *except those to be taken in class during that semester (or summer session).*

It is provided, however:

(1) That special examinations to remove failures incurred *during the preceding semester* may be taken at any time before the beginning of the tenth week of a student's final semester; or, if the final period of attendance is a summer session, at any time before the beginning of the fifth week.

(2) That, similarly, substitutions for courses required for the degree may be made as indicated for special examinations in (1) above.

---

[1]Credit is reckoned in "semester hours" or simply "hours." An hour is one class period a week for one semester, each class period presupposing two hours' preparation by the student, or the equivalent in laboratory, shop, or drawing room.

15. Courses with Variable Credit

In registering for a course with variable credit hours (e.g., Animal Husbandry 24, 2-5 hours), a student must put down on his study-list the number of hours for which *he* intends to take the course; e.g., not 2-5, but 2, or 3, or 4, or 5.

16. Military Training and Physical Education for Men

(a) The Requirement in Military

All male students, except those specifically exempted below, must register in Military, and, unless properly excused, must take the full basic course therein, whether they intend to graduate or not. To have any credits received for basic military work count for graduation, the full course (basic) must be taken. The classes of students exempted below may take military work, if they so desire, by registering for it, except that no student who is not a citizen of the United States and no student who holds a Reserve Corps Commission will be permitted to register.

Exemptions:

a. Students over 22 years of age when entering the University.
b. Students entering the University with junior standing.
c. Students who are not citizens of the United States.
d. Students who have had two years of military work in other Senior Units of the R.O.T.C.
e. Students holding Commissions in the Reserve Corps, United States Army.
f. Students holding certificates of eligibility for commission in the Reserve Corps.

A deposit of fifteen dollars ($15) with the Bursar is required before equipment is issued.

For full directions for registration in Military, see under Military in the Description of Courses and Time Table in the colored section of this book.

(b) The Requirement in Physical Education (Men)

All freshman and *sophomore men* take physical education throughout the year. Freshmen must also register for *Hygiene 1.*

Freshmen who do not pass the health examination will be required to register for *Physical Education 11* (*12* the second semester), five times each week, which gives 1½ hours of credit. Sophomore men with pronounced physical deficiencies should register for *Physical Education 21* (*22* the second semester), which also gives 1½ hours of credit. While enrolled in these courses they will be excused from Military, but when transferred to the regular work in physical education they will be required to make up the work in military science in so far as that may be practicable.

17. Physical Education for Women

Freshman women have Gymnasium Practice three hours a week throughout the year, and lectures on Hygiene throughout both semesters. Directions for registration will be found under the department announcements in the colored section of this bulletin.

18. Late Registration

A late registration fee of five dollars is charged all former students registering later than the registration days.

A student is not registered until his fees are paid. *A student who pays his fees on the first day of instruction or thereafter instead of on the registration days will, therefore, be charged the late registration fee.*

19. Week Old Study-List Invalid

A study-list becomes invalid if not filed at the Bursar's Office within one week after the date of its issue.

20. Changes in Study-Lists

Permission to change study-lists after registration may be obtained only from the dean of the college or the director of the school in which the student is enrolled. No changes can be made on the registration days.

Changes in study-lists should be completed and filed at the Bursar's Office not later than 12 m. on the Monday following registration. After this date a fee of $1 is charged for each change except that the total charge for the rearrangement authorized on any one change slip shall not exceed $2. The Registrar is authorized to waive the fee for change of a study-list in cases where the change is required by a University officer.

21. Fees Payable in Advance

All fees are payable in advance at registration.

A student who is in debt to the University at the end of any semester is not permitted to register in the University again, and is not entitled to receive an official statement of his credits from the Registrar, until his indebtedness has been discharged.

22. Hospital Fund

Every student should, on the registration days, join the Students' Mutual Benefit Hospital Fund. A payment of three dollars insures care in a hospital, without hospital fees, for any period of illness not exceeding four weeks during the semester. Apply at the office of the Dean of Men or of the Dean of Women.

THE COLLEGE OF LIBERAL ARTS AND SCIENCES

I. DIRECTIONS FOR REGISTRATION

1. Study-Lists

(1) Read the General Directions for Registration, pages 6-10.

(2) Obtain your study-list as prescribed in the General Directions.

(3) Read the directions printed on the back of the first coupon of the study-list.

2. Advisers

You will receive with your study-list a room ticket, indicating the number of the room where you will find your class adviser. Do not write anything on your study-list until you have consulted with the adviser. New students must bring with them a permit to register and show it to the adviser. *Be sure to obtain his signature before proceeding further.*

Juniors and seniors in the General Curriculum before consulting the class adviser must obtain from a representative of the department in which they will do their major work a statement of the courses in the major and minor subjects recommended for the coming semester. They should, also, bring with them the summary of their record mailed from the college office during the summer.

Transfer students from other institutions and other colleges of the University must bring with them a transcript of their record or the Registrar's "Estimate of Advanced Standing." They are given credit for all courses which are coordinate with the requirements of the curriculum in which they register.

3. Curricula

The College of Liberal Arts and Sciences offers the following curricula:

(1) The General Curriculum leading to the degree of Bachelor of Arts or Bachelor of Science (see below).

Note: Under this curriculum students may take their major work in home economics, leading to the degree of Bachelor of Arts or Bachelor of Science (see page 16).

(2) The degree of Bachelor of Science in Chemistry or Chemical Engineering (see page 16).

(3) The degree of Bachelor of Science in Applied Optics (see page 18).

(4) Students preparing for law will register in the general curriculum for at least three years.

(5) A two-year curriculum preparatory to medicine, which satisfies the minimum requirements for admission to the College of Medicine of the University. After two years of residence and the fulfilment of specified requirements, that college will grant the degree of Bachelor of Science in Medicine (see page 19).

(6) A two-year curriculum preparatory to journalism which fulfils the requirements for admission to the School of Journalism (see page 19).

II. DIRECTIONS FOR STUDENTS IN THE GENERAL CURRICULUM

1. Freshmen

Freshmen will register under the new requirements, taking all subjects prescribed in Group A, and selecting one subject from each division in Group B.

2. Sophomores

Required subjects each semester: Physical education, military science (for men).

Note: Sophomores may elect to graduate under the new requirements.

3. Juniors

Juniors are expected to devote approximately half of their time to work on major and minor subjects.

4. Seniors

Seniors must complete in the first semester all requirements for graduation except those to be taken in class during the second semester.

Note: Most courses in the College of Liberal Arts and Sciences open to freshmen suffer reduced credit when elected by seniors—see Time Table.

Requirements for the A.B. Degree

(*Effective for students entering after September 1, 1929*)

University Requirements.—Each candidate must meet the general university requirements with respect to registration and residence, and must also secure credit in approved courses amounting to 130 hours, an hour being one class period a week for one semester. Each class period presupposes two hours of preparation by the student, or the equivalent in the laboratory or drawing room.

A. *Prescribed Subjects*

To be commenced in the first semester of the freshman year, except as otherwise provided, and to be continued until the completion of the requirements.

1. Hygiene—1 hour
2. Physical Education—4 semesters
3. Military Science (for men)—4 semesters or the equivalent
4. Rhetoric—2 semesters. This requirement may be satisfied by either of the following methods:
   (I) Passing Rhetoric 1 and 2.
   (II) Passing a proficiency examination[1] equivalent to that of an examination in Rhetoric 2.
5. Foreign Language—A reading knowledge of a foreign language (French, German, Greek, Latin, Spanish, or Italian) equivalent to that obtainable after four semesters of a foreign language when commenced in college. This requirement may be satisfied by either of the following methods:
   (I) Passing French 2b, or a more advanced course;
   German 5 or 6, or a more advanced course;
   Greek 4, or a more advanced course;
   Latin 1a, or a more advanced course;
   Spanish 2b, or a more advanced course;
   Italian 2b, or a more advanced course.
   (II) Passing a proficiency examination[1] equivalent to the final examination in any of the courses mentioned in 5 (I).

B. *To be taken prior to the senior year.*

1. *Liberal Arts*—English literature, foreign literature (based on the first two years of college work in the language chosen, or its equivalent), economics, history, political science, philosophy, and sociology: a total of 15 hours chosen from at least three departments, including one course in English or foreign literature, or in the history of philosophy.
2. *Science*—Astronomy, bacteriology, botany, chemistry, geography, geology, entomology, mathematics, physiology, physics, psychology, and zoology: a total of 15 hours chosen from at least three departments, including one course with a minimum of four hours' laboratory work per week.

---

[1]*Note on Proficiency Examinations.* Proficiency examinations in rhetoric and foreign languages will be offered before the end of the second week in each semester. Students expecting to take these examinations will register for the courses in these subjects indicated by their previous preparation, and apply to the departments concerned for examination. If such examinations are passed, students will apply to the Office of the Dean to be transferred to other courses, as they are permitted to do by present regulations. No University credit hours will be earned by passing such proficiency examinations, but the successful applicants will be excused from taking the parallel courses, thereby increasing the number of free electives which they may offer for graduation.

In any curriculum in which fewer than 15 hours of laboratory science are required a student who enters without at least one unit of laboratory science shall be required to substitute 5 hours of laboratory science for 5 hours of free electives in the requirements for graduation.

C. *To be taken after the freshman year.*

1. In the major subject as defined by departments with the approval of the faculty, 20 hours. See page 14.
2. In the minor subjects, 20 hours in one or two departments designated by the department in which the major subject is pursued, and approved by the faculty, with not less than 8 hours in each department, if two subjects are chosen.
3. Thirty hours of the work taken in the junior and senior years must be in courses not open ordinarily to freshmen or sophomores.

D. *Electives.*

1. All courses offered by the departments of this college except those exclusively for students in other colleges.
2. The total credit in Art and Design is limited to 20 hours.
3. Not more than 36 hours' credit toward graduation will be given for courses offered in other colleges and schools of this University, aside from the first year's work in the College of Medicine, and courses acceptable for major and minor credits. Such courses must be selected from a list approved by the Faculty. See page 14.

E. The degree of Bachelor of Science will be granted in lieu of the degree of Bachelor of Arts to students whose major is in mathematics, a science, or home economics, upon petition to the Dean not later than six weeks preceding the granting of the degree.

Requirements for the A.B. Degree

(*For students who entered before September 1, 1929*)

A. *Prescribed Subjects.*—Rhetoric 1-2; Physical Education through the first and second year, and Hygiene 1 and 3 for men; Physical Education 7a-7b, 8a-8b, and Hygiene 2 for women; Military Science (4 hours) for men.

B. *Group Requirements.*—Students are expected to complete the group requirements within the first 60 hours of work. Every candidate must offer the minimum of work specified in each of the following groups:

I. *English.*—The offering in this group must include at least one semester course in literature.

II. *Foreign Language and Literature* (exclusive of courses in English translation).

If a student has offered but two units of a foreign language for entrance to the University, he must pursue the study of foreign language through two one-year courses or the equivalent. If he has offered for entrance three or more units of foreign language, he must continue the study of foreign language through one year of his college course.

Note: Candidates for the degree who have not offered Greek or Latin or French or German for entrance *must offer one of these languages for graduation.*

III. *History, Political and Social Science.*—History, economics, political science, sociology: 8 hours.

IV. *Mathematics and Physical Science.*—Mathematics, astronomy (courses with college mathematics as prerequisites), physics, chemistry: at least 5 hours.

Note: Every candidate for the degree of A.B. shall offer a minimum total of 15 semester hours in Groups IV and V combined with a minimum of 5 semester hours in each. Not less than four laboratory hours a week for one semester, or the equivalent, shall be offered in *some one department.*

In any curriculum in which fewer than 15 hours of laboratory science are required a student who enters without at least one unit of laboratory science shall be required to substitute 5 hours of laboratory science for 5 hours of free electives in the requirements for graduation.

V. Botany, bacteriology, entomology, geology, geography, physiology, zoology: at least 5 hours. See note under IV.

VI. Education, philosophy, psychology: 6 hours, of which 3 shall be in philosophy or psychology.

C. *Major Subjects.*—Each candidate must select some one subject as his major. A major consists of courses amounting to at least 20 hours chosen from among those designated by a department and approved by the faculty of the college. Such courses are to be exclusive of those elementary or beginning courses which are open to freshmen and inclusive of *some distinctly advanced work.* At least five hours of the work accepted for a major must have been *done in residence at this University* and be included within the maximum credits allowed in any one division.

The subjects at present recognized as majors in this college are: bacteriology, botany, chemistry, classics, economics, English, entomology, French, geography, geology, German, Greek, history, home economics, Latin, mathematics, philosophy, physics, physiology, political science, psychology, public speaking, sociology, Spanish, zoology.

D. *Minor Subjects.*—Each candidate must offer, in addition to his major, a minor of 20 hours in one or more allied subjects designated by the major department and approved by the faculty of the college. *At least 8 hours must be offered in one subject.*

E. *Elective Subjects.*—

1. Not more than 40 hours in any one subject may be counted for graduation, except: (a) in special courses approved by the faculty of the college; (b) when a student is writing a thesis, he may count, in addition to the 40 hours, the hours of the course in which he does his thesis work; (c) in the department of English a student may take 40 hours in addition to Rhetoric 1-2, Public Speaking, and the linguistic courses in Scandinavian.

   Note: The total credit in Art and Design is limited to 20 hours.

2. In order to secure any credit in a beginning course in a foreign language, a full year's work must be completed.

Courses in Other Colleges Approved for A.B. Degree

3. A limited amount of credit toward the A.B. degree is ordinarily given for courses offered in other colleges and schools of this University, as follows:

College of Agriculture: (Not to exceed 14 hours)

Agronomy 11 (Soil Biology), 22 (Plant Breeding), 28 (Soils).

Animal Husbandry 7 and 31 (Animal Nutrition).

Dairy Husbandry 10 (Advanced Dairy Bacteriology), 20 (Economic Problems of Dairy Farming).

Farm Mechanics 12 (Farm Home Equipment—for students majoring in home economics only).

Horticulture 36 (History of Landscape Architecture), 37a (City Planning), 42 (Landscape Architecture).

The total credit allowed in agricultural courses may not exceed 14 hours, except that students taking their major work in entomology may take 20 hours in the above agricultural courses with the addition of Agronomy 7 and 25, Horticulture 1a, 1b, 2, 3, 6, and 7.

College of Commerce and Business Administration:

Accountancy 1a (Principles of Accounting), 1b (Accounting Procedure), 1e (Principles of Accounting), 13 (Governmental Accounting).

Business Organization 2 (Marketing Organization), 9 (Trade and Commercial Organizations), 10 (Newspaper Advertising), 11 (Survey Course in Business Organization).

Business Law 1a-1b (General Law—no credit given to students in the combined arts-law curriculum), 2 (Elementary Law of Business).

Economics, all courses.

Transportation 1 (Economics of Transportation), 2 (European Railroads).

College of Education:

All courses in the Department of Education (exclusive of courses in Educational Practice, Athletic Coaching, and courses 1-7 and the extramural courses in Industrial Education).

Students who plan to teach should see the announcement of the College of Education, page 54.

College of Engineering: (Not to exceed 24 hours)

Architecture 11, 12 (History of Architecture), 71, 72 (Architectural Drawing).

Civil Engineering 27, 28, 34 (Surveying), 94 (Highway Administration).

Drawing, General Engineering, 1 (Elements of Drafting), 2 (Descriptive Geometry).

Electrical Engineering 2 *or* 5.

Mechanical Engineering 10, 13 (Thermodynamics), 31 (Mechanics of Machinery).

Mechanics, Theoretical and Applied, all courses.

Mining Engineering 9 (Ore and Coal Preparation), 21 (Mining Examination and Valuation), and 61 (Elementary Mine Surveying), but no credit will be given for this course in addition to C. E. 27.

College of Law: (Not to exceed 30 hours)

Courses in law may not be taken before the senior year by students enrolled in this college. A student who has earned in the College of Liberal Arts and Sciences at least 30 hours, may take and count toward the A.B. degree not to exceed 30 hours of work in the College of Law, provided that not less than two courses, amounting to at least five hours, are taken per semester, under the advice of the Dean of the College of Law as to the courses to be taken.

Students registered in the College of Law, who are also candidates for a degree in the College of Liberal Arts and Sciences, must at the beginning of each semester register in the latter college also, by presenting a duplicate study-list for the approval of the Assistant Dean of the College of Liberal Arts and Sciences.

Law 14 (Carriers) and 24 (Municipal Corporations) are open to students of this college offering political science or economics as a major subject, who have had a previous course in law or political science involving the study of cases.

Library School: (Not to exceed 15 hours)

Library Science 2a-2b or 12 (Reference), 7 (History of Libraries), 9 (History of Books and Printing), 13a-42 (Public Documents).

Students who plan to take a library curriculum after graduation from this college should consult the Recommended Preliminary Curriculum outlined by the Library School, page 69.

School of Music: (Not to exceed 16 hours)

Music 1, 2, 32, 33 (History of Music), 3, 4, 5, 6 (Harmony), 7, 8 (Counterpoint), 9, 10 (Analysis and Form), 11, 12 (Advanced Composition), 13, 14 (Music Appreciation), 15, 16 (Instrumentation).

Credit to an extent of four hours is allowed for applied music (piano, voice, etc.) *after Music 3 and 4* (Harmony) have been taken and on the recommendation of the Director. For every additional hour of applied music, the student must elect a similar number of hours of theoretical music from the courses mentioned above. No credit will be allowed for courses in Public School Music.

Students who wish to enter courses in music other than courses 1-16 and 32, 33, must consult the Director of the School of Music, 100 Smith Memorial Hall, and secure from him a slip designating the course and the fee. This slip must be presented to the class adviser, who will then add the course to the student's study-list, provided the total number of hours, including music, does not exceed eighteen.

School of Journalism:

Journalism 3 (The Newspaper and the News), 5-6 (Reporting), 9a-9b (Printing and Publishing), 17 (History and Principles of Journalism).

Physical Education and Hygiene:

Not to exceed 5 semester hours for men and 8 semester hours for women. No credit is allowed for courses in Educational Practice.

Military Science and Tactics:

Military Science not to exceed 10 semester hours.

College of Medicine:

Students who have spent three years in residence, earning not less than 94 semester hours in the College of Liberal Arts and Sciences, are permitted, at the end of their first year in a Class A college of medicine, to transfer credits in the medical sciences to complete the requirements for graduation from this college and to receive the degree of Bachelor of Arts.

F. *Bachelor's Theses:* A bachelor's thesis is not generally required in this college. Students of high standing are, however, encouraged to write theses in connection with their major studies. Credit toward the degree is given for thesis work only as a part of the work in a Thesis or Honors course.

G. *Optional Degree of Bachelor of Science:* Students who do their major work in one of the subjects in Group IV or Group V, or in home economics, and who have credit for 60 semester hours or more in these groups or in home economics, on petition to and on the recommendation of the faculty of this college, may be graduated with the degree of B.S. instead of A.B. Such a petition must be presented not later than 10 days after the opening of the last semester or summer session preceding the granting of the degree.

III. DIRECTIONS FOR STUDENTS WHOSE MAJOR IS IN HOME ECONOMICS

Students planning to do their major work in home economics should note that certain prerequisite courses must be taken during the first two years. They will be assigned to advisers in the Home Economics Department in the rooms indicated on their room tickets.

Students who hold scholarships in home economics must make this subject their major and take each semester at least four hours in home economics or in subjects required for admission to courses in home economics.

IV. DIRECTIONS FOR STUDENTS IN CHEMISTRY AND CHEMICAL ENGINEERING

Students who follow the general curriculum in the College of Liberal Arts and Sciences with Chemistry as a major subject are eligible for the degree of Bachelor of Arts. They should follow the directions given on page 12 or 13.

For the more specialized training of the chemist, the following curricula have been arranged. Each requires a maximum total of 136 hours and leads to the degree of Bachelor of Science.

The schedules for the first and second years in chemistry and chemical engineering are the same.

Preliminary preparation in German or French equivalent to 2 years of high-school work is advised. The total language requirement for graduation including courses offered for entrance must be equivalent to 2 years of University work in German or French. When a student does not offer German or French for entrance the second year of the language required for graduation will be accepted in partial fulfilment of the non-chemical electives in either curriculum. Students entering under this arrangement should take the second year of language during the sophomore year and will not be admitted to senior standing until the requirement has been satisfied.

Students registering in either curriculum must offer 1 unit of high-school chemistry and ½ unit of advanced algebra for admission. University credit in Chemistry 1 (five hours) is acceptable in lieu of Chemistry 2 and one unit of entrance chemistry, Mathematics 3 (five hours) in lieu of one-half unit of advanced algebra and Mathematics 2.

Curriculum in Chemical Engineering, Third and Fourth Years

The work of the technical chemist or superintendent is frequently so closely associated with mechanical and other engineering lines as to make a knowledge of these subjects essential. To meet these conditions, the following third and fourth years of the curriculum in chemistry and related engineering subjects have been arranged. The degree given is that of Bachelor of Science in chemical engineering.

It is suggested that students take the elective courses outside of chemistry. Under no conditions may a student elect more than two hours of chemistry.

V. DIRECTIONS FOR STUDENTS IN APPLIED OPTICS

Students who wish to prepare themselves to pass the examination prescribed by the Illinois Optometry Act of April 19, 1919, which regulates the practice of optometry within the state, must meet the requirements for the degree of Bachelor of Arts or Bachelor of Science, taking their major work in the Department of Physics. For students preparing for the design of optical instruments, sometimes called "optical engineering," a special curriculum leading to the degree of Bachelor of Science may be arranged.

VI. DIRECTIONS FOR STUDENTS PREPARING FOR LAW

The College of Law admits only graduates, and students of senior standing who are permitted to elect courses in Law. See page 62.

---

[1]Semester hours. For definition, see page 71.

[2]Ten hours of thesis credit are required for graduation in chemistry and five hours for graduation in chemical engineering, subject to a provision that in special cases a partial substitution of chemical electives may be granted on recommendation of the department. In no case may the total thesis credit in either curriculum be reduced below a minimum of five hours.

VII. DIRECTIONS FOR STUDENTS PREPARING FOR MEDICINE

The College of Liberal Arts and Sciences offers the following two-year curriculum which satisfies the requirements for entrance to the College of Medicine of the University. Two units of Latin, Greek, French, or German are required for entrance to this curriculum. Those lacking in this requirement will register in the General Curriculum and commence the study of one of these languages instead of zoology.

Students planning to spend three or more years, and all students of junior and senior standing, will register in the General Curriculum, taking care to satisfy all the requirements for entrance to the College of Medicine.

Students not residents of the state of Illinois will be advanced to registration in the College of Medicine at Chicago only if there are vacancies after all properly qualified Illinois students seeking admission have been registered.

Scholastic Requirements in College of Medicine

1. Grades of at least "C," or 75 per cent, or an equivalent grade from institutions using a different system of marking as determined by the University, in at least three-fourths of the work of the two years of pre-medical courses shall be required for admission to the freshman class of the College of Medicine (effective for students entering October 1, 1930).

2. Grades of at least "C," or 75 per cent, in at least three-fourths of the work of the first two years in the College of Medicine shall be required for the degree of Bachelor of Science in Medicine (effective for candidates for B.S. in June, 1931).

3. Grades of at least "C," or 75 per cent, in at least three-fourths of the work of the four years made up of the two pre-medical years and the first two years in the College of Medicine, shall be required of students before they may continue in the clinical, or third and fourth years of the College of Medicine (effective for students beginning third year in College of Medicine, October 1, 1931).

VIII. DIRECTIONS FOR STUDENTS PREPARING FOR JOURNALISM

The following two-year journalism curriculum covers entrance requirements of the School of Journalism of the University and includes specific courses of special value to students of journalism. It is recommended that, where possible, students choose additional electives from the departments of: economics, political science, history, literature, philosophy, psychology, and art.

See also the announcement of the School of Journalism, page 67.

[1]Semester hours. For definition, see page 71.

[2]Those who desire to take Physiological Chemistry before leaving the University should take Chemistry 24 during the first semester of the second year.

THE COLLEGE OF COMMERCE AND BUSINESS ADMINISTRATION

DIRECTIONS FOR REGISTRATION

1. Commerce students should read the headings of the paragraphs numbered 1-22 of the General Directions for Registration on pages 6-10 of this Announcement and follow those which apply to them.

2. *Freshmen* who have received a permit to register will obtain their study-lists at the table in the lobby on the first floor of the Commerce Building.

3. *Freshmen* who have not received a permit to register should report at the Registrar's Office, 100-A Administration Building.

4. *Former Commerce students* who were in attendance the second semester of 1929-30 and are in good standing will obtain their study-lists at the table in the lobby on the first floor of the Commerce Building.

5. Students not in attendance last semester, not in good standing, transferring from other colleges within the University, etc., should follow the general directions referred to in paragraph 1 above.

6. Having secured his study-list, the student should follow, *point by point,* the directions on the first coupon. Assignment of Commerce students to *registration advisers* will be made in the lobby of the Commerce Building.

7. Each student must secure the approval of his Registration Officer for the studies he has chosen. *This approval must be stamped on the study-list.* Each student must then report first to the Library to secure approval of sections in sectional courses, and afterwards to the Auditorium to make out class cards, and to pay fees.

REQUIREMENTS FOR GRADUATION

Students who graduate from the College of Commerce and Business Administration are awarded the degree of Bachelor of Science. The requirements for graduation are as follows:

1. *University Requirements.* A candidate must comply with the University requirements as to residence and registration, and secure credit amounting to 130 hours, including credit in the following subjects prescribed by general University regulations for all students: *Rhetoric 1-2,* 6 hours for both men and women; *Physical Education* and *Hygiene 1* and *3,* 3 hours for men; *Physical Education 7a-7b* and *8a-8b* and *Hygiene 2,* 5 hours for women; and *Military Science,* 4 semesters, 4 hours for men. Men who elect the Reserve Officers' Training Corps must also take *Military Science,* 4 additional semesters, 6 hours.

2. *Prescribed Subjects.* A candidate must also secure credit in the other subjects listed as *prescribed* in his chosen curriculum.

(*Note:* If a prescribed course is not offered or is unavailable for other reasons, arrangements must be made with the dean of the college for acceptable substitutes.)

3. *Language Group.* Of the electives allowed, in all curricula, at least 8 hours must be either in English literature or in a foreign language, but prescribed courses in either of these subjects may be counted in meeting this requirement. *To secure any credit in a beginning course in any foreign language, a full year's work must be completed.*

4. *Social Science Group.* Twelve hours of the electives allowed must be chosen from the following group of subjects: *history, political science, philosophy, psychology,* and *sociology,* provided that *not fewer than six hours in any one subject may be counted in fulfilling this requirement;* but prescribed courses in any of these subjects may be counted in meeting the requirement.

This requirement (4) applies to Curricula in:

General Business
Banking and Finance
Insurance
Accountancy
General Railway Administration
Commerce and Law
Trade and Civic Secretarial Service

This requirement (4) does *not* apply to Curricula in:

Railway Transportation
Commercial Teaching
Foreign Commerce
Industrial Administration
Public Utilities

5. *Science Group.* In all curricula *ten hours* of the electives allowed must be chosen from the following groups of subjects: *chemistry, mathematics* (except Math. 22 and 23), and *physics,* provided that *not fewer than 5 hours* in any *one subject may be counted in fulfilling this requirement;* but prescribed courses in any of these subjects may be counted.

6. *Free Electives Group.* Free electives sufficient to make the 130 hours required for graduation may be selected from any department in the College of Commerce, the College of Liberal Arts and Sciences, or the Library School. *All other electives must have the approval of the dean of the college at the time of registration.*

7. *Laboratory Science.* In any curriculum in which fewer than fifteen hours of laboratory science are required a student who enters without at least one unit of laboratory science shall be required to substitute five hours of a laboratory science for five hours of free electives in the requirements for graduation.

THE CURRICULA

The curricula in Commerce and Business Administration are: general business, trade and civic secretarial service, banking and finance, insurance, accountancy, general railway administration, railway transportation, commercial teaching, foreign commerce, industrial administration, public utilities, and commerce and law. The subjects prescribed for graduation in each curriculum are listed in the following outlines. These subjects are in general arranged in sequence and should be taken in the order given.

Prerequisites are indicated in parentheses.

In addition to the prescribed subjects sufficient electives must be taken each semester to make up a minimum of 15 hours, but not to exceed a maximum of 18 hours of work. In choosing electives the attention of students is called to provisions 3, 4, and 5 of the above statement of the requirements for graduation. It is required that a sufficient number of hours from the subjects enumerated in groups 3 and 5 above be taken during each semester of the first year to make up, together with the prescribed subjects, a schedule of not fewer than 15 hours. Attention is called to the fact that some elementary courses carry only part credit for seniors.

Curriculum in Industrial Administration

The following curriculum is intended to meet the needs of commerce students planning to enter the administrative or selling departments of industrial plants. To the usual courses in economics, accounting, etc., are added certain groups of technical courses offered by other colleges of the University. Four such groups have been arranged, as follows: Group A, for those interested in the machine industries; Group B, the electrical industries; Group C, the building trades; Group D, the chemical industries. The student who elects one of these groups must take all the courses listed in the chosen group. The student electing the chemical industries group is required to take *Economics 27* and *Economics 22* instead of *General Engineering Drawing 1* and *2* in the first year; and *Chemistry 1* or *2* instead of *Theoretical and Applied Mechanics 1* and *Rhetoric 10* in the second year; *Rhetoric 10* is deferred until the third year; he should see the assistant dean of the college to plan his program for each of the eight semesters.

One year of foreign language or English literature must be included among the electives.

Curriculum in Commerce and Law

(A six-year combined curriculum)

The following curriculum is provided for students who wish to combine commercial and legal studies and secure both the degree of Bachelor of Science and the degree of Bachelor of Laws or Doctor of Law in six years. Students who elect this curriculum must meet all the requirements for graduation from the College of Commerce and Business Administration, but in exercising their privileges of election are urged to select as many hours as possible from the following subjects: *Hist. 2a-2b,* English History (6); *Econ. 25,* Economic History of England (3); *Hist. 3a-3b,* United States History (6); *Hist. 44a-44b,* English Constitutional History (6); *Pol. Sci. 1,* American Government (3); and *Pol. Sci. 3,* State and Local Government (3). Students expecting to study law should devote at least 12 hours to work in history and political science. A course in English history is regarded as one of the most essential pre-legal subjects. The law courses in the curriculum may be taken only in the fourth year, and are counted for 30 hours' credit towards the degree, instead of hour for hour, provided the full year's work is completed. In their fourth year students will be regularly registered in the College of Law, and *must file copies of their study-lists in the office of the Dean of the College of Commerce and Business Administration at the beginning of each semester.*

THE COLLEGE OF ENGINEERING

Engineering students should read the General Directions for Registration given in paragraphs 1-22 on pages 6-10. They should report for registration to Engineering Hall, where further special directions will be furnished them.

GENERAL ENGINEERING LECTURES FOR FRESHMEN

A general lecture sufficiently popular in character to interest and inspire young students will be given at 10 a. m. on Wednesday of each week in the Auditorium. All freshman students in engineering are required to attend this lecture.

TRIPS OF INSPECTION

An inspection trip is one of the regular requirements in the senior year of the curricula leading to the degree of Bachelor of Science in architecture, architectural engineering, ceramics and ceramic engineering, civil engineering, electrical engineering, gas engineering, general engineering, mechanical engineering, mining engineering, and railway engineering.

The time required is three or four days, and the plants visited are usually in Chicago or Milwaukee. The trips are taken during term time under the supervision of the University authorities. The expense to each student varies from $25 to $35.

ELECTIVES AND OPTIONS

Non-technical electives.—The non-technical electives for students in the College of Engineering are subject to the following restrictions:

1. They are restricted to courses offered in the College of Liberal Arts and Sciences, the College of Commerce, courses 1 to 16 in the School of Music, Horticulture 37a and 37b, Architecture 11 and 12, and courses in Education, Group A, in the College of Education.
2. Such courses must not be open to freshman students except in the cases of Library Science 12, Mathematics 5, History 1a and 1b, 2a and 2b, Geography 1, Geology 1, Botany 1, and Zoology 1.
3. The courses must be approved by the head of the department in which the student making the election is registered.
4. Students in the College of Engineering electing the third and fourth years' work in the Reserve Officers' Training Corps may substitute the credit thus received for the required non-technical electives.

Technical electives.—Any course in the College of Engineering not prescribed in the curriculum in which the student is registered, excepting only Architecture 11 and 12, and G. E. D. 1 and 2, and including such courses in other colleges as may from time to time be designated as "technical" for certain departments of the College of Engineering.

Approved electives.—Any non-technical or technical electives.

Technical Options.—Courses of a technical character designated by a department as "technical options" in its curricula.

REQUIREMENTS IN RHETORIC

Rhetoric 1 and 2 are prerequisites for junior standing in the College of Engineering, and no student in this College shall be permitted to register in more than eight hours of prescribed junior work without having passed or being registered in Rhetoric 1 or 2.

Any student whose written work shows that he is unable to use good English shall be reported by his instructor to a standing committee which has authority to direct the student to take as a prerequisite for graduation such additional instruction in rhetoric as it may prescribe.

REQUIREMENTS IN FOREIGN LANGUAGE

In curricula where the language requirement is specifically designated, as French or German, any student who has completed in high school one or more years of French or German and has had the same accredited to him as entrance credits by the Registrar, may be excused from language requirements specified in his curriculum to the extent that one year's high-school work shall be considered the equivalent of a semester's work in college, and he may select in lieu thereof any course falling under the designation of non-technical electives in the College of Engineering or technical electives and options outside the required courses in his curriculum. No fractional unit of high-school work may be considered in the application of this regulation. The full equivalent of the eight-hour (twelve in General Engineering) requirement in a single language must be obtained by each student in the fulfillment of graduation requirements in any curriculum where language is specified or in any curriculum in which the student elects to take foreign language.

CURRICULA IN ENGINEERING

Since the curricula in Ceramic, Civil, Electrical, General, Mechanical, Mining, and Railway Engineering are identical during the first year, the schedule of courses is printed but once, under Civil Engineering.

CURRICULA IN ARCHITECTURE AND ARCHITECTURAL ENGINEERING

Students who entered the curriculum in Architecture or Architectural Engineering prior to June 1, 1930, or who may enter with sophomore standing or above in 1930-31, will finish the curricula as printed below. Freshman students will enroll in the new curricula with Optional arrangements.

Curriculum in Gas Engineering

This curriculum combines many of the items of the course in Chemical Engineering and a number of the more distinctly engineering subjects from Mechanical, Electrical, and Mining Engineering. It is intended to fit men for operating positions about gas or coke plants rather than for positions in the laboratory where the work is more distinctly of a chemical nature. The degree of Bachelor of Science is given on completion of the curriculum.

Curriculum in General Engineering

This curriculum is intended for students who do not wish to pursue the more specialized engineering curricula, but who wish to secure training in engineering principles and their application. Fifteen hours of work in Economics, Corporations, Business Law, etc., are required and sixteen hours of free electives are allowed. The degree of Bachelor of Science in General Engineering is awarded on completion of the curriculum.

THE COLLEGE OF AGRICULTURE

DIRECTIONS FOR REGISTRATION

Read the first paragraph of the General Directions for Registration on page 6 and follow carefully the instructions given therein.

Obtain your study-list: (1) if you already have a permit to register, at room 105 New Agricultural Building, Home Economics students at Home Economics Department, Woman's Building; (2) if you have not yet secured a permit to register, go to the Registrar's Office, 100-A Administration Building; (3) follow *point by point,* the directions on the first coupon on the study-list.

Students will secure their own study-lists and proceed to their advisers' rooms.

Advisers

Freshmen.....221 New Agricultural Building
Sophomores and Juniors.....Reading Room, Library, New Agricultural Building
Seniors.....214 New Agricultural Building
Unclassified.....Go to room according to class
Home Economics.....113 Woman's Building
Landscape Architecture.....203 New Agricultural Building
Floriculture.....Reading Room, Library, New Agricultural Building

Sectional Courses

Sectional courses will be checked in 200 New Agricultural Building. These include chemistry, rhetoric, English, botany, bacteriology, economics, entomology, geology, and physical education.

Registrar's Checking Clerks

Registrar's checking clerks, also clerks for assignment of fees, issue of class cards, and new study-lists, will be found in the lobby of the Library.

Studies for Freshmen

The schedules of courses for freshmen will be made out and distributed to advisers in 221 New Agricultural Building.

Transfer Students

Committee on excess hours and transfers will be in 104 New Agricultural Building.

REQUIREMENTS FOR GRADUATION

Students who have satisfied the University requirements as to registration, residence, and diploma fee, and who have maintained throughout their course a satisfactory record of scholarship and moral character, will, on completion of the studies of the prescribed list and sufficient electives to make a total of 130 semester hours, be graduated with the degree of Bachelor of Science.

A thesis is not required for graduation, but any student who has completed not fewer than 90 hours of credit may elect a thesis course in any department, provided that he has done at least 20 hours' work in courses pertinent to the thesis problem, subject to the approval of the head of the department.

Graduates of approved colleges may secure a degree in agriculture from the University on completion of the technical and scientific requirements. This

will ordinarily require two years of residence work; a minimum of one year is required.

Not more than five semester hours of physical education and hygiene are accepted toward graduation for men, nor more than seven for women.

Curriculum in Agriculture

Required for the Degree of Bachelor of Science in Agriculture

All students except those in the special curricula in home economics, floriculture, and landscape architecture are required to take the same work during the freshman year and part of the sophomore, junior, and senior years. This work gives the student a conception of farm practices and an insight into the technical branches of agriculture, such as animal and dairy husbandry, horticulture, farm crops, soils, farm mechanics, and buildings, and leaves a large part of the junior and senior years open for elective studies.

One hundred thirty semester hours are required for graduation, as follows:

Curriculum in Floriculture

Required for the Degree of Bachelor of Science in Floriculture

The object of the floriculture curriculum is to fit men and women for the profession of floriculture. The laboratory exercises in the technical subjects consist of practical work in the greenhouses and gardens and give the students a working knowledge of the best methods now in use.

Of the 130 semester hours required for graduation, 106-108 are provided for in the prescribed list. The other 22-24 hours of credit necessary for graduation are electives.

Students registered in floriculture will be required to make at least one inspection trip before graduation. The annual trip costs about $25.

Curriculum in Landscape Architecture

Required for the Degree of Bachelor of Science in Landscape Architecture

The curriculum provides for a four years' course which is intended as preparation for the professional practice of Landscape Architecture. Courses are open to any student in the University having the prerequisites or their equivalents

Of the 130 semester hours required for graduation, 117 hours are provided for in the prescribed list. The other 13 hours necessary for graduation may be taken from suggested electives.

Attention is called to a requirement that in any curriculum in which less than 15 hours of laboratory science are required, a student who enters without at least one unit of laboratory science shall be required to substitute 5 hours of a laboratory science for 5 hours of free electives in the requirements for graduation.

HOME ECONOMICS

Students who hold scholarships in home economics must take each semester at least four hours in home economics or in subjects required for admission to courses in home economics.

To satisfy the requirements for graduation, students transferring home economics credits from other institutions must take five hours in residence from the following: Home Economics 20, 28, 31, 33, 39a, 39b, 41, 43a, 43b, 47, 48, 50, 51, 55.

One hundred thirty credit hours are required for graduation.

Students may choose the general curriculum in home economics or the curriculum in nutrition and dietetics as suggested below.

THE COLLEGE OF EDUCATION

DIRECTIONS FOR REGISTRATION

Read the General Directions for Registration beginning on page 6 and follow carefully the instructions given therein.

Obtain your study-list: (1) if you already have a permit to register, in the College of Education, in Room 104 Administration; (2) if you have not yet secured a permit to register, in the College of Education, at the Registrar's Office, 100-A Administration. Students with junior standing in one of the undergraduate colleges who wish to transfer to the College of Education as candidates for the degree of Bachelor of Science in Education should follow the procedure outlined in paragraph 6 on page 7.

Advisers

For candidates for the degree of Bachelor of Science in Education—Dean, College of Education, 104 Administration.

For students in the Curriculum in Agricultural Education—Professor Nolan, 116 Agricultural Building.

For students in the Curriculum in Industrial Education—Professor Mays, 310 Administration.

For students in the Curriculum in Home Economics Education—Miss Robinson, 105 Woman's Building.

For students in the Curriculum in Physical Education—Director Huff, 210 Men's New Gymnasium.

For students in the Curriculum in Music Education—Director Stiven, 100 Smith Memorial Hall.

Sectional Courses

Students in the College of Education will have their sections approved in the Library, to which they should proceed after securing their adviser's signature on Coupon 2 of the study-list.

Class cards may be obtained at the loan desk in the Library.

Registrar's Checking Clerks

Having secured approval of their sections, students in education should go to the Lobby of the Auditorium, where they will find the Registrar's checking clerks and fee clerks representing the Business Office.

REQUIREMENTS FOR ADMISSION

In general, a student must complete two years (60 hours exclusive of military) of a curriculum in the College of Agriculture, Commerce and Business Administration, Engineering, or Liberal Arts and Sciences, or the School of Music before being admitted to the College of Education. The exceptions to this are: Athletic Coaching and Physical Education, and Industrial Education. To the former, admission is granted on admission to the University and the passing of a medical and physical examination; to the latter admission is granted on admission to the University.

Juniors entering the College of Education through the College of Liberal Arts and Sciences should have completed the prescribed subjects and the first five group requirements for the degree of Bachelor of Arts. (See page 13.)

Juniors entering through the other colleges should select some curriculum in the college chosen, and complete the first two years.

Juniors entering from other institutions must present 60 hours of a curriculum pursued in that institution.

Students who enter with more than 60 hours of credit will be given advanced standing in the College of Education to the amount which the credit is in excess of 60 hours.

REQUIREMENTS FOR THE DEGREE OF BACHELOR OF SCIENCE

The requirements for graduation are as follows:

1. Admission to the College of Education.

2. A curriculum of 70 hours, except in Athletic Coaching and Physical Education, in which 136 hours are required, and in Industrial Education, in which 130 hours are required.

3. A major of 20 hours in education except in Athletic Coaching and Physical Education, in which 25 hours are required, including the following courses: educational psychology, 3 hours; technic of teaching, 3 hours; a teachers' course in the subject of specialization, 2-3 hours; principles of secondary education, 3 hours; and educational practice, 3-5 hours.

4. Students must specialize in two subjects commonly taught in high schools. In the first of these subjects twenty hours of approved courses must be completed (except that in Agricultural Education 49 hours, Home Economics Education 36 hours, Athletic Coaching and Physical Education 41 hours, and Industrial Education 25 hours must be completed). In the other subject of specialization the student must complete 16 hours of approved courses. In computing the hours in the subjects of specialization, courses taken in other colleges prior to admission may be counted.

5. The remainder of the curriculum may be elected from a list of courses approved by the faculty of the College of Education.

SELECTION OF SUBJECTS FOR SPECIALIZATION

In selecting subjects for specialization students are advised to give consideration to the combinations that are desired in high schools. The following are the most frequent subject combinations in Illinois high schools in 1929-30. The major teaching subject is named first followed by the minor teaching subjects in decreasing order of frequency.

THE COLLEGE OF LAW

Law students should read the General Directions given in paragraphs 1-22 on pages 6-10. Having secured their study-lists they should report at the Dean's Office in 301 Law Building. *Law students are also advised to study carefully the special announcement of the College of Law which may be obtained at the office of the Dean.*

Each student should follow, *point by point,* the directions given on the first coupon of his study-list.

The College of Law offers a three-year curriculum in law leading to the degrees of Bachelor of Laws (LL. B.) and Doctor of Law (J.D.). The degree of Doctor of Law (J.D.) is open to students who fulfil the conditions specified on pages 153-156 of the 1929-30 University Register.

Admission

The following persons only will be admitted to the College of Law as candidates for degrees:

1. Graduates of colleges and universities of approved standing.
2. Students in the University of Illinois of senior standing[1] who are permitted to elect courses in law for the degree of Bachelor of Arts or of Bachelor of Science.

Six Year Combined Curricula

Thirty hours of law may be credited toward the degree of Bachelor of Arts in the College of Liberal Arts and Sciences or toward the degree of Bachelor of Science in the College of Commerce and Business Administration. In this manner students may secure in six years both a degree in arts or commerce and a degree in law. A candidate for both degrees must in his fourth year register in the College of Law, and also register or file a copy of his study-list in his other college, as that college may require.

Prescribed and Suggested Courses

Pre-Legal

Students are advised to plan their pre-legal college work with great care and to consult members of the law faculty in regard to their plans.

Students taking the three-three combined curriculum of either the College of Liberal Arts and Sciences or the College of Commerce and Business Administration and the College of Law must exercise care to comply with the group, major, and minor requirements of the college in which their pre-legal work is taken. Such students are urged to complete all of these requirements and at least one hundred hours of credit before entering the College of Law in order that they may devote their entire fourth year to the first year of the law curriculum.

The prospective law student is advised to choose his work, beyond those subjects prescribed in the college in which he is registered, from among the following courses: Accountancy; Economics: Principles of Economics, Money and Banking, Corporation Management and Finance, Labor Problems, Public Finance and Taxation; Political Science: American Government, State Government, Municipal Government, International Law, Principles of Jurisprudence; Philosophy: Logic, Introduction to Philosophy, and Political and Social Ethics; Latin; History: English History, History of the United States, Constitutional History of England, and Constitutional History of the United States; Psychology; Sociology; English, Rhetoric, and Public Speaking.

[1]To obtain senior standing in the University of Illinois a student must have 94 hours of University credit.

Professional

Fifteen hours of law work should be enough to occupy a student's full time; he cannot register for more without special permission.

THE SCHOOL OF MUSIC

Music students should read the General Directions for Registration given in paragraphs 1-22 on pages 6-10. Having secured their study-lists (see paragraphs 1-6), they should report to their advisers in 100-102 Smith Memorial Hall.

Each student should follow, *point by point,* the directions given on the first coupon of his or her study-list.

Each student must report to the Library after having secured the study-list at the office of the School of Music, to secure approval of sections chosen in sectional courses (other than courses in music), and to the Auditorium and Administration Building for the assessment and payment of fees.

Practice pianos may be secured at the rate of $3 a semester for one hour a day. Four two-manual and pedal practice organs are installed for the use of organ students at a reasonable fee.

A student matriculated in the School of Music takes throughout his course two applied subjects, one a major (piano, voice, etc.) in which two half-hour lessons a week are taken, and the other a minor, in which two twenty-minute lessons a week are taken.

The University Choral Society and University Orchestra are open to qualified persons from any college.

Students from other colleges desiring to take courses in applied music (i.e., piano, voice, etc.) who have not been previously registered for courses, must pass an entrance examination. For particulars consult the Director of the School of Music.

The Course in Public School Music

Candidates for the degree of Bachelor of Science in Music Education will enter the College of Education at the beginning of the third year. For curriculum see page 61.

REQUIREMENTS FOR GRADUATION

Candidates for the degree of Bachelor of Music must offer credit for 130 semester hours, including the prescribed subjects named below, one of which must be piano.

All music students are required to attend the concerts and recitals which are given under the auspices of the School of Music. More than three unexcused absences during the semester will affect the grade of the major applied music subject, of which this required attendance is a part.

Performance being also a part of the course of study in the applied music subjects, all students are required to participate in a program when sufficiently prepared.

[3]At least three hours of the electives must be in English or American literature. Students preparing to take charge of instrumental organizations in high schools must elect certain courses in Education.

[4]Music 38a and b (Organization and Conducting), 2 hours, required instead of minor subject in Band and Orchestral Instruments major.

Bachelor of Music—Vocal Major

The first and second years are the same as in the instrumental major curriculum, except that voice is the major applied subject.

At least eight hours each of French, German, and Italian are required for the vocal major. One of the languages is to be taken in the sophomore year, and a *second* language in the junior year. If the student has not presented at least two units of the *third* language, taken in high school, he must elect this language in the senior year. Otherwise, a course in English is advised for this elective.

Bachelor of Music—Theory Major

A student may take a major in Theory of Music only on recommendation of the Director. In addition to the complete theory course offered in the instrumental major, he must complete the courses in Advanced Composition (Music 11 and 12), and in Advanced Orchestration (Music 17 and 18). In addition he must present a recital during the senior year of his own compositions and orchestral arrangements. His work in applied music must be equivalent to that of three years of collegiate study. Thesis required.

THE SCHOOL OF JOURNALISM

DIRECTIONS FOR REGISTRATION

The General Directions for Registration apply to journalism and pre-journalism students. (See pages 6-10). Students who have been admitted to the School of Journalism may secure their study-lists at the office of the Director, 101 University Hall.

Pre-journalism freshmen and sophomores may register "pre-journalism" within the College of Liberal Arts and Sciences and follow the routine prescribed for registration in that college. Juniors, with or without journalism credit, may register in the School of Journalism with junior standing if they present the required work in rhetoric, science, and social sciences. Seniors in the University may register in the School of Journalism with advanced standing.

ADVISERS

Junior and Senior in the School of Journalism—Professor Murphy, 101 University Hall.

(Sections will be approved at the University Library).

Graduate students taking work in journalism—Professor Murphy, 101 University Hall.

GENERAL STATEMENT

The School of Journalism offers a two-year curriculum in journalism, based on an entrance requirement of two years of college work (60 semester hours, exclusive of physical education, military science, and hygiene), leading to the degree of Bachelor of Science in Journalism.

REQUIREMENTS IN DETAIL

Bachelor of Science in Journalism

Admission: For admission to the School of Journalism as a candidate for a degree a student must be able to matriculate in one of the undergraduate colleges and must offer in addition *60 semester hours* of college work of acceptable grade, exclusive of physical education, hygiene, and military; but inclusive of the following prescribed subjects:

Rhetoric and Composition, 6 hours (Rhetoric 1 and 2, or a proficiency examination equivalent to an examination in Rhetoric 2).

Science, 10 hours in any two of the following subjects: zoology, botany, chemistry, physics, geology. (Attention is called to the University requirement that a student who enters the University without at least one unit of high-school work in laboratory science must substitute five hours of a laboratory science for five hours of free electives in the requirements for graduation).

History, political science, economics, and sociology, 8 hours.

As desirable electives the following subjects are suggested: English literature, 6 hours; accountancy, 3 hours; newspaper reporting, 6 hours; printing and publishing, 4 hours; introduction to journalism, 2 hours; foreign language, 8 hours.

Graduation requirements are as follows:

(1) Registration in the School of Journalism.

(2) Completion of a total of 130 hours, including the 60 hours required for admission.

(3) Completion of the following work as a part of the 130 hours required for graduation:

a. At least 30 hours in journalism including: reporting, 6 hours; copyreading, 6 hours; printing and publishing, 2 hours; newspaper advertising or business problems, 2 hours; history of journalism, 3 hours; ethics of journalism, 3 hours; editorial writing, 2 hours; special problems or thesis, 4 hours.

b. At least 20 hours chosen from the following subjects, with one or more courses in any four of them: history, economics, sociology, political science, business organization and operation.

c. At least 12 hours in literature. (The work in literature may be done in any language. In foreign languages, only courses that are based on two years of college work, or their equivalent, in the given language, may be counted toward these twelve hours).

d. A course in rhetoric beyond 1 and 2.

e. Three hours in philosophy.

THE LIBRARY SCHOOL

First year Library students should present themselves in Room 306 Library Building, where both their admission and their registration may be completed. Second year students follow directions for registration in the Graduate School.

Curriculum in Library Science

The curriculum is two years in length. For graduation a student must receive credit for all courses listed in the curriculum on page 165 of the *Annual Register* except those marked with an asterisk (*), which are elective. The degree of Bachelor of Science in Library Science is conferred on a student when he has completed the required work in the first year's curriculum, and has received credit in courses amounting to 30 hours. Second year students register in the Graduate School as candidates for the Master's degree.

Recommended Preliminary Curriculum

Undergraduates who intend, on the completion of their college work, to apply for admission to the Library School, should select their courses so as to conform in general to the following recommended program of studies preparatory to library work.

English literature, 10[1]; rhetoric, 6.
Latin, 4, in addition to four years of high-school Latin.
German, 12, in addition to two years of high-school German.
French, 8, in addition to two years of high-school French.
German and French begun in college instead of in the high school should be continued for a longer period.
Medieval and modern European history, 6; history of England, 6; history of the United States, 6.
Economics, 6; political science, 4; sociology, 6.
Philosophy, 4; general psychology, 4; education, 6.
Zoology, 6; botany, 4; chemistry or physics, 6.
The total of this work is 104 semester hours, leaving the equivalent of one-half year of a four-year course free for work in other subjects or for more work in the subjects named.

PREPARATION FOR SPECIAL LIBRARIES

Seniors who desire to prepare themselves for work in special libraries (e.g., normal school, historical, business, agricultural) may, with the approval of the faculty, substitute certain advanced courses in other colleges and schools of the University for certain Library School courses.

LIBRARY VISITS

Each year all the students in the Library School are required to visit the libraries and certain of the book binderies, book stores, and printing establishments of either Chicago and vicinity or St. Louis and vicinity. During this visit, which occupies one week, the students are accompanied by members of the faculty. The expense of this week is about $30 per student.

[1]The figure after each subject denotes the minimum number of semester hours which the student should devote to that subject.

THE GRADUATE SCHOOL

ADMISSION

Admission to the Graduate School may be granted to graduates of institutions whose requirements for the bachelor's degree are equivalent to those of the University of Illinois, and to applicants from other institutions approved by the Executive Faculty. *Admission to the Graduate School does not, however, imply admission to candidacy for an advanced degree, and gives no right or claim to be so admitted. Such candidacy is determined by the Faculty after the student has demonstrated by his work here, for from two to five months, that he has the ability to do major work of graduate character. A mere accumulation of "credits" or "grades" is not sufficient.*

Admission to graduate courses may be granted only to those who have had the requisite undergraduate work in those courses. But a student of mature age who satisfies the Dean and the department concerned of his ability to pursue graduate work in a given line may be enrolled in particular graduate courses, and permitted to carry on such study or investigation under the direction of a department of the University as the department shall recommend and the Dean approve.

REGISTRATION

A candidate for admission to the Graduate School should proceed first to the Registrar's Office, 100-A Administration Building, taking with him his official statement of credits from the college of which he is a graduate.

At the Registrar's Office he will be asked to fill out in duplicate an "application for admission" and file therewith his statement of credits.

A candidate from a college or university of recognized standing will receive: (1) permit to enter; (2) a memorandum of prerequisites to be made up (a blank to be used by his advisers in indicating whether or not he is fully ready to enter upon graduate study in his major and minor subjects); and (3) a study-list.

The candidate should obtain a copy of the circular of the Graduate School, and should note the requirements and regulations explained therein, particularly those under the headings "Registration and Program of Study" and "Degrees." He should then proceed with his registration in accordance with these requirements and regulations and with the "Directions for Registration" given on the first coupon of his study-list.

COURSES OF STUDY

Courses of study open to graduate students are of three classes: (1) graduate courses proper, which are numbered from 100 upwards, in the various departments; (2) courses for graduates and advanced undergraduates, which are an intermediate group of advanced courses open to seniors, and occasionally to juniors, as well as to graduate students; (3) miscellaneous courses which include any course in the University not in the two preceding groups. Miscellaneous courses are not accepted for credit towards a degree, and students are permitted to take them only under certain restrictions.

DESCRIPTION OF COURSES AND TIME TABLE

EXPLANATION

The arrangement of subjects in the following Time Table is alphabetical. The connections of allied departments are indicated by cross references.

Following the description of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For instance, under Art and Design 14b, Applied Design, the prerequisites given are Art and Design 12 and 14a. These two courses must be completed before Course 14b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Graduate courses are numbered upwards from 100.

Credit is reckoned, *for undergraduate students,* in *semester hours,* or simply *hours.* An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drawing room.

The number of hours for which the course counts is shown in the parentheses after each course, except where the course, credits, sections, etc., are tabulated, thus: (2).

Credit for first-year graduate students, candidates for the master's degree, is counted in units. A unit course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study; four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in the following pages. Courses of the intermediate groups "for graduates and advanced undergraduates" are in general (unless otherwise specified by the department concerned) evaluated as follows for graduate credit: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

For second-year graduate students, candidates for the doctor's degree, no record of units is kept.

BACTERIOLOGY

For students entering prior to September, 1929

Major: 20 hours chosen from the courses offered by this department. Five hours may be chosen from the following courses offered by other departments: dairy bacteriology (Dairy Husbandry).

Minors: 20 hours chosen from one or two of the following: chemistry, botany, zoology, physiology.

For students entering after September 1, 1929

Major: 20 hours chosen from the courses offered by this department. Dairy Husbandry 10 (advanced Dairy Bacteriology) may be offered in partial satisfaction of this requirement. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects and taken after the freshman year: chemistry and botany. At least eight hours must be offered in each subject if two are chosen.

Courses for Undergraduates

5a. Introductory Bacteriology.—*Prerequisite:* Sophomore standing and one semester of chemistry or consent of the instructor.

BOTANY

For students entering prior to September, 1929

Major: 20 hours of Botany exclusive of courses 1, 5, and 11.

Minors: 20 hours chosen in consultation with the head of the department from not more than three subjects in the following list: agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least 8 hours must be offered in one subject.

Credit for seniors who take Botany 1 or 5 will be reduced one hour.

For students entering after September 1, 1929

Major: 20 hours of Botany exclusive of courses 1 and 5 and all courses taken during the freshman year, and inclusive of courses 2a or 2b, 3, and at least 5 hours in courses listed for advanced undergraduates and graduates.

Minors: 20 hours, exclusive of courses taken during the freshman year, in one or two departments chosen in consultation with the head of the department from the following list: agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology and zoology. At least eight hours must be offered in each department, if two are chosen.

5. Ceramic Bodies.—*Prerequisite:* Cer. 1, 2. (5). 9 MWF, 218 Cer.; 1-4 MF, 2-5 W, 113-114 Cer.

7. Heavy Clay Products.—*Prerequisite:* Cer. Eng. 1, 4. (3). Lect. and quiz, 8 TT, 1 W, 218 Cer. Lab., Sec. A, 1-4 T; Sec. B, 1-4 Th; Kiln House.

16. Enamels.—*Prerequisite:* Cer. Eng. 14. (3). 10 W, 214 Cer.; 9-12 TT, 102, 113-114 Cer.

18. Ceramic Microscopy.—*Prerequisite:* Chem. 40; Geol. 47 and 49 or equivalent. (3). 1-4 TT, 9-12 S.

21. Ceramic Pyrometry.—*Prerequisite:* General physics; inorganic chemistry. (1). 4 T; 214 Cer.

22. Kilns and the Burning of Clay Products.—*Prerequisite:* Cer. Eng. 5 and 11. (3). 11 MWF; 218 Cer.

23. Dryer and Kiln Design.—*Prerequisite:* Cer. Eng. 11; registration in Cer. Eng. 22; General Eng. Drawing 1 or 4. (2). 1-4 MF; 212 Cer.

97. Thesis. (3-5).* Arrange.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

99. **Inspection Trip.**—*Prerequisite:* Senior standing. No credit.

Courses for Graduates

101. **The Chemistry of the Compounds of Silicon.**—*Prerequisite:* Elementary course in organic and physical chemistry. (1 unit).

102. **General Technology of the Clay Industries.**—*Prerequisite:* The elements of mineralogy and of physical chemistry. (1 or 2 units).*

CHEMISTRY

For students entering prior to September, 1929

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42b, 43b, 50a, and courses in the industrial, sanitary, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, and 6 and inclusive of courses in quantitative, analytical, and organic chemistry.

Minors: 20 hours, chosen from not more than three of the following: bacteriology, botany, geology, mathematics, philosophy, physiology, physics, and zoology.

For students entering after September 1, 1929

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, and all work taken during the freshman year, and inclusive of courses in quantitative, analytical, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours, exclusive of courses taken during the freshman year, chosen from not more than two of the following: bacteriology, botany, geology, mathematics, philosophy, physiology, physics, and zoology. At least eight hours must be offered in each subject if two are chosen.

Courses for Undergraduates

1. **Inorganic Chemistry.**—*Prerequisite:* One unit of entrance credit in physics, or 2½ units of entrance credit in mathematics, or registration in Math. 1a, or 2, or 3.

Note: Students who have received entrance credit for high-school chemistry are given only three hours' credit for Chem. 1. Seniors 3 hours only.

95a. **History of Science with Particular Reference to Chemistry.**—*Prerequisite:* Junior standing and 20 hours of laboratory science. (2). 1 MW; 161 Chem. Professor RODEBUSH and others.

Courses for Graduates

101a. **Inorganic Chemistry.**—(½ unit). (For laboratory work see Chem. 102a.) Twice a week. 8 MW; 303 Chem. Professor HOPKINS.

102a. **Inorganic Chemistry.**—(Laboratory work to accompany or follow Chem. 101a.) Arrange. (¼-1 unit).* Professor HOPKINS.

105a. **Inorganic Seminar and Special Topics.**—(¼ unit). Once a week. Seminar, 11 S; 162 Chem. Associate Professor REEDY.

123a. **Qualitative Analysis.**—(½ unit). Twice a week. 11 MF; 162 Chem. Associate Professor REEDY.

125a. **Quantitative Analysis.**—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) (¼-1 unit).* 4 T; 204 Chem. Professor CLARK.

126a. **Quantitative Instrumental and Chemical Methods of Analysis in Organic Chemical Research.**—(Ultimate bomb analysis, gas density, polarimetry, refractometry, spectrophotometry, colorimetry, microscopy, etc.). (½ to 1¼ units).* Twice a week. 11 W, 162 Chem.; 11 F, 163 Chem. Laboratory, arrange; 259 Chem. Assistant Professor ENGLIS, Professor CLARK.

127a. **Modern Applications of Radiation to Chemical and Industrial Problems.**—(X-rays, radioactivity and optical spectroscopy). (½-1 unit).* 10 TT; 217 Chem. Professor CLARK.

132a. **Organic Chemistry.**—(First course). (¾ unit). 11 TT; 217 Chem. Professor ADAMS.

134. **Organic Chemistry.**—Chiefly laboratory work. (½-1 unit).* Arrange. 219 Chem. Associate Professor FUSON.

135a. **Organic Chemistry.**—(Seminar). (¼ unit). Once a week. 10 W; 217 Chem. Professor ADAMS.

136a. **Organic Chemistry.**—Special Topics. (¾ unit). Twice a week. 11 TT; 111 Chem. Associate Professor SHRINER.

145a. **Physical Chemistry.**—(Seminar). (¾ unit). Twice a week. 10-12 S; 176 Chem. Professor RODEBUSH.

152a. **Physiological Chemistry.**—Chiefly laboratory. (½-1 unit).* Arrange. 463 Chem. Professor ROSE.

155a. **Physiological Chemistry.**—(Seminar).[1] (¾ unit). Two hours a week. 9-11 F; 456 Chem. Professor ROSE.

160a. **Advanced Chemical Technology and Chemical Engineering.**—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

161a. **Chemical Plant Design.**—Calculations and layout of equipment for recently developed processes. *Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 TT; 162 Chem. Associate Professor KRASE.

186a. **Sanitary Chemistry.**—(½-1¼ units).* Arrange. One to five times a week. 60-B Chem. Professor BUSWELL.

---

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

[1]Required of all students majoring in physiological chemistry.

190a. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Professor CLARK, Associate Professor REEDY.
Inorganic Chemistry.—Associate Professor REEDY; Dr. BAILAR, Dr. AUDRIETH.
Analytical Chemistry.—Professor CLARK, Assistant Professors SMITH, ENGLIS.
Food Chemistry.—Assistant Professor ENGLIS.
Applied X-Rays.—Professor CLARK.
Organic Chemistry.—Professors NOYES, ADAMS, MARVEL; Associate Professors SHRINER, FUSON; Dr. BAILAR.
Sanitary Chemistry.—Professor BUSWELL.
Physiological Chemistry.—Professor ROSE, Assistant Professor DUVIGNEAUD.
Industrial Chemistry.—Professors PARR, KEYES; Associate Professor KRASE.
Ceramic Chemistry.—Professor PARMELEE.
Phyto-Chemistry.—Assistant Professor ENGLIS.
Animal Chemistry (Nutrition).—Professor GRINDLEY.

97. Thesis.—*Prerequisite:* Full senior standing in Civil Engineering. (1 or 2).* Time to be arranged.

99. Inspection Trip.—*Prerequisite:* Full senior standing in Civil Engineering. No credit, but required for graduation.

Courses for Graduates

101. Water Supply Engineering.—(1 unit). Twice a week. Time to be arranged. Professor Babbitt.

103. Highway Construction.—(1 unit). Twice a week. Time to be arranged. Professor Crandell.

106. Reinforced Concrete Structures.—(1 unit). Twice a week. Time to be arranged. Professor Huntington.

107. Statically Indeterminate Structures.—(1 unit). Twice a week. Time to be arranged. Professor Wilson.

109. Water Purification and General Sanitation.—(1 unit). Twice a week. Time to be arranged. Professor Babbitt.

124. Steel Building Construction.—(1 unit). Twice a week. Time to be arranged. Professor Huntington.

130. Advanced Hydrology.—(1 unit). Twice a week. Time to be arranged. Associate Professor Pickels.

140. Research.—(½-2 units).* To be arranged.

THE CLASSICS

For students entering prior to September, 1929

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, 17, and 55.
Minors: 20 hours chosen from not more than two of the following: foreign language (Latin being especially recommended), English literature, history, and philosophy.

Latin

Major: 20 hours, excluding Latin 11a-11b, 6, 1a-1b, 13, 20, 56 and including six hours in translation courses for advanced undergraduates and graduates.
Minors: 20 hours, chosen from not more than two of the following: foreign language (Greek being especially recommended), English literature, history, and philosophy.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

Classics

Major: 20 hours in Greek and Latin, excluding Greek 1a-1b, 15, 16, 17, 55, and Latin 11a-11b, 6, 1a-1b, 9, 13, 20, and 56. At least six hours shall be offered in the secondary language and the remaining hours in the primary one.

Minors: 20 hours chosen from not more than two of the following: foreign language, English literature, history, and philosophy.

For students entering after September 1, 1929

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, 17, and all courses taken during the freshman year.

Minors: 20 hours, exclusive of courses taken during the freshman year, chosen from not more than two of the following: foreign language (Latin being especially recommended), English literature, history, and philosophy. At least eight hours must be taken in each subject, if two are chosen.

Latin

Major: 20 hours, excluding Latin 11a-11b, 6, 1a-1b, 13, 20, and all courses taken during the freshman year and including six hours in translation courses for advanced undergraduates and graduates.

GREEK

Courses for Undergraduates

1a. Elementary Greek.—(4). 8 TWTF; 114 L. H. Mr. VANDERPOOL.

3. Second Year Greek. Plato.—*Prerequisite:* Greek 1a-1b. (3). 11 MWF; 114 L. H. Mr. DUNKIN.

Course for Advanced Undergraduates and Graduates

5. Herodotus and Lyric Poets.—*Prerequisite:* Greek 3 and 4 or an equivalent. (3). 9 TTS; 114 L. H. Mr. VANDERPOOL.

Greek Life and History

For courses 15, 16, 18, and history 55 a knowledge of Greek is not presupposed.

15. Greek Athletics.—*Prerequisite:* Sophomore standing. (1). 1 T; 103 New Agr. Mr. JOHNSON.

16. Life of the Ancient Greeks.—*Prerequisite:* Sophomore standing. (1). 3 Th; 120 L. H. Mr. VANDERPOOL.

18. Greek Archaeology.—*Prerequisite:* Sophomore standing. (2). 2 TT; 120 L. H. Mr. VANDERPOOL.

Greek History.—See History 55. 1 MWF; 120 L. H. Professor OLDFATHER.

Courses for Graduates

Students desiring to take graduate work in Greek should have had at least three years of college Greek or an equivalent.

110a. See Latin 110a.

105a. Plato.—Twice a week. (1 unit). Arrange. Professor OLDFATHER.

LATIN

Courses for Undergraduates

11a. Elementary Latin.—(*Note:* Seniors will receive three hours' credit only.) (4). 8 TWTF; 120 L. H. Mr. RAPP.

6. Cicero.—*Prerequisite:* Two entrance units in Latin or Latin 11a-11b. (4). 2 TWTF; 114 L. H. Mr. JOHNSON.

1a. Ovid.—*Prerequisite:* Three entrance units in Latin or Latin 6. (4). 1 TWTF; 114 L. H. Mr. DUNKIN.

12a. Plautus, Terence, Catullus.—*Prerequisite:* Four entrance units in Latin or Latin 1a-1b. (4). 9 TWTF; 120 L. H. Mr. JOHNSON.

3. Lucretius and Horace (Odes).—*Prerequisite:* Latin 2a-2b or an equivalent. (3). 10 MWF; 120 L. H. Mr. JOHNSON.

5a. Latin Composition.—*Prerequisite:* Three entrance units in Latin or Latin 6. Required to secure the department's recommendation to teach. (1). 4 Th; 120 L. H. Professor CANTER.

Roman Life and History

Course 20 presupposes no knowledge of Latin and is open to all students except freshmen.

20. Mythology of Greece and Rome.—*Prerequisite:* Sophomore standing.

Subject	Credits	Section	Hours	Days	Room	Instructor
Latin 20	2	Lect.	2	Th	202 L. H.	CANTER
		Quiz A	2	T	202 L. H.	
		B	3	T	203-A L. H.	

Courses for Advanced Undergraduates and Graduates

23. Livy; Tibullus; Propertius.—*Prerequisite:* 12 hours of Latin acceptable for a major. (3). 2 MWF; 120 L. H. Mr. RAPP.

30a. Honors Course.—Thesis or a special course of study approved by the department. *Prerequisite:* Senior standing and 14 hours of Latin acceptable for a major. (2). Arrange.

Courses for Graduates

Students desiring to take graduate work in Latin should have had at least three years of college Latin in addition to the Latin presented to meet entrance requirements.

107. Epigraphy.—Twice a week. (1 unit). Arrange. Professor CANTER.

109. Vergil.—Twice a week. (1 unit). Arrange. Professor CANTER.

110a. Bibliography and Criticism.—(1 unit). Arrange. Professors OLDFATHER and CANTER.

COMMERCIAL LAW

(See Business Organization and Operation.)

COMPARATIVE LITERATURE

(See English 54.)

DAIRY HUSBANDRY

Courses for Undergraduates

1. Testing Dairy Products.—*Prerequisite:* D. Husb. 24b or 30 hours of university work. (3). 1-4 TT (Lect., Quiz, Lab.); 503 Agr. Assistant Professor OVERMAN, Mr. GARRETT.

6. Dairy Plant Operations.—*Prerequisite:* D. Husb. 1, 11, and 12, or registration therein. (3). Time to be arranged. Assistant Professor TRACY, Mr. TUCKEY.

23a-k. Investigation with Thesis.—(This course is continuous throughout the year; credit is not given for either semester separately.) *Prerequisite:* 90 hours of university work including not less than 20 hours pertinent to thesis problem and approval of head of department. (5). Arrange. 120 Agr.

(a) Dairy Bacteriology. Professor PRUCHA, Assistant Professor BRANNON.
(c) Dairy Chemistry. Assistant Professor OVERMAN.
(e) Dairy Farming and Economic Milk Production. Professor FRASER.
(g) Dairy Manufactures. Professor RUEHE, Assistant Professor TRACY.
(k) Dairy Production. Professors GAINES, YAPP; Associate Professor NEVENS.

24a. Elementary Dairy Production.—(*Note:* Juniors and seniors allowed 2 hours' credit only.)

D. Husb. 24a	3	Lect.	9	M	127 New Agr.	NEVENS,
		Lab.	8, 9	W	S. P.	KUHLMAN and
		Quiz	9	F	127 New Agr.	SHAW

24b. Elementary Testing and Manufacture of Dairy Products.—*Prerequisite:* Credit or registration in Chem. 1 or 2. (*Note:* Juniors and seniors allowed 2 hours' credit only.)

D. Husb. 24b	3	Lect.	2	Th	D. Mfrs.	TUCKEY
		Lab.	1, 2	T	D. Mfrs.	
		Quiz	1	Th	D. Mfrs.	

Courses for Advanced Undergraduates and Graduates

4. Ice Cream Making.—*Prerequisite:* D. Husb. 1, 11, 12; and 60 hours of university work. This course is accompanied by an inspection trip costing from $20 to $30. (5). 1-4 TT, 4 MWF; D. Mfrs. Assistant Professor TRACY.

10. Advanced Dairy Bacteriology.—*Prerequisite:* Bact. 5a and 5b; 60 hours of university work. (4). 1-4 MWF; 456 Agr. Professor PRUCHA; Assistant Professor BRANNON.

17. Advanced Study of Dairy Breeds.—*Prerequisite:* D. Husb. 2 and 60 hours of university work. (3). 10 MWF; 553 Agr. Professor YAPP.

20. Economic Problems in Dairy Farming.—*Prerequisite:* 60 hours of university work. (3). 9 MWF; 553 Agr. Professor FRASER.

25. Advanced Study of Dairy Cattle Feeding.—*Prerequisite:* D. Husb. 2; 60 hours of university work. (2). Time to be arranged. Associate Professor NEVENS.

Courses for Graduates

101. Economic Milk Production.—(½-2 units).* Arrange. PROFESSOR FRASER.

104. Dairy Bacteriology —(½-1 unit).* Arrange. Professor PRUCHA.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

105. Dairy Manufactures.—(½-2 units).* Arrange. Professor RUEHE.

106. Dairy Bacteriology.—(½-2 units).* Arrange. Professor PRUCHA.

107. Dairy Chemistry.—(½-2 units).* Arrange. Assistant Professor OVERMAN.

108. Physiology of Lactation.—(½-2 units).* Arrange. Professor GAINES.

112a-f. Research.—(1-4 units).* Arrange.

Note: Graduate students writing a thesis should so indicate when registering in Dairy Husbandry 112.

(a) **Dairy Bacteriology.** Professor PRUCHA.
(b) **Dairy Chemistry.** Assistant Professor OVERMAN.
(c) **Dairy Cattle Breeding.** Professor YAPP.
(d) **Dairy Cattle Feeding.** Associate Professor NEVENS.
(e) **Milk Production.** Professor GAINES.
(f) **Dairy Manufactures.** Professor RUEHE.

ECONOMICS

(See also Business Organization and Operation, and Transportation.)

Major: For students in the College of Liberal Arts and Sciences 20 hours made up of Economics 1 and other courses in Economics for which it is a prerequisite.

Minors: 20 hours in any one or two of the following subjects: Geography, history, philosophy, political science, and sociology.

Economics 22 and 27 are open to freshmen without previous requirements.

Economics 1 is the fundamental course in economics. It is a prerequisite for most of the advanced courses and students expecting to do advanced work in economics should take it in their sophomore year.

Courses for Undergraduates

1. Principles of Economics.—*Prerequisite:* 30 hours of university work.

ENGLISH

(Including English Language and Literature, Rhetoric, Public Speaking, and Scandinavian Languages.)
For students entering prior to September, 1929

Major: 20 hours in English excluding Rhetoric 1, 2, 10, 12, English 10, 20, 41, 42, and including at least 10 hours in English literature, at least 3 hours in composition, and two courses from the advanced group in English literature.

Minors: 20 hours in either (a) Latin or Greek or French or German; or (b) in any two of those languages; or (c) in one of those languages and philosophy; or (d) in one of those languages and history.

Major in Public Speaking

Major: 10 hours in public speaking, inclusive of courses 7 and 8 and either 4 or 6, and 10 hours of English exclusive of English 10, 11, 41, 42, and of Rhetoric 1, 2, 10, 12, 21, and 22, and inclusive of one course in English literature from the advanced group.

---

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

[1]L1 open only to those having a grade B or above in mathematics or by special permission of the instructor.

Minors: 20 hours in any one or two of the following subjects: psychology, philosophy, Greek, Latin, French, German, history, political science, economics, sociology.

Credit for seniors who take English 10, 11, Rhetoric 1, 2, 12 will be reduced one hour.

For students entering after September 1, 1929

Major. 20 hours in English *excluding* Rhetoric 1, 2, 10, 12, 21, 22, English 10a, 10b, 20a, 20b, 41, 42, and all courses taken during the freshman year, and *including* at least 10 hours in English literature, at least 3 hours in composition, and two courses from the advanced group in English literature.

Minors. 20 hours, excluding courses taken during the freshman year, in (a) Latin or Greek or French or German or Spanish; or (b) in any two of those languages; or (c) in one of those languages and philosophy; or (d) in one of those languages and history. No language courses may be regarded as satisfying the minor requirement if they are excluded from the major of that department (excepting elementary courses in Greek, Latin, French 2a and Spanish 2a). At least eight hours must be offered in each subject.

Major in Public Speaking

Major 10 hours in public speaking, exclusive of courses taken during the freshman year, inclusive of courses 7 and 8 and either 4 or 6, and 10 hours of English exclusive of English 10a, 10b, 41, 42, and of Rhetoric 1, 2, 10, 12, 21, 22, and inclusive of one course in English literature from the advanced group.

Minors: 20 hours, excluding courses taken during the freshman year, in any one or two of the following subjects: psychology, philosophy, Greek, Latin, French, German, history, political science, economics, or sociology. At least eight hours must be offered in each subject if two are chosen.

ENTOMOLOGY

For students entering prior to September, 1929

Major: 20 hours from courses offered in the department, except Entom. 1, 2, and 31.

Minors: 20 hours in not more than three of the following: zoology, botany, physiology, chemistry, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite. Course 1 or 2 may be followed by any of the other courses for undergraduates or by 20 or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Arts and other students may begin with either 1 or 2. Students preparing for service as economic entomologists should take as many of the courses offered as possible and should consult the head of the department.

For students entering after September 1, 1929

Major: 20 hours exclusive of Entomology 1, 2, 31, and all courses taken during the freshman year. At least five hours must be offered from the advanced group.

Minors: 20 hours, excluding courses taken during the freshman year, in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite. Course 1 or 2 may be followed by any of the other courses for undergraduates or by 20 or 21 in the senior year. 2. Insects: Their Habits, Adaptations, and Classification.—*Prerequisite:* 30 hours of university work. (5). Lect., 10 TT; Lab., 10, 11 MWF; 310 Entom. Assistant Professor BALDUF.

3. Classification of Insects.—*Prerequisite:* Entom. 1 or 2 and 30 hours of university work. (5). Lect., 8 TT; Lab., 8, 9 MWF; 310 Entom. Assistant Professor BALDUF.

7a. Insect Morphology.—*Prerequisite:* Entom. 1 or 2 and 30 hours of university work. (3). 8, 9 TTS; 312 Entom. Associate Professor HAYES.

8a. Advanced Economic Entomology.—*Prerequisite:* Entom. 1 or 2 and 30 hours of university work. (3 or 5).* 1, 2, 3 TT; 312 Entom. Associate Professor HAYES.

31. Essentials of Beekeeping.—*Prerequisite:* 30 hours of university work. (2). 10, 11 TT; 104 Viv. Assistant Professor MILUM.

Courses for Advanced Undergraduates and Graduates

6. Special Problems.—*Prerequisite:* Any of the following: Entom. 3, 7, 8, 10, 20, 21, 22, or 31; senior standing. (2-5).* Saturday morning; additional hours to be arranged. Various instructors.

20. Insect Control.—*Prerequisite:* Entom. 1 or 2; senior standing. (4). Lab., 1, 2, 3 TT; Lect., to be arranged; 109 Entom. Professor METCALF, Mr. EVANS.

Courses for Graduates

The prerequisite for graduate work in entomology is two years of undergraduate biology, including zoology and entomology.

102. Research in the Morphology and Embryology of Insects.—(½-2 units).* Time to be arranged. Associate Professor HAYES.

107. Insect Anatomy.—(½ unit). 8, 9 TTS; 312 Entom. Associate Professor HAYES.

108. Research in Economic Entomology.—(½-2 units).* Time to be arranged. Professor METCALF.

109. Research in Systematic Entomology.—(½-2 units).* Time to be arranged. Professor METCALF, Assistant Professor BALDUF.

110. Research in the Biology and Ecology of Insects.—(½-2 units).* Time to be arranged. Professor METCALF.

22. Statistics.—*Prerequisite:* Math. 2 and 6, junior standing. (3). 11 MWF; 206 U. H. Associate Professor Crathorne.

35. Teachers Course.—*Prerequisite:* 18 hours of mathematics, including Mathematics 7 and 9. (3). 10 TTS; 104 U. H. Associate Professor Lytle.

36. Advanced Aspects of Euclidean Geometry.—*Prerequisite:* 18 hours of mathematics, including Mathematics 7 and 9. (3). 10 MWF; 104 U. H. Associate Professor Lytle.

53. Integral and Operational Equations in Mathematical Physics.—*Prerequisite:* Math. 9a. (3). 10 MWF; 254 Math. Dr. Bourgin.

90a. Undergraduate Thesis.—*Prerequisite:* 24 hours of college mathematics. (2). Arrange.

91a. Introduction to Modern Mathematics.—*Prerequisite:* 20 hours of mathematics and permission of instructor. (3). 9 TTS; 155 Math. Professor Coble.

Courses for Graduates

100. Seminar and Thesis.—(1-2 units).* Arrange.

102. Functions of a Complex Variable.—(1 unit). 3 MWF; 254 Math. Assistant Professor Maria.

113. Linear Differential Equations.—(1 unit). 11 MWF; 254 Math. Professor Carmichael.

124. The Theory of Numbers.—(1 unit). 2 MWF; 254 Math. Associate Professor Hazlett.

127. Theory of Groups.—(1 unit). 9 MWF; 366 Math. Professor Miller.

129. Theory of Statistics.—(1 unit). 9 MWF; 254 Math. Associate Professor Crathorne.

Courses for Graduates

Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week; time to be arranged. Associate Professor Goff.

108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week; time to be arranged. Associate Professor Macintire.

109. Machine Design.—Rational design; the application of mechanics of materials. Individual problems. (1 unit). Twice a week; time to be arranged. Professor Leutwiler.

112. Laboratory Investigation.—Combustion of fuel, boiler economy; steam engines and turbines; gas engines and producers; explosive mixtures; mechanical refrigeration. Original work. (1½ units). Three times a week; time to be arranged. Professors Willard, Polson, Kratz; Associate Professor Macintire.

Courses for Advanced Undergraduates and Graduates

41. Advanced Mechanics of Materials.—*Prerequisite:* T. A. M. 29 or 25. (3). Time to be arranged. Professor SEELY.

43. Laboratory Work in Hydraulics.—Advanced experimental work in hydraulics. *Prerequisite:* T. A. M. 10 or 26. (2). Time to be arranged. Professor ENGER.

45. Advanced Technical Mechanics.—*Prerequisite:* T. A. M. 20 and 25, or equivalent work in mathematics and physics. (3). Time to be arranged. Professor WESTERGAARD.

Courses for Graduates

101. Analytical Mechanics.—(1 unit). Twice a week; time to be arranged. Professor MOORE.

104. Experimental Work in the Laboratory of Applied Mechanics.—(½-2 units).* Twice a week; time to be arranged. Professors MOORE, ENGER; Associate Professor RICHART.

105. Experimental and Analytical Work in Reinforced Concrete.—(1-2 units).* Twice a week; time to be arranged. Associate Professor RICHART.

106. Theory of Elasticity and Applications to Engineering Problems.—(1 unit). Three times a week; time to be arranged. Professor WESTERGAARD.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating that they have been accepted.

Service in the bands takes the place of the regular military drill.

1. Freshman Band.—(1). Twice a week. Days and section to be assigned according to proficiency. Director HARDING.

3. Sophomore Band.—(1). See foregoing. Director HARDING.

5. Junior Band.—(1). Twice a week. Days and section to be assigned. Director HARDING.

7. Senior Band.—(1). See foregoing. Director HARDING.

MILITARY SCIENCE

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b." Students who have had training in a senior ROTC unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

PHYSICS

Major: 20 hours from courses offered in the department. At least 5 hours must be offered from the advanced group.

Minors: 20 hours exclusive of courses taken during the freshman year in one or two of the following subjects, with not less than 8 hours in each department, if two subjects are chosen: mathematics, astronomy, chemistry, education.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering. For undergraduate students taking advanced work or a major in physics, the following courses are suggested.

Freshman year: Trigonometry (Math. 4) and chemistry.
Sophomore year: Physics 1a-1b, 3a-3b, or Physics 7a-7b, 8a-8b.
Junior year: Physics 14, 16, 23, 33, 36, 44.
Senior year: Physics 14, 20, 22, 30, 31, 45, 46, 78, 97, 98.

Intermediate Course

17a. Light.—*Prerequisite:* Physics 1a-1b, 3a-3b; or Physics 7a-7b, 8a-8b. (3). 9 TT, 204 P. L.; 2-5 F, 313 P. L. Associate Professor SCHULZ.

Courses for Advanced Undergraduates and Graduates

14a. Theoretical Mechanics.—*Prerequisite:* Physics 1a-1b, 3a-3b; or 7a-7b, 8a-8b; Math. 8a-8b or 7 and 9. (3). 8 MWF; 204 P. L. Dr. SANDERS.

20a. Light.—*Prerequisite:* Physics 1a-1b, 3a-3b; or 7a-7b, 8a-8b; Math. 8a-8b or 7 and 9. (2). 9 TT; 306 P. L. Dr. ALMY.

22a. Light Laboratory.—*Prerequisite:* Registration in Physics 20a. (2). 2-5 MW; 313 P. L. Dr. ALMY.

23. Sound.—*Prerequisite:* Physics 1a-1b, 3a-3b; or Physics 7a-7b, 8a-8b. (3). 9 MWF; 204 P. L. Professor WATSON.

31a. Special Problems in Advanced Physical Measurements.—(3-5).* Arrange. P. L. Professor LOOMIS and others.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

33. **Sound Laboratory.**—*Prerequisite:* Registration in Physics 23. (1). 2-5 T; 213 P. L. Professor WATSON.

44a. **Electrical and Magnetic Measurements.**—*Prerequisite:* Physics 1a-1b, 3a-3b; or Physics 7a-7b, 8a-8b, Math. 8a-8b or 7 and 9.

46a. **Advanced Electrical Measurements by High Frequency Currents.**—*Prerequisite:* Physics 44a and 44b or their equivalent. Consult instructor. (2). 1-4 TT; 102 P. L. Associate Professor WILLIAMS.

50. **Theory and Use of Optometric Instruments.**—*Prerequisite:* Registration in Physics 17. (4). 2 MW, 2-4 TT; 313 P. L. Associate Professor SCHULZ.

97. **Thesis.**—(2-5).* Professor LOOMIS and others.

Courses for Graduates

104a. **Electrical and Magnetic Measurements.**—(¾ or 1 unit).* Arrange. 112 P. L. Professor KNIPP and Associate Professor WILLIAMS.

120. **Light.**—Physical Optics and Spectroscopy. (1-2 units).* Arrange. 313 P. L. Associate Professor PATON and Dr. ALMY.

124. **Conduction of Electricity Through Gases.**—(1 unit). 9 MWF; 119 P. L. Professor KNIPP.

126. **Physics Colloquium.**—(No credit). 7 p.m., Th; 100 P. L. Professor LOOMIS.

131. **Investigation of Special Problems.**—(1-2 units).* Arrange. P. L. Professors in the department.

132a. **Dynamics.**—(1 unit). 8 MWFS; 306 P. L. Professor KUNZ.

132c. **Hydrodynamics.**—(½ unit). 8 TT; 306 P. L. Professor KUNZ.

133. **Seminar.**—(1-2 units).* Arrange. P. L. Professors in the department.

184. **Line Spectra and Atomic Structure.**—(1 unit). 10 MWF; 204 P. L. Professor LOOMIS.

186a. **Quantum Mechanics and Wave Mechanics.**—(1 unit). 9 MWF; 306 P. L. Assistant Professor BARTLETT.

190. **Research.**—(1-2 units).* Arrange. P. L. Professors in the department.

PHYSIOLOGY

For students entering prior to September, 1929

Major: 20 hours from courses offered in the department exclusive of Physiology 1.
Minors: 20 hours in not more than three of the following: botany, bacteriology, chemistry, entomology, and zoology.
Seniors registered in Physiology 1, 2, 4, 6 will receive one hour less credit.

For students entering after September 1, 1929

Major: 20 hours from courses offered in the department exclusive of Physiology 1, and all courses taken during the freshman year.
Minors: 20 hours, excluding work taken during the freshman year, in not more than two of the following: botany, bacteriology, chemistry, entomology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Courses for Undergraduates

POLITICAL SCIENCE

For students entering prior to September, 1929

Major: 20 hours from any courses offered by the department. A major may include three hours of constitutional history (Hist. 27, 44, or 62).

Minors: 20 hours, selected from two of the following subjects: history, economics, law, sociology, philosophy, and education.

Courses 1 and 3 give a general survey of national, state, and local government in the United States. Undergraduates beginning the study of political science are advised to take first, course 1, 3, or 16, and those planning for advanced work should take course 1 and either 3 or 16 in their sophomore year. Course 3 is offered the second semester.

For students entering after September 1, 1929

Major: 20 hours from any courses offered by the department. A major may include three hours of constitutional history (Hist. 27, 44, or 62).

Minors: 20 hours exclusive of courses taken during the freshman year, selected from two of the following subjects: history, economics, law, sociology, philosophy, and education. At least eight hours must be offered in each subject, if two are chosen.

DESCRIPTION OF COURSES AND TIME TABLE

EXPLANATION

The arrangement of subjects in the following Time Table is alphabetical. The connections of allied departments are indicated by cross references.

Following the description of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For instance, under Art and Design 14b, Applied Design, the prerequisites given are Art and Design 12 and 14a. These two courses must be completed before Course 14b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Graduate courses are numbered upwards from 100.

Credit is reckoned, *for undergraduate students*, in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drawing room.

The number of hours for which the course counts is shown in the parentheses after each course, except where the course, credits, sections, etc., are tabulated, thus, (2).

Credit for first-year graduate students, candidates for the master's degree, is counted in units. A unit course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study; four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in the following pages. Courses of the intermediate groups "for graduates and advanced undergraduates" are in general (unless otherwise specified by the department concerned) evaluated as follows for graduate credit: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

For second-year graduate students, candidates for the doctor's degree, no record of units is kept.

ANIMAL HUSBANDRY

Courses for Undergraduates

1. Introduction to Animal Husbandry.—Required of students not having had livestock judging in high school. (No credit in this course allowed to juniors and seniors.) (2). 3, 4 TT; S. P. Mr. CRAWFORD, Mr. YOUNG.

6. Livestock Management.—*Prerequisite:* An. Husb. 21. It is recommended that Farm Management 1 be taken previously or concurrently. (5). 10 MTWTF; S. P. Professor EDMONDS.

9b-v. Investigation with Thesis.—(Continuous throughout the year; credit is not given for either semester separately.) *Prerequisite:* 90 hours of university work, including not less than 20 hours pertinent to thesis problem, and approval of the head of the department. (5). Arrange.

(b) **Beef Cattle.**—Professor RUSK, Associate Professor SNAPP.

(d) **Horses.**—Professor EDMONDS.

(f) **Sheep.**—Assistant Professor KAMMLADE.

(h) **Swine.**—Professor CARROLL.

(k) **Poultry.**—Professor CARD.

(m) **Animal Nutrition.**—Professor MITCHELL.

(p) **Animal Genetics.**—Associate Professor ROBERTS.

(r) **Animal Pathology.**—Professor GRAHAM.

(t) **Meats.**—Associate Professor BULL.

(v) **Marketing.**—Associate Professor ASHBY.

12. Special Problems.—*Prerequisite:* 90 hours of university work; approval of the head of the department. (5). Arrange. Members of the department.

21. Principles of Feeding.—*Prerequisite:* Chem. 5; An. Husb. 1.

Subject	Credits	Section	Hours	Days	Room	Instructor
An. Husb. 21	3	Lect.	2	W	553 Agr.	BULL and others
		A Quiz	2	MF	553 Agr.	
		B Quiz	2	MF	Meat Lab.	

35. Animal Hygiene, Sanitation, Contagious Diseases of Farm Animals.—*Prerequisite:* An. Husb. 34; Bact. 5a. (2). 3 TT; An. Path. L. Professor GRAHAM.

37. Poultry Management.—*Prerequisite:* An. Husb. 21. (3). 9 MWF; 316 New Agr. Professor CARD, Mr. SLOAN.

Courses for Advanced Undergraduates and Graduates

10. Meat.—*Prerequisite:* An. Husb. 21 and 36. The class will visit a Chicago packing house. The cost of the trip will be about $15. (3). 1, 2, 3 TT; 128 Agr. Associate Professor BULL, Mr. OLSON.

27. Sheep Husbandry.—*Prerequisite:* An. Husb. 3 and 6. (3). 11 TT; Lab. Arrange; 111 S. P. Assistant Professor KAMMLADE.

28. History of Breeds of Live Stock.—*Prerequisite:* An. Husb. 3. It is recommended that this course precede An. Husb. 22. (3). 3 MWF; 316 New Agr. Heads of divisions.

29. Systems of Live Stock Farming.—*Prerequisite:* Farm Man. 1; An. Husb. 6. The cost of farm inspection trips will be about $10. (2). 8 TT; 331 New Agr. Associate Professor WILCOX.

31. Advanced Course in Animal Nutrition.—*Prerequisite:* 90 hours of university work, including An. Husb. 7. (3). Time to be arranged. Professor MITCHELL.

32. Marketing Live Stock.—*Prerequisite:* 90 hours of university work; An. Husb. 3. *Prerequisite or concurrent:* An. Husb. 6. Inspection trip to a terminal market required; estimated cost of trip, $18. (2). 9 TT; 316 New Agr. Associate Professor ASHBY.

33. Horse Production.—*Prerequisite:* An. Husb. 3 and 6. (3). 1 MWF; S. P. Professor EDMONDS.

39. Poultry Production.—*Prerequisite:* An. Husb. 37. (3). Lect., 10 MW; Lab., 8, 9 S; 316 New Agr. Professor CARD.

41. Animal Genetics.—*Prerequisite:* Zool. 15. (3). 2 MWF; Gen. Bldg. Associate Professor ROBERTS.

Courses for Graduates

103. Experiment Station Problems.—Once a week. (½ unit). Time to be arranged. Professor MUMFORD.

112. Research.—Investigations along the following lines:

(a) **Economic Factors in Meat Production.**—Professor RUSK.

(b) **Systems of Live Stock Farming.**—Associate Professor CASE.

(d) **Animal Nutrition.**—Professor MITCHELL.

(e) **Animal Genetics.**—Associate Professor ROBERTS.

(f) **Poultry Husbandry.**—Professor CARD.

(a), one to three times a week; (b), twice a week; (d), (e), (f), three to five times a week. (½ to 2 units).* These courses may be taken during the summer by special permission.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

117. Animal Genetics.—Two to five times a week. (1 unit). Associate Professor ROBERTS.

118. Animal Nutrition Seminar.—Two hours a week. (½ unit). Professor MITCHELL.

119. Laboratory Methods in Animal Nutrition.—Two to five times a week. (½ to 1 unit).* Professor MITCHELL.

120. Laboratory Methods in the Diagnosis of Animal Diseases.—Two to five times a week. (½ to 1 unit).* Professor GRAHAM.

121. Laboratory Methods in Animal Genetics.—(½ to 1 unit).* Two to five times a week. Time to be arranged. Associate Professor ROBERTS.

ARCHITECTURE

12. History of Architecture.—*Prerequisite:* Arch. 11. Not open to students expecting a degree from the Department of Architecture. (3). 3 MWF; 120 Arch.

14. History of Architecture.—*Prerequisite:* Arch. 13. (2). 11 MW; 120 Arch.

16. History of Architecture.—*Prerequisite:* Arch. 15. (2). 11 TT; 120 Arch.

BACTERIOLOGY

For students entering prior to September, 1929

Major: 20 hours chosen from the courses offered by this department. Five hours may be chosen from the following courses offered by other departments: Dairy bacteriology (dairy husbandry).

Minors: 20 hours chosen from one or two of the following: Chemistry, botany, zoology, physiology.

For students entering after September 1, 1929

Major: 20 hours chosen from the courses offered by this department. Dairy Husbandry 10 (advanced dairy bacteriology) may be offered in partial satisfaction of this requirement. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects and taken after the freshman year: Chemistry and botany. At least eight hours must be offered in each subject if two are chosen.

5a. Introductory Bacteriology and Sanitary Science.—*Prerequisite:* Sophomore standing; one semester of chemistry or consent of the instructor.

BOTANY

For students entering prior to September, 1929

Major: 20 hours of botany exclusive of courses 1, 5, and 11.

Minors: 20 hours chosen in consultation with the head of the department from not more than three subjects in the following list: Agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least 8 hours must be offered in one subject.

Credit for seniors who take Botany 1 or 5 will be reduced one hour.

For students entering after September 1, 1929

Major: 20 hours of botany exclusive of courses 1 and 5 and all courses taken during the freshman year, and inclusive of courses 2a or 2b, 3, and at least 5 hours in courses listed for advanced undergraduates and graduates.

Minors: 20 hours, exclusive of courses taken during the freshman year, in one or two departments chosen in consultation with the head of the department from the following list: Agronomy, bacteriology. chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least eight hours must be offered in each department, if two are chosen.

Courses for Undergraduates

28. Pyrochemical Problems.—*Prerequisite:* Cer. 14; Chem. 40. (2). 11 MW; 214 Cer.

98. Thesis.—(3 to 5).* Arrange.

Courses for Graduates

101. Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (¾ unit). Arrange.

102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. Lectures; seminar; laboratory. (1 or 2 units).* Arrange.

104. Technology of Glass.—Lectures and laboratory. (1 or 2 units).* Arrange.

CHEMISTRY

For students entering prior to September, 1929

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i. e., ½, or 1, or 1½, or 2.

life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42b, 43b, 50a, and courses in the industrial, sanitary, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, and 6 and inclusive of courses in quantitative, analytical, and organic chemistry.

Minors: 20 hours, chosen from not more than three of the following: bacteriology, botany, geology, mathematics, philosophy, physiology, physics, and zoology.

For students entering after September 1, 1929

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, and all work taken during the freshman year, and inclusive of courses in quantitative, analytical, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours, exclusive of courses taken during the freshman year, chosen from not more than two of the following: Bacteriology, botany, geology, mathematics, philosophy, physiology, physics, entomology, and zoology. At least eight hours must be offered in each subject if two are chosen.

Courses for Undergraduates

1. Inorganic Chemistry.—*Prerequisite:* One unit of entrance credit in physics, or 2½ units of entrance credit in mathematics, or registration in Math. 1a, or 2, or 3.

Note: Students who have received entrance credit for high school chemistry are given only three hours' credit for Chem. 1. Seniors 3 hours only.

Courses for Graduates

Graduate students whose major subject is in some department other than chemistry, must have had the equivalent of 15 university credits in chemistry, and the ground covered should include satisfactory work in general chemistry and in qualitative and quantitative analysis and elementary organic chemistry. Such students are advised to make selections from the following courses: Chemistry 40, 41, 42b, 43b, 27, 28b, 34a, 36b and 37b, 50a, 15a, and 97a. Courses of a more special nature will not as a rule be accepted for graduate work unless preceded by one of the courses above. Graduate students who are candidates for an advanced degree in chemistry must have had the equivalent of 25 university credits in chemistry, properly distributed.

Graduate students whose major subject is in some department other than chemistry and who intend to take a first minor in chemistry or any branch of chemistry toward the Ph.D. degree must include among the courses taken Chemistry 40 and 41, or must have had the equivalent.

Graduate students who are candidates for the A.M. or M.S. degree in chemistry must include in the courses taken Chemistry 40 and 41, or must have had the equivalent. Graduate students who are candidates for the Ph.D. degree in any branch of chemistry must include among their courses Chemistry 40, 41, 42b and 43b, or must have had the equivalent. Those courses (with the exception of Chemistry 42b) listed under the heading "Advanced Undergraduate and Graduate Courses" may all be counted toward advanced degrees in chemistry.

101b. Inorganic Chemistry.—The less familiar elements and their relationship in the periodic system. (½ unit). (For laboratory work see Chem. 102b.) Twice a week. 8 MW; 303 Chem. Professor HOPKINS.

102b. Inorganic Chemistry.—Inorganic preparations and qualitative analysis of the less familiar elements. (Laboratory work to accompany or follow Chem. 101b.) Arrange. (¼ to ¾ unit).* Professor HOPKINS.

105b. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Once, twice, or three times per week. Seminar, 11 S; 162 Chem. Special topic: Chemistry of non-aqueous solvents. (Dr. Audrieth). 9 MW; 105 Chem. Annex. Professor HOPKINS.

124b. Quantitative Analysis.—A modern survey of advanced principles, calculations, experimental methods and applications. Lectures with or without laboratory. Twice a week. (½ to 1¼ units).* 11 MF; 116 Chem. Associate Professor REEDY.

125b. Analytical Chemistry.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) Once a week. (¼ to 1 unit).* 4 T; 204 Chem. Additional meetings arrange. Professor CLARK.

127b. Modern Application of Radiation to Chemical and Industrial Problems.—(X-rays, radio activity, optical spectroscopy.) (½ to 1 unit).* Twice a week. 10 TT; 217 Chem. Laboratory, arrange; 266 Chem. Professor CLARK.

133b. Organic Chemistry.—(¾ unit). Twice a week. 11 TT; 217 Chem. Professor ADAMS.

134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange. 219 Chem. Professor MARVEL.

135b. Organic Chemistry.—(Seminar). (¼ unit). Once a week. 10 W; 217 Chem. Professor ADAMS.

145b. Physical Chemistry.—(Seminar). (¾ unit). Twice a week. 10-12 S; 176 Chem. Professor RODEBUSH.

150b. Physiological Chemistry.—(¾ unit). Twice a week. 9 TT; 111 Chem. Professor ROSE.

152b. Physiological Chemistry.—(½ to 1 unit).* Chiefly laboratory. Arrange. 463 Chem. Professor ROSE, Assistant Professor DU VIGNEAUD.

155b. Physiological Chemistry.—(Seminar).[1] (¾ unit). Two hours a week. 9-11 F; 456 Chem. Professor ROSE.

160b. Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (¾ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

161b. Chemical Plant Design.—*Prerequisite:* Chem. 61a and 61b. (¾ unit). Twice a week. 9 TT; 162 Chem. Associate Professor KRASE.

186b. Sanitary Chemistry.—(½ to 1¼ units).* Arrange. One to five times a week. 60-B Chem. Professor BUSWELL.

190b. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professors RODEBUSH, CLARK, Associate Professor REEDY.

Inorganic Chemistry.—Professor HOPKINS, Associate Professor REEDY, Dr. AUDRIETH, Dr. BAILAR, Dr. QUILL.

Analytical Chemistry.—Professor CLARK, Associate Professor REEDY, Assistant Professors SMITH, ENGLIS.

Food and Phyto-Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors NOYES, ADAMS, MARVEL, Associate Professors SHRINER, FUSON, Dr. BAILAR.

Sanitary Chemistry.—Professor BUSWELL.

Physiological Chemistry.—Professor ROSE, Assistant Professor DU VIGNEAUD.

Industrial Chemistry.—Professors PARR, KEYES, Associate Professor KRASE.

Ceramic Chemistry.—Professor PARMELEE.

Animal Chemistry (Nutrition).—Professor GRINDLEY.

ENTOMOLOGY

For students entering prior to September, 1929

Major: 20 hours from courses offered in the department, except Entom. 1, 2, and 31.

Minors: 20 hours in not more than three of the following: Zoology, botany, physiology, chemistry, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite. Course 1 or 2 may be followed by any of the other courses for undergraduates or by 20 or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Arts and other students may begin with either 1 or 2. Students preparing for service as economic entomologists should take as many of the courses offered as possible and should consult the head of the department.

For students entering after September 1, 1929

Major: 20 hours exclusive of Entomology 1, 2, 31, and all courses taken during the freshman year. At least five hours must be offered from the advanced group.

Minors: 20 hours, excluding courses taken during the freshman year, in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: Zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite. Course 1 or 2 may be followed by any of the other courses for undergraduates or by 20 or 21 in the senior year. MATHEMATICS

For students entering prior to September, 1929

Major: 20 hours made up from any undergraduate courses offered by the department except Math. 1a, 2, 3, 4, 5, and 8. The courses selected must include Math. 7 and 9, and at least one of the following courses: Math. 10, 16, 18, 20, 21, 30, 40, 90. For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: Math. 1; or first semester, Math. 2 (or 3) and 4; second semester, Math. 6. Sophomore year: first semester, Math. 7 (Section T); second semester, Math. 9 (Section T) and 19.

Minors: 20 hours selected from not more than three of the following subjects: Astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, and surveying. At least 8 hours must be offered in some one subject.

Credit for seniors who take Math. 1a, 1b, 2, 3, 4, 5, 6, or 6a will be reduced one hour.

For students entering after September 1, 1929

Major: 20 hours exclusive of Math. 1a, 1b, 2, 3, 4, 5, 6, 6a, and 8, and all courses taken during the freshman year; inclusive of Math. 7 and 9, and at least one of the following courses: Math. 10, 16, 18, 20, 21, 30, 40, 90, 91.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: Math. 1; or first semester, Math. 2 (or 3) and 4; second semester, Math. 6. Sophomore year: first semester, Math. 7 (Section T); second semester, Math. 9 (Section T) and 19.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: Astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Credit for seniors who take Math. 1a, 1b, 2, 3, 4, 5, 6, or 6a will be reduced one hour.

Courses for Undergraduates

1b. Introduction to College Mathematics.—This course is designed as a two-semester course to give in a unified way an introduction to mathematics, including material from college algebra, trigonometry, analytical geometry, and elementary calculus. A student taking Math. 1a and 1b will not take Math. 2, 3, 4, or 6. *Prerequisite:* Math. 1a. *Note:* Seniors will receive 4 hours' credit only.

98. Thesis.—*Prerequisite:* Senior standing. (3). Time to be arranged.

Courses for Graduates

Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week. Time to be arranged. Associate Professor Goff.

108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week. Time to be arranged. Associate Professor Macintire.

109. Machine Design.—Rational design; the application of mechanics of materials. Individual problems. (1 unit). Twice a week. Time to be arranged. Professor Leutwiler.

112. Laboratory Investigations.—Combustion of fuel, boiler economy; steam engines and turbines; gas engines and producers; explosive mixtures; mechanical refrigeration. Original work. (1½ units). Three times a week. Time to be arranged. Professors Willard, Polson, Kratz, Ham; Associate Professor Macintire.

Courses for Advanced Undergraduates and Graduates

42. Properties of Engineering Materials: Specifications and Inspection.—*Prerequisite:* T. A. M. 1, 3, and 63. (3 credits or ½ unit). Time to be arranged. Professor SEELY.

44. Laboratory Work in Testing Materials.—*Prerequisite:* T. A. M. 1, 3, and 63. (3 credits or ½ to 1 unit).* Time to be arranged. Professor MOORE.

46. Advanced Technical Mechanics.—*Prerequisite:* T. A. M. 1 and 3 or equivalent work in mathematics and physics. (2 credits or ½ unit). Time to be arranged. Professor WESTERGAARD.

Courses for Graduates

102. Resistance of Materials.—(1 unit). Twice a week. Time to be arranged. Professor MOORE.

103. Hydraulics and Hydraulic Engineering.—(½ to 1 unit).* Twice a week. Time to be arranged. Professor ENGER.

104. Experimental Work in the Laboratory of Applied Mechanics.—(½ to 1 unit).* Twice a week. Time to be arranged. Professors ENGER and MOORE.

105. Experimental and Analytical Work in Reinforced Concrete.—(1 to 2 units).* Twice a week. Time to be arranged. Associate Professor RICHART.

106. Theory of Elasticity and Applications to Engineering Problems.—(1 unit). Three times a week. Time to be arranged. Professor WESTERGAARD.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating that they have been accepted.

Service in the bands takes the place of the regular military drill.

2. Freshman Band.—(1). Twice a week. Days and section to be assigned according to proficiency. Director HARDING.

4. Sophomore Band.—(1). See foregoing. Director HARDING.

6. Junior Band.—(1). Twice a week. Days and section to be assigned. Director HARDING.

8. Senior Band.—(1). See foregoing. Director HARDING.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i. e., ½, or 1, or 1½, or 2.

MILITARY SCIENCE

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b." Students who have had training in a senior ROTC unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

PHYSICAL EDUCATION FOR MEN

Note: Freshmen must register in courses numbered 11, 12, 13, 14, 15, 16, and 17.
Sophomores must register in courses numbered 21, 22, 23, 24, 25, 26, and 27.
Students previously enrolled in Individual Gymnastics must continue to take this course until notified otherwise by the University Health Service.
All students excepting those taking Individual Gymnastics must elect a different course each semester.
For information, late registration, and changing sections, call at Room 201, Old Gymnasium.

11. Individual Gymnastics.—(Freshmen who do not pass the health examination are excused from Military and must register in this course.)

PHYSICS

Major: 20 hours from courses offered in the department. At least 5 hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours, exclusive of courses taken during the freshman year, in one or two of the following subjects, with not less than 8 hours in each department if two subjects are chosen: Mathematics, astronomy, chemistry, education.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering. For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry (Math. 4) and chemistry.
Sophomore year: Physics 1a-1b, 3a-3b, or Physics 7a-7b, 8a-8b.
Junior year: Physics 14, 16, 23, 33, 36, 44.
Senior year: Physics 14, 20, 22, 30, 31, 45, 46, 78, 97, 98.

PHYSIOLOGY

For students entering prior to September, 1929

Major: 20 hours from courses offered in the department exclusive of Physiology 1.

Minors: 20 hours in not more than three of the following: Botany, bacteriology, chemistry, entomology, and zoology.

Seniors registered in Physiology 1, 2, 4, 6 will receive one hour less credit.

For students entering after September 1, 1929

Major: 20 hours from courses offered in the department exclusive of Physiology 1, and all courses taken during the freshman year.

Minors: 20 hours, excluding work taken during the freshman year, in not more than two of the following: Botany, bacteriology, chemistry, entomology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Courses for Undergraduates

GENERAL DIRECTIONS FOR REGISTRATION

To Every Student:

You should at once look over the HEADINGS, at least, of ALL the paragraphs, numbered 1-23, which follow. It is certain that one or two of them, and probable that several others, are OF VITAL IMPORTANCE to YOU individually at this time.

1. New Students WITHOUT Permits to Register

A new student *who has not yet secured a permit to register* should proceed at once to the Registrar's Office, 100-A Administration Building, taking with him his credit statements from all former schools attended (high school, academy, normal school, junior college, or college), and make application for a permit.

The foregoing direction applies to all new students without permits except:

(1) Library School Students—see page 64.

(2) Applicants for Admission as "Unclassified Students"—see paragraph 10.

(3) Students Dropped from Other Institutions—see paragraph 8.

2. New Students WITH Permits to Register

A new student *who has already received a permit to register* need not go to the Registrar's Office, but will receive his study-list, together with further detailed instructions, at one of the following points, according to the college or school which his permit entitles him to enter:

College of Liberal Arts and Sciences—at the head of the main staircase, University Hall

College of Commerce and Business Administration—Commerce Building

College of Education, including the Curricula in Athletic Coaching and Industrial Education—Room 104 Administration Building

College of Engineering—Engineering Hall

College of Agriculture, including the Curriculum in Home Economics—New Agricultural Building

College of Fine and Applied Arts (including the School of Music and the departments of Art, Architecture, and Landscape Architecture)—Architecture Building

School of Music—Room 100 Smith Memorial Hall

School of Journalism—Room 101 University Hall

College of Law—Room 301 Law Building

Library School—Room 331 Library Building

Graduate School—Room 109 Administration Building

Students in the Colleges of Liberal Arts and Sciences, Commerce and Business Administration, Education, Engineering, Agriculture, and Fine and Applied Arts, should see the posters on University bulletin boards regarding "Order of Registration."

3. Former Students in Attendance Last Semester

A former student *in attendance the second semester of the year 1930-31,* and in all respects in good standing (see paragraph 5), should call for his study-list at one of the points mentioned in paragraph 2, according to the college or school in which he is enrolled.

Students in the Colleges of Liberal Arts and Sciences, Commerce, Education, Engineering, Agriculture, and Fine and Applied Arts should see the posters on the University bulletin boards regarding "Order of Registration."

4. Former Students Not in Attendance Last Semester

A former student *not in attendance the second semester of the year 1930-31,* but in all respects in good standing (see paragraph 5), must first secure a permit to re-enter, if a man, from the Dean of Men, if a woman, from the Dean of Women, and must then obtain a study-list at the Registrar's Office.

A former student who has withdrawn from the University within the last three weeks of his last term of attendance may register again only with the approval of the dean of his college.

5. Former Students Not in Good Standing

A former student, whether or not in attendance the last semester, *if not in good standing,* either—

(a) Because he has been registered for two years as an *unclassified student* without matriculating; or—

(b) Because he has been *dropped for poor scholarship* or *dismissed on disciplinary grounds*—

may not register except on the recommendation of the dean of his college. Such a student should go first to see the dean or the assistant dean of his college.

6. Students Changing Colleges or Curricula within the University

A student who desires to transfer from one college or school of the University of Illinois to another college or school of the University must (1) secure from the dean or director of the college or school in which he was formerly enrolled a statement of his record therein; (2) secure from the Registrar's Office a statement of his entrance credits; and (3) submit these papers to the dean of the college or the director of the school which he wishes to enter; except that students transferring to the College of Law, the College of Education, or the School of Journalism from one of the undergraduate colleges of the University, need only a permit from the Registrar's Office.

A student who wishes to transfer from the curriculum in which he was last registered to another curriculum *in the same college* must consult the dean or the assistant dean of his college. He must also register the change with the Registrar in order to determine whether or not he is able to meet the requirements for admission.

7. Students with Advanced Standing

A student transferring from another university, a college, a normal school, or a junior college must submit his credits from that institution, or his "Estimate of Advanced Standing," if he has already obtained an "Estimate" from the Registrar, to his adviser when consulting the latter about his curriculum. Then, whether he has already had an "Estimate" made or not, he should call between October 1 and October 15 at the Registrar's Office to file a formal petition for transfer of credits.

8. Students Dropped from Other Institutions

A student who has been dropped from another institution may be admitted to the University of Illinois only on the recommendation of the dean of the college or school of the University which he desires to enter. Such a student must first see the dean or the assistant dean of the college of his choice. If admitted, it will be with the understanding that he shall be on probation.

9. Students Earning Their Way

Students who are earning their way, in whole or in part, during the school year should state that fact to their advisers when registering. Such students should carry light work.

10. Unclassified Students

Persons over twenty-one years of age may be admitted as unclassified students, provided they secure (1) the recommendation of the instructors whose

courses they wish to take, and (2) the approval of the dean of the college in which the course is given. They must give evidence that they possess the requisite information and ability to pursue profitably, as unclassified students, their chosen subjects, and must meet the special requirements of the particular college in which they wish to enroll.

An unclassified student is not matriculated and must pay a tuition fee of $7.50 a semester in addition to the regular incidental fee of $35 a semester for Illinois students, or $62.50 for non-Illinois students.

No one may enroll as an unclassified student for more than two years, except by special permission, application for which must be made through the dean of the college.

An unclassified student in any college desiring to take a course in another college of the University must obtain the approval of the dean of the latter college.

A person desiring admission as an unclassified student must first see the dean or the assistant dean of the college he wishes to enter (see the directory on pages 4 and 5).

11. Permission to Attend Classes as Listeners

Permission to attend classes regularly as listeners only may be given to persons who are not connected with the University on the following conditions:

(a) They must first secure the consent of the instructor concerned and of the dean of the college in which the course is given.

(b) They must pay a fee of $7.50 for each course attended.

No instructor is authorized to admit any such listener to any of his classes except on presentation of a *visitor's card* showing that the foregoing conditions have been complied with.

N.B.—A permit to visit a class does not entitle the person holding the permit to participate in the work of the class; permits to visit classes not administratively assigned to any college or school must be approved by the instructor in charge of the class and by the dean of the college in which the student would most naturally be enrolled as determined by the work offered for entrance credit or, if necessary, by requiring the student to express a preference.

Permission to attend classes regularly as visitors only may be granted without fee to persons in the employ of the University on the recommendation of the head of the department in which the employee is at work, with the consent of the instructor in the course, and with the approval of the dean of the college in which the course is given.

12. Number of Hours[1] Prescribed

Every student must pursue studies aggregating *not fewer than fifteen nor more than eighteen hours,* except in curricula requiring more than such number of hours in any semester; and except further that a student who has received grades of A in not less than one-half of his work for the preceding semester with no grades lower than B may take for the semester studies aggregating not more than twenty hours. A student may be permitted to take more or less than the amount of work prescribed above only by permission of the dean of his college or the director of his school.

A student who cannot devote his entire time to his studies because of illness, or outside work necessary to meet expenses, or for some other good reason, may be required by the dean of his college or the director of his school to take fewer than fifteen hours.

13. Required Subjects Take Precedence

Any required subject in which there is a failure must on the first recurrence of such subject take precedence over all other subjects.

---

[1]Credit is reckoned in "semester hours" or simply "hours." An hour is one class period a week for one semester, each class period presupposing two hours' preparation by the student, or the equivalent in laboratory, shop, or drawing room.

14. Credit Forfeited by Reregistering

By reregistering in a subject for which he has received credit, a student forfeits his credit. When a course is thus repeated the grade given at the end of the repetition becomes the official grade.

15. Candidacy for Graduation

A candidate for graduation must have completed by the beginning of his final semester (or summer session) all studies required for the degree, *except those to be taken in class during that semester (or summer session).*

It is provided, however:

(1) That special examinations to remove failures incurred *during the preceding semester* may be taken at any time before the beginning of the tenth week of a student's final semester; or, if the final period of attendance is a summer session, at any time before the beginning of the fifth week.

(2) That, similarly, substitutions for courses required for the degree may be made as indicated for special examinations in (1) above.

16. Courses with Variable Credit

In registering for a course with variable credit hours (e.g., Animal Husbandry 24, 2-5 hours), a student must put down on his study-list the number of hours for which *he* intends to take the course; e.g., not 2-5, but 2, or 3, or 4, or 5.

17. Military Training and Physical Education for Men

(a) The Requirement in Military

All male students, except those specifically exempted below, must register in Military, and, unless properly excused, must take the full basic course therein, whether they intend to graduate or not. To have any credits received for basic military work count for graduation, the full course (basic) must be taken. The classes of students exempted below may take military work, if they so desire, by registering for it, except that no student who is not a citizen of the United States and no student who holds a Reserve Corps Commission will be permitted to register.

Exemptions:

a. Students over 22 years of age when entering the University.
b. Students entering the University with junior standing.
c. Students who are not citizens of the United States.
d. Students who have had two years of military work in other Senior Units of the R.O.T.C.
e. Students holding Commissions in the Reserve Corps, United States Army.
f. Students holding certificates of eligibility for commission in the Reserve Corps.

A deposit of fifteen dollars ($15) with the Bursar is required before equipment is issued.

For full directions for registration in Military, see under Military in the Description of Courses and Time Table in the colored section of this book.

(b) The Requirement in Physical Education (Men)

All freshman and *sophomore men* take physical education throughout the year. Freshmen must also register for *Hygiene.*

Freshmen who do not pass the health examination will be required to register for *Physical Education 11* (*12* the second semester), five times each week, which gives 1½ hours of credit. Sophomore men with pronounced physical deficiencies should register for *Physical Education 21* (*22* the second semester), which also gives 1½ hours of credit. While enrolled in these courses they will be excused from Military, but when transferred to the regular work in physical education they will be required to make up the work in military science in so far as that may be practicable.

18. Physical Education for Women

Freshman women have Gymnasium Practice three hours a week throughout the year, and lectures on Hygiene throughout both semesters. Directions for registration will be found under the department announcements in the colored section of this bulletin.

19. Late Registration

A late registration fee of five dollars is charged all former students registering later than the registration days.

A student is not registered until his fees are paid. *A student who pays his fees on the first day of instruction or thereafter instead of on the registration days will, therefore, be charged the late registration fee.*

20. Week Old Study-List Invalid

A study-list becomes invalid if not filed at the Bursar's Office within one week after the date of its issue.

21. Changes in Study-Lists

Permission to change study-lists after registration may be obtained only from the dean of the college or the director of the school in which the student is enrolled. No changes can be made on the registration days.

Changes in study-lists should be completed and filed at the Bursar's Office not later than 12 m. on the Monday following registration. After this date a fee of $1 is charged for each change except that the total charge for the rearrangement authorized on any one change slip shall not exceed $2. The Registrar is authorized to waive the fee for change of a study-list in cases where the change is required by a University officer.

22. Fees Payable in Advance

All fees are payable in advance at registration.

A student who is in debt to the University at the end of any semester is not permitted to register in the University again, and is not entitled to receive an official statement of his credits from the Registrar, until his indebtedness has been discharged.

23. Hospital Fund

Every student should, on the registration days, join the Students' Mutual Benefit Hospital Fund. A payment of three dollars insures care in a hospital, without hospital fees, for any period of illness not exceeding four weeks during the semester. Apply at the office of the Dean of Men or of the Dean of Women.

THE COLLEGE OF LIBERAL ARTS AND SCIENCES

I. DIRECTIONS FOR REGISTRATION

1. Study-Lists

(1) Read the General Directions for Registration, pages 6-10.

(2) Obtain your study-list as prescribed in the General Directions.

(3) Read the directions printed on the back of the first coupon of the study-list.

2. Advisers

You will receive with your study-list a room ticket, indicating the number of the room where you will find your class adviser. Do not write anything on your study-list until you have consulted with the adviser. New students must bring with them a permit to register and show it to the adviser. *Be sure to obtain his signature before proceeding further.*

Juniors and seniors in the General Curriculum before consulting the class adviser must obtain from a representative of the department in which they will do their major work a statement of the courses in the major and minor subjects recommended for the coming semester. They should, also, bring with them the summary of their record mailed from the college office during the summer.

Transfer students from other institutions and other colleges of the University must bring with them a transcript of their record or the Registrar's "Estimate of Advanced Standing." They are given credit for all courses which are coordinate with the requirements of the curriculum in which they register.

3. Curricula

The College of Liberal Arts and Sciences offers the following curricula:

(1) The General Curriculum leading to the degree of Bachelor of Arts or Bachelor of Science (see below).

Note: Under this curriculum students may take their major work in home economics, leading to the degree of Bachelor of Arts or Bachelor of Science (see page 17).

(2) The degree of Bachelor of Science in Chemistry or Chemical Engineering (see page 18).

(3) The degree of Bachelor of Science in Applied Optics (see page 19).

(4) Students preparing for law will register in the general curriculum for at least three years.

(5) A two-year curriculum preparatory to medicine, which satisfies the minimum requirements for admission to the College of Medicine of the University. After two years of residence and the fulfilment of specified requirements, that college will grant the degree of Bachelor of Science in Medicine (see page 20).

(6) A two-year curriculum preparatory to dentistry, which satisfies the minimum requirements for admission to the College of Dentistry of the University (see page 21).

(7) A one-year curriculum preparatory to pharmacy which satisfies the minimum requirements for admission to the College of Pharmacy of the University (see page 21).

(8) A two-year curriculum preparatory to journalism which fulfils the requirements for admission to the School of Journalism (see page 21).

II. DIRECTIONS FOR STUDENTS IN THE GENERAL CURRICULUM

1. Freshmen

Freshmen will register under the new requirements, taking all subjects prescribed in Group A, and selecting one subject from each division in Group B.

2. Sophomores

Required subjects each semester: Physical education, military science (for men).

Note: Sophomores will register under the new requirements.

3. Juniors

Juniors will register under the new requirements and are expected to devote approximately half of their time to work on major and minor subjects.

4. Seniors

Seniors may elect to graduate under the new requirements.

Seniors must complete in the first semester all requirements for graduation except those to be taken in class during the second semester.

Note: Most courses in the College of Liberal Arts and Sciences open to freshmen suffer reduced credit when elected by seniors—see Time Table.

Requirements for the A.B. Degree

(Effective for students entering after September 1, 1929)

University Requirements.—Each candidate must meet the general University requirements with respect to registration and residence, and must also secure credit in approved courses amounting to 130 hours, an hour being one class period a week for one semester. Each class period presupposes two hours of preparation by the student, or the equivalent in the laboratory or drawing room.

A. *Prescribed Subjects*

To be commenced in the first semester of the freshman year, except as otherwise provided, and to be continued until the completion of the requirements.

1. Hygiene—1 hour.
2. Physical Education—4 semesters.
3. Military Science (for men)—4 semesters or the equivalent.
4. Rhetoric—2 semesters. This requirement may be satisfied by either of the following methods:
   (I) Passing Rhetoric 1 and 2.
   (II) Passing a proficiency examination[1] equivalent to that of an examination in Rhetoric 2.
5. Foreign Language—A reading knowledge of a foreign language (French, German, Greek, Latin, Spanish, or Italian) equivalent to that obtainable after four semesters of a foreign language when commenced in college. This requirement may be satisfied by either of the following methods:
   (I) Passing French 2b, or a more advanced course;
   German 5 or 6, or a more advanced course;
   Greek 4, or a more advanced course;
   Latin 1a, or a more advanced course;
   Spanish 2b, or a more advanced course;
   Italian 2b, or a more advanced course.
   (II) Passing a proficiency examination[1] equivalent to the final examination in any of the courses mentioned in 5 (I).

B. *To be taken prior to the senior year.*

1. *Liberal Arts*—English literature, foreign literature (based on the first two years of college work in the language chosen, or its equivalent), economics, history, political science, philosophy, and sociology: a total

[1]*Note on Proficiency Examinations.* Proficiency examinations in rhetoric and foreign languages will be offered before the end of the second week in each semester. Students expecting to take these examinations will register for the courses in these subjects indicated by their previous preparation, and apply to the departments concerned for examination. If such examinations are passed, students will apply to the Office of the Dean to be transferred to other courses, as they are permitted to do by present regulations. No University credit hours will be earned by passing such proficiency examinations, but the successful applicants will be excused from taking the parallel courses, thereby increasing the number of free electives which they may offer for graduation.

of 15 hours chosen from at least three departments, including one course in English or foreign literature, or in the history of philosophy.

2. *Science*—Astronomy, bacteriology, botany, chemistry, geography, geology, entomology, mathematics, physiology, physics, psychology, and zoology: a total of 15 hours chosen from at least three departments, including one course with a minimum of four hours' laboratory work per week.

In any curriculum in which fewer than 15 hours of laboratory science are required a student who enters without at least one unit of laboratory science shall be required to substitute 5 hours of laboratory science for 5 hours of free electives in the requirements for graduation.

C. *To be taken after the freshman year.*

1. In the major subject as defined by departments with the approval of the faculty, 20 hours. See page 17.
2. In the minor subjects, 20 hours in one or two departments designated by the department in which the major subject is pursued, and approved by the faculty, with not less than 8 hours in each department, if two subjects are chosen.
3. Thirty hours of the work taken in the junior and senior years must be in courses not open ordinarily to freshmen or sophomores.

D. *Electives.*

1. All courses offered by the departments of this college except those exclusively for students in other colleges.
2. Not more than 36 hours' credit toward graduation will be given for courses offered in other colleges and schools of this University, aside from the first year's work in the College of Medicine, and courses acceptable for major and minor credits. Such courses must be selected from the following list approved by the Faculty:

Accountancy

1a or 1e (Principles of Accounting)
1b (Accounting Procedure)

Agronomy

For students majoring in Botany or Entomology:
7 (Advanced Crop Production)
8 (Forage Crops)
11 (Soil Biology)
25 (Crop Production)
28 (Soils)

Animal Husbandry

For students majoring in Entomology:
34 (Anatomy and Physiology, and Non-Contagious and Parasitic Diseases of Farm Animals)
35 (Animal Hygiene; Sanitation; Contagious Diseases of Farm Animals)

Architecture

11, 12 (History of Architecture)
71, 72 (Architectural Drawing)

Art

20 hours excluding courses for teachers; at least one-half of the total hours offered shall be in the theory or history of art.

Business Organization and Operation

2 (Marketing Organization)
9 (Trade and Commercial Organizations)
10 (Newspaper Advertising)
11 (Survey Course)

Business Law

1a, 1b (General law—no credit given to students in the combined arts-law curriculum)
2 (Elementary Law of Business)

Civil Engineering

27, 28, 34 (Surveying)

Dairy Husbandry

For students majoring in Bacteriology:
10 (Advanced Dairy Bacteriology)

Drawing, General Engineering

1 (Elements of Drafting)
2 (Descriptive Geometry)

Economics

All courses

Education

All courses in General Education except those listed also under Educational Practice, Agricultural Education, Athletic Coaching, Home Economics Education, or Industrial Education.

Electrical Engineering

2 (Elementary Electrical Engineering)
For students majoring in Physics:
25 (Direct Current Apparatus)
26 (Alternating Currents)
75, 76 (Electrical Engineering Laboratory)

Farm Mechanics

For students majoring in Home Economics:
12 (Farm Home Equipment)

Graduate

A student who has earned at least 125 semester hours may be permitted to elect courses in the Graduate School with the consent of the Dean of the Graduate School. Such a student must register both in the College of Liberal Arts and Sciences and the Graduate School.

Home Economics

All courses except those in Practice Teaching

Horticulture

For students majoring in Botany or Entomology:
1a, 1b (Elements of Horticulture)
2 (Small Fruit Culture)
3 (Commercial Vegetable Gardening)
5 (Plant Propagation)
6 (Nursery Methods)
7 (Spraying)
19 (Amateur Floriculture)
31 (Garden Flowers)

Journalism

3 (The Newspaper and the News)
5, 6 (Reporting)
9a, 9b (Printing and Publishing)
17 (History and Principles of Journalism)

Attention is called to the announcement of the School of Journalism on page 62.

Landscape Architecture

11 (History of Landscape Architecture)
71, 72 (City Planning)
64 (Landscape Architecture)

Law

A student of senior standing with an average grade of C (3.) who has been in residence either the first two years or the last year of his pre-legal work may take and count toward the A.B. degree not to exceed 36 hours in the College of Law, provided that not less than two courses amounting to at least 5 hours are taken per semester under the advice of the Dean of the College of Law as to the courses to be taken, and provided further that if any such student desires to take more than 6 hours of law work he must also register in the College of Law.

Attention is called to the announcement of the College of Law, page 60.

Library

2a, 2b, or 12 (Reference)
3a and 38 (Book Selection)
9 (History of Books and Printing)

Attention is called to the announcement of the Library School, page 64.

Mechanical Engineering

For students majoring in Physics:
10, 13 (Thermodynamics)

Mechanics, Theoretical and Applied

All Courses.

Medicine

Students who have spent three years in residence, earning not less than 94 semester hours in the College of Liberal Arts and Sciences, are permitted, at the end of their first year in a Class A college of medicine, to transfer credits in the medical sciences to complete the requirements for graduation from this college and to receive the degree of Bachelor of Arts.

Attention is called to the pre-medical curriculum, page 20.

Military Science and Tactics

Maximum: 10 hours

Mining Engineering

For students majoring in Geology:
21 (Mining Examination and Valuation)
61 (Elementary Mine Surveying—No credit in addition to C.E. 27)

Music

Maximum: 20 hours
1, 2 (History of Music)
3, 4, 5, 6 (Harmony)
7, 8 (Counterpoint)
9, 10 (Analysis and Form)
11, 12 (Advanced Composition)
13, 14 (Music Appreciation)
32, 33 (Advanced History of Music)

Credit to an extent of four hours is allowed for applied music (piano, voice, etc.) after Music 3 and 4 (Harmony) have been taken and on the recommendation of the Director. For every additional hour of applied music the student must elect a similar number of hours of theoretical music from the courses mentioned above.

No credit will be allowed for courses in Public School Music.

Physical Education and Hygiene

Maximum:

For men, 6 hours

For women, 9 hours

No credit is allowed for courses in educational practice.

Physics

All courses

Transportation

For students majoring in Economics or Geography:

1 (Economics of Transportation)

E. The degree of Bachelor of Science will be granted in lieu of the degree of Bachelor of Arts to students whose major is in mathematics, a science, or home economics, upon petition to the Dean not later than six weeks preceding the granting of the degree.

Requirements for the A.B. Degree

(For students who entered before September 1, 1929)

A. *Prescribed Subjects.*—Rhetoric 1-2; Physical Education through the first and second year, and Hygiene 1 and 3 for men; Physical Education 7a-7b, 8a-8b, and Hygiene 2 for women; Military Science (4 hours) for men.

B. *Group Requirements.*—Students are expected to complete the group requirements within the first 60 hours of work. Every candidate must offer the minimum of work specified in each of the following groups:

I. *English.*—The offering in this group must include at least one semester course in literature.

II. *Foreign Language and Literature* (exclusive of courses in English translation).

If a student has offered but two units of a foreign language for entrance to the University, he must pursue the study of foreign language through two one-year courses or the equivalent. If he has offered for entrance three or more units of foreign language, he must continue the study of foreign language through one year of his college course.

Note: Candidates for the degree who have not offered Greek or Latin or French or German for entrance *must offer one of these languages for graduation.*

III. *History, Political and Social Science.*—History, economics, political science, sociology: 8 hours.

IV. *Mathematics and Physical Science.*—Mathematics, astronomy (courses with college mathematics as prerequisites), physics, chemistry: at least 5 hours.

Note: Every candidate for the degree of A.B. shall offer a minimum total of 15 semester hours in Groups IV and V combined with a minimum of 5 semester hours in each. Not less than four laboratory hours a week for one semester, or the equivalent, shall be offered in *some one department.*

In any curriculum in which fewer than 15 hours of laboratory science are required a student who enters without at least one unit of laboratory science shall be required to substitute 5 hours of laboratory science for 5 hours of free electives in the requirements for graduation.

V. Botany, bacteriology, entomology, geology, geography, physiology, zoology: at least 5 hours. See note under IV.

VI. Education, philosophy, psychology: 6 hours, of which 3 shall be in philosophy or psychology.

C. *Major Subjects.*—Each candidate must select some one subject as his major. A major consists of courses amounting to at least 20 hours chosen from among those designated by a department and approved by the faculty of the college. Such courses are to be exclusive of those elementary or beginning courses which are open to freshmen and inclusive of *some distinctly advanced work.* At least five hours of the work accepted for a major must have been *done in residence at this University* and be included within the maximum credits allowed in any one division.

The subjects at present recognized as majors in this college are: bacteriology, botany, chemistry, classics, economics, English, entomology, French, geography, geology, German, Greek, history, home economics, Latin, mathematics, philosophy, physics, physiology, political science, psychology, public speaking, sociology, Spanish, zoology.

D. *Minor Subjects.*—Each candidate must offer, in addition to his major, a minor of 20 hours in one or more allied subjects designated by the major department and approved by the faculty of the college. *At least 8 hours must be offered in one subject.*

E. *Elective Subjects.*—

1. Not more than 40 hours in any one subject may be counted for graduation, except: (a) in special courses approved by the faculty of the college; (b) when a student is writing a thesis, he may count, in addition to the 40 hours, the hours of the course in which he does his thesis work; (c) in the department of English a student may take 40 hours in addition to Rhetoric 1-2, Public Speaking, and the linguistic courses in Scandinavian.

   Note: The total credit in Art and Design is limited to 20 hours.

2. In order to secure any credit in a beginning course in a foreign language, a full year's work must be completed.

Courses in Other Colleges Approved for A.B. Degree

3. A limited amount of credit toward the A.B. degree is ordinarily given for courses offered in other colleges and schools of this University (see list on page 13).

F. *Bachelor's Theses.*—A bachelor's thesis is not generally required in this college. Students of high standing are, however, encouraged to write theses in connection with their major studies. Credit toward the degree is given for thesis work only as a part of the work in a Thesis or Honors course.

G. *Optional Degree of Bachelor of Science.*—Students who do their major work in one of the subjects in Group IV or Group V, or in home economics, and who have credit for 60 semester hours or more in these groups or in home economics, on petition to and on the recommendation of the faculty of this college, may be graduated with the degree of B.S. instead of A.B. Such a petition must be presented not later than 10 days after the opening of the last semester or summer session preceding the granting of the degree.

III. DIRECTIONS FOR STUDENTS WHOSE MAJOR IS IN HOME ECONOMICS

Students planning to do their major work in home economics should note that certain prerequisite courses must be taken during the first two years. They will be assigned to advisers in the Home Economics Department in the rooms indicated on their room tickets.

Students who hold scholarships in home economics must make this subject their major and take each semester at least four hours in home economics or in subjects required for admission to courses in home economics.

IV. DIRECTIONS FOR STUDENTS IN CHEMISTRY AND CHEMICAL ENGINEERING

Students who follow the general curriculum in the College of Liberal Arts and Sciences with Chemistry as a major subject are eligible for the degree of Bachelor of Arts. They should follow the directions given on page 12 or 16.

For the more specialized training of the chemist, the following curricula have been arranged. Each requires a maximum total of 136 hours and leads to the degree of Bachelor of Science.

The schedules for the first and second years in chemistry and chemical engineering are the same.

Preliminary preparation in German or French equivalent to 2 years of high-school work is advised. The total language requirement for graduation including courses offered for entrance must be equivalent to 2 years of University work in German or French. When a student does not offer German or French for entrance the second year of the language required for graduation will be accepted in partial fulfilment of the non-chemical electives in either curriculum. Students entering under this arrangement should take the second year of language during the sophomore year and will not be admitted to senior standing until the requirement has been satisfied.

Students registering in either curriculum must offer 1 unit of high-school chemistry and ½ unit of advanced algebra for admission. University credit in Chemistry 1 (five hours) is acceptable in lieu of Chemistry 2 and one unit of entrance chemistry, Mathematics 3 (five hours) in lieu of one-half unit of advanced algebra and Mathematics 2.

Of the electives at least eleven hours should be from advanced courses in chemistry.

Curriculum in Chemical Engineering, Third and Fourth Years

The work of the technical chemist or superintendent is frequently so closely associated with mechanical and other engineering lines as to make a knowledge of these subjects essential. To meet these conditions, the following third and fourth years of the curriculum in chemistry and related engineering subjects have been arranged. The degree given is that of Bachelor of Science in Chemical Engineering.

THIRD YEAR

It is suggested that students take the elective courses outside of chemistry.

V. DIRECTIONS FOR STUDENTS IN APPLIED OPTICS

Students who wish to prepare themselves to pass the examination prescribed by the Illinois Optometry Act of April 19, 1919, which regulates the practice of optometry within the state, must meet the requirements for the degree of Bachelor of Arts or Bachelor of Science, taking their major work in the Department of Physics. For students preparing for the design of optical instruments, sometimes called "optical engineering," a special curriculum leading to the degree of Bachelor of Science may be arranged.

VI. DIRECTIONS FOR STUDENTS PREPARING FOR LAW

The College of Law admits only graduates, and students of senior standing who are permitted to elect courses in Law. See page 60.

[1]Semester hours. For definition, see page 75.

[2]Ten hours of thesis credit are required for graduation in chemistry and five hours for graduation in chemical engineering, subject to a provision that in special cases a partial substitution of chemical electives may be granted on recommendation of the department. In no case may the total thesis credit in either curriculum be reduced below a minimum of five hours.

VII. DIRECTIONS FOR STUDENTS PREPARING FOR MEDICINE

The College of Liberal Arts and Sciences offers the following two-year curriculum which satisfies the requirements for entrance to the College of Medicine of the University. Two units of Latin, Greek, French, or German are required for entrance to this curriculum. Those lacking in this requirement will register in the General Curriculum and commence the study of one of these languages instead of zoology.

Students who have earned 94 semester hours in the College of Liberal Arts and Sciences are permitted, at the end of their first year in the College of Medicine, to transfer credits in the medical sciences to complete the requirements for graduation of the College of Liberal Arts and Sciences (see page 15), and receive the degree of Bachelor of Arts. In transferring the credits of the first year in the College of Medicine, the following semester hour credits are allowed:

Anatomy	10
Histology	5
Embryology, Human	2½
Neurology	2½
Physiological Chemistry	5
Physiology	5
	30
General Elective Credit	6*
Total	36

Each applicant, whether from the University of Illinois, or from other institutions of recognized standing, must have attained *in his premedical work a scholastic average of not less than 3.5,* or its equivalent as determined by the University of Illinois for institutions using a different grading system. Grades received in military science, physical education, and hygiene will not be considered in determining this average.

*When the student has completed satisfactorily the full program of the first year in Medicine, he will be allowed up to a maximum of six semester hours of general elective credit, in addition to subject credit as indicated above.

[1]Semester hours. For definition, see page 75.

[2]Students who plan to take physiological chemistry (Chemistry 50a) at Urbana during the third year must secure credit for Chemistry 22 during the second year. This may be accomplished by substituting Chemistry 22 for Zoology 3, which may then be taken during the third year. These students must secure five hours of subject credit in elective courses during the first year at the College of Medicine.

[3]Psychology is especially recommended.

VIII. DIRECTIONS FOR STUDENTS PREPARING FOR DENTISTRY

Students preparing for Dentistry are advised to follow the curriculum suggested for premedical students, which satisfies the requirements for entrance to the College of Dentistry of the University.

IX. DIRECTIONS FOR STUDENTS PREPARING FOR PHARMACY

Students preparing for Pharmacy should follow the one-year curriculum described below which constitutes the first year of the course in Pharmacy. The following three years are given in the College of Pharmacy of the University at Chicago.

Curriculum in Pharmacy

X. DIRECTIONS FOR STUDENTS PREPARING FOR JOURNALISM

The following two-year journalism curriculum covers entrance requirements of the School of Journalism of the University and includes specific courses of special value to students of journalism. It is recommended that, where possible, students choose additional electives from the departments of: economics, political science, history, literature, philosophy, psychology, and art.

See also the announcement of the School of Journalism, page 62.

THE COLLEGE OF COMMERCE AND BUSINESS ADMINISTRATION

DIRECTIONS FOR REGISTRATION

1. Commerce students should read the headings of the paragraphs numbered 1-23 of the General Directions for Registration on pages 6-10 of this Announcement and follow those which apply to them.

2. *Freshmen* who have received a permit to register will obtain their study-lists at the table in the lobby on the first floor of the Commerce Building.

3. *Freshmen* who have not received a permit to register should report at the Registrar's Office, 100-A Administration Building.

4. *Former Commerce students* who were in attendance the second semester of 1930-31 and are in good standing will obtain their study-lists at the table in the lobby on the first floor of the Commerce Building.

5. Students not in attendance last semester, not in good standing, transferring from other colleges within the University, etc., should follow the general directions referred to in paragraph 1 above.

6. Having secured his study-list, the student should follow, *point by point,* the directions on the first coupon. Assignment of Commerce students to *registration advisers* will be made in the lobby of the Commerce Building.

7. Each student must secure the approval of his Registration Officer for the studies he has chosen. *This approval must be stamped on the study-list.* Each student must then report first to the Library to secure approval of sections in sectional courses, and afterwards to the Auditorium to make out class cards, and to pay fees.

REQUIREMENTS FOR GRADUATION

Students who complete a curriculum in the College of Commerce and Business Administration are awarded the degree of Bachelor of Science. The requirements for graduation are as follows:

1. *University Requirements.* A candidate must comply with the University requirements as to residence and registration, and secure credit amounting to 130 hours, including credit in the following subjects prescribed by general University regulations for all students: *Rhetoric 1-2,* 6 hours for both men and women; *Physical Education* and *Hygiene 1* and *3,* 3 hours for men; *Physical Education* and *Hygiene 2,* 5 hours for women; and *Military Science,* 4 semesters, 4 hours for men. Men who elect the Reserve Officers' Training Corps must also take *Military Science,* 4 additional semesters, 6 hours.

2. *Prescribed Subjects.* A candidate must also secure credit in the other subjects listed as *prescribed* in his chosen curriculum.

(*Note:* If a prescribed course is not offered or is unavailable for other reasons, arrangements must be made with the dean of the college for acceptable substitutes.)

3. *Language Group.* Of the electives allowed, in all curricula, at least 8 hours must be either in English literature or in a foreign language, but prescribed courses in either of these subjects may be counted in meeting this requirement. *To secure any credit in a beginning course in any foreign language, a full year's work must be completed.*

4. *Social Science Group.* Twelve hours of the electives allowed must be chosen from the following group of subjects: *history, political science, philosophy, psychology,* and *sociology,* provided that *not fewer than six hours in any one subject may be counted in fulfilling this requirement;* but prescribed courses in any of these subjects may be counted in meeting the requirement.

This requirement (4) applies to Curricula in:

General Business
Banking and Finance
Insurance
Accountancy
General Railway Administration
Commerce and Law
Trade and Civic Secretarial Service

This requirement (4) does *not* apply to Curricula in:

Railway Transportation
Commercial Teaching
Foreign Commerce
Industrial Administration
Public Utilities

5. *Science Group.* In all curricula *ten hours* of the electives allowed must be chosen from the following groups of subjects: *chemistry, mathematics* (except Math. 22 and 23), and *physics,* provided that *not fewer than 5 hours* in any *one subject may be counted in fulfilling this requirement;* but prescribed courses in any of these subjects may be counted.

6. *Free Electives Group.* Free electives sufficient to make the 130 hours required for graduation may be selected from any department in the College of Commerce, the College of Liberal Arts and Sciences, or the Library School. *All other electives must have the approval of the dean of the college at the time of registration.*

7. *Laboratory Science.* In any curriculum in which fewer than fifteen hours of laboratory science are required, a student who enters without at least one unit of laboratory science shall be required to substitute five hours of a laboratory science for five hours of free electives in the requirements for graduation.

THE CURRICULA

The curricula in Commerce and Business Administration are: general business, trade and civic secretarial service, banking and finance, insurance, accountancy, general railway administration, railway transportation, commercial teaching, foreign commerce, industrial administration, public utilities, and commerce and law. The subjects prescribed for graduation in each curriculum are listed in the following outlines. These subjects are in general arranged in sequence and should be taken in the order given.

Prerequisites are indicated in parentheses.

In addition to the prescribed subjects sufficient electives must be taken each semester to make up a minimum of 15 hours, but not to exceed a maximum of 18 hours of work. In choosing electives the attention of students is called to provisions 3, 4, and 5 of the above statement of the requirements for graduation. It is required that a sufficient number of hours from the subjects enumerated in groups 3 and 5 above be taken during each semester of the first two years to make up, together with the prescribed subjects, a schedule of not fewer than 15 hours. Attention is called to the fact that some elementary courses carry only part credit for seniors.

Curriculum in Industrial Administration

The following curriculum is intended to meet the needs of commerce students planning to enter the administrative or selling departments of industrial plants. To the usual courses in economics, accounting, etc., are added certain groups of technical courses offered by other colleges of the University. Four such groups have been arranged, as follows: Group A, for those interested in the machine industries; Group B, the electrical industries; Group C, the building trades; Group D, the chemical industries. The student who elects one of these groups must take all the courses listed in the chosen group. The student electing the chemical industries group is required to take *Economics 27* and *Economics 22* instead of *General Engineering Drawing 1* and *2* in the first year; and *Chemistry 1* or *2* and *Chemistry 6* instead of *Theoretical and Applied Mechanics 1* and *Rhetoric 10 in the second year; Rhetoric 10* is deferred until the third year; *he should see the assistant dean of the college to plan his program for each of the eight semesters.*

One year of foreign language or English literature must be included among the electives. For Group D, German is desirable.

Curriculum in Commerce and Law

(A six-year combined curriculum.)

The following curriculum is provided for students who wish to combine commercial and legal studies and secure both the degree of Bachelor of Science and the degree of Bachelor of Laws or Doctor of Law in six years. Students who elect this curriculum must meet all the requirements for graduation from the College of Commerce and Business Administration, but in exercising their privileges of election are urged to select as many hours as possible from the following subjects: *Hist. 2a-2b,* English History (6); *Econ. 25,* Economic History of England (3); *Hist. 3a-3b,* United States History (6); *Hist. 44a-44b,* English Constitutional History (6); *Pol. Sci. 1,* American Government (3); and *Pol. Sci. 3,* State and Local Government (3). Students expecting to study law should devote at least 12 hours to work in history and political science. A course in English history is regarded as one of the most essential pre-legal subjects. The law courses in the curriculum may be taken only in the fourth year, and are counted for 30 hours' credit towards the degree, instead of hour for hour, provided the full year's work is completed. In their fourth year students will be regularly registered in the College of Law, and *must file copies of their study-lists in the office of the Dean of the College of Commerce and Business Administration at the beginning of each semester.*

THE COLLEGE OF ENGINEERING

Engineering students should read the General Directions for Registration given in paragraphs 1-23 on pages 6-10. They should report for registration to Engineering Hall, where further special directions will be furnished them.

GENERAL ENGINEERING LECTURES FOR FRESHMEN

A general lecture sufficiently popular in character to interest and inspire young students will be given at 10 a.m. on Wednesday of each week in the Auditorium. All freshman students in engineering are required to attend this lecture.

TRIPS OF INSPECTION

An inspection trip is one of the regular requirements in the senior year of the curricula leading to the degree of Bachelor of Science in ceramics and ceramic engineering, civil engineering, electrical engineering, gas engineering, general engineering, mechanical engineering, mining engineering, and railway engineering.

The time required is three or four days, and the plants visited are usually in Chicago or Milwaukee. The trips are taken during term time under the supervision of the University authorities. The expense to each student varies from $25 to $35.

ELECTIVES AND OPTIONS

Non-technical electives.—The non-technical electives for students in the College of Engineering are subject to the following restrictions:

1. They are restricted to courses offered in the College of Liberal Arts and Sciences, the College of Commerce, courses 1 to 16 in the School of Music, Horticulture 37a and 37b, Architecture 11 and 12, and courses in Education, Group A, in the College of Education.
2. Such courses must not be open to freshman students except in the cases of Library Science 12, Mathematics 5, History 1a and 1b, 2a and 2b, Geography 1, Geology 1, Botany 1, and Zoology 1.
3. Students in the College of Engineering electing the third and fourth years' work in the Reserve Officers' Training Corps may substitute the credit thus received for the required non-technical electives.

Technical electives.—Any course in the College of Engineering not prescribed in the curriculum in which the student is registered, excepting only G. E. D. 1 and 2, and including such courses in other colleges as may from time to time be designated as "technical" for certain departments of the College of Engineering.

Approved electives.—Any non-technical or technical electives.

Technical Options.—Courses of a technical character designated by a department as "technical options" in its curricula.

REQUIREMENTS IN RHETORIC

Rhetoric 1 and 2 are prerequisites for junior standing in the College of Engineering, and no student in this College shall be permitted to register in more than eight hours of prescribed junior work without having passed or being registered in Rhetoric 1 or 2.

Any student whose written work shows that he is unable to use good English shall be reported by his instructor to a standing committee which has authority to direct the student to take as a prerequisite for graduation such additional instruction in rhetoric as it may prescribe.

REQUIREMENTS IN FOREIGN LANGUAGE

In curricula where the language requirement is specifically designated, as French or German, any student who has completed in high school one or more years of French or German and has had the same accredited to him as entrance credits by the Registrar, may be excused from language requirements specified in his curriculum to the extent that one year's high-school work shall be considered the equivalent of a semester's work in college, and he may select in lieu thereof any course falling under the designation of non-technical electives in the College of Engineering or technical electives and options outside the required courses in his curriculum. No fractional unit of high-school work may be considered in the application of this regulation. The full equivalent of the eight-hour (twelve in General Engineering) requirement in a single language must be obtained by each student in the fulfillment of graduation requirements in any curriculum where language is specified or in any curriculum in which the student elects to take foreign language.

CURRICULA IN ENGINEERING

Since the curricula in Ceramic, Civil, Electrical, Gas, General, Mechanical, Mining, Railway Engineering, and in Engineering Physics, are identical during the first year, the schedule of courses is printed but once, under Civil Engineering.

CURRICULA IN ARCHITECTURE AND ARCHITECTURAL ENGINEERING

Students who entered the curriculum in Architecture or Architectural Engineering prior to June 1, 1930, or who entered with sophomore standing or above in 1930-31, will finish the curricula as printed at the time of their admission.

Curriculum in General Engineering

This curriculum is intended for students who do not wish to pursue the more specialized engineering curricula, but who wish to secure training in engineering principles and their application. Fifteen hours of work in Economics, Corporations, Business Law, etc., are required and sixteen hours of free electives are allowed. The degree of Bachelor of Science in General Engineering is awarded on completion of the curriculum.

THE COLLEGE OF AGRICULTURE

DIRECTIONS FOR REGISTRATION

Read the first paragraph of the General Directions for Registration on page 6 and follow carefully the instructions given therein.

Obtain your study-list: (1) if you already have a permit to register, at room 105 New Agricultural Building, Home Economics students at Home Economics Department, Woman's Building; (2) if you have not yet secured a permit to register, go to the Registrar's Office, 100-A Administration Building; (3) follow *point by point* the directions on the first coupon on the study-list.

Students will secure their own study-lists and proceed to their advisers' rooms.

Advisers

Freshmen.....221 New Agricultural Building
Sophomores and Juniors....Reading Room, Library, New Agricultural Building
Seniors.....214 New Agricultural Building
Unclassified.....Go to room according to class
Home Economics.....113 Woman's Building
Floriculture.....Reading Room, Library, New Agricultural Building

Sectional Courses

Sectional courses will be checked in 200 New Agricultural Building. These include chemistry, rhetoric, English, botany, bacteriology, economics, entomology, geology, and physical education.

Registrar's Checking Clerks

Registrar's checking clerks, also clerks for assignment of fees, issue of class cards, and new study-lists, will be found in the lobby of the Library.

Studies for Freshmen

The schedules of courses for freshmen will be made out and distributed to advisers in 221 New Agricultural Building.

Transfer Students

Committee on excess hours and transfers will be in 104 New Agricultural Building.

REQUIREMENTS FOR GRADUATION

Students who have satisfied the University requirements as to registration, residence, and diploma fee, and who have maintained throughout their course a satisfactory record of scholarship and moral character, will, on completion of the studies of the prescribed list and sufficient electives to make a total of 130 semester hours, be graduated with the degree of Bachelor of Science.

A thesis is not required for graduation, but any student who has completed not fewer than 90 hours of credit may elect a thesis course in any department, provided that he has done at least 20 hours' work in courses pertinent to the thesis problem, subject to the approval of the head of the department.

Graduates of approved colleges may secure a degree in agriculture from the University on completion of the technical and scientific requirements. This will ordinarily require two years of residence work; a minimum of one year is required.

Not more than five semester hours of physical education and hygiene are accepted toward graduation for men, nor more than seven for women.

Curriculum in Agriculture

Required for the Degree of Bachelor of Science in Agriculture

All students except those in the special curricula in home economics and floriculture are required to take the same work during the freshman year and part of the sophomore, junior, and senior years. This work gives the student a conception of farm practices and an insight into the technical branches of agriculture, such as animal and dairy husbandry, horticulture, farm crops, soils, farm mechanics, and buildings, and leaves a large part of the junior and senior years open for elective studies.

One hundred thirty semester hours are required for graduation, as follows:

Philosophy 1 or 2	3
Public Speaking 1	3
Rhetoric 10	2
Sociology 1	3

[1]Semester hours. For definition, see page 75.

[2]Students may choose Dairy Husbandry 24a, Production, or Dairy Husbandry 24b, Manufacturing.

[3]Students specializing in agricultural economics should take Econ. 1.

[4]Provided that in those subjects in which a course or courses are prescribed in Agriculture, work taken to fulfill the requirements in Groups B and C must be in courses other than those open only to freshmen.

Those students expecting to take graduate work in agriculture should make their selection of electives primarily with this purpose in view. It should be realized that the prescribed courses in the general curriculum in agriculture will not afford an adequate training for major work in any department of the college in the Graduate School. For adequate undergraduate preparation in his chosen field of major study the student should elect advanced courses in this and in related fields under the guidance of the department within which his major is to be taken, and he should also make a judicious selection of non-agricultural courses in order to afford a broad scientific and cultural foundation for his specialized training.

A thorough training in the general principles of biology is highly desirable in all fields of agriculture and essential in most, the nature of the proposed major field determining whether this training will be pursued mainly along botanical or zoological lines. For specialization in farm organization and management and in other phases of agricultural economics, economics rather than biology is the basic science.

An introductory course in physics is necessary to a well-balanced knowledge of the natural sciences and will prove of value for advanced study in all lines of technical agriculture, while in some lines it is an essential prerequisite.

Mathematics, including college algebra, trigonometry, analytical geometry, and the calculus has a wide field of usefulness, particularly in preparing the prospective research student for a thorough understanding of statistical methods, essential to the interpretation of experimental data.

A reading knowledge of some of the foreign languages, particularly German and French, is essential to a study of the original contributions to any major field of graduate study. The prospective graduate student would do well to elect a year's work in either German or French.

The advisability of choosing other non-agricultural courses, such as those in advanced economics, accountancy, quantitative chemical analysis, physical chemistry, physiological chemistry, education, bacteriology, physiology, and entomology, will depend upon the nature of his proposed major and minors in the Graduate School.

Curriculum in Floriculture

Required for the Degree of Bachelor of Science in Floriculture

The object of the floriculture curriculum is to fit men and women for the profession of floriculture. The laboratory exercises in the technical subjects consist of practical work in the greenhouses and gardens and give the students a working knowledge of the best methods now in use.

Of the 130 semester hours required for graduation, 107½-109½ are provided for in the prescribed list. The other 20½-22½ hours of credit necessary for graduation are electives.

Students registered in floriculture will be required to make at least one inspection trip before graduation. The annual trip costs about $25.

HOME ECONOMICS

Students who hold scholarships in home economics must take each semester at least four hours in home economics or in subjects required for admission to courses in home economics.

To satisfy the requirements for graduation, students transferring home economics credits from other institutions must take five hours in residence from the following: Home Economics 20, 28, 31, 33, 39a, 39b, 41, 43a, 43b, 47, 48, 50, 51, 55.

One hundred thirty credit hours are required for graduation.

Students may choose the general curriculum in home economics or the curriculum in nutrition and dietetics as suggested below.

THE COLLEGE OF EDUCATION

DIRECTIONS FOR REGISTRATION

Read the General Directions for Registration beginning on page 6 and follow carefully the instructions given therein.

Obtain your study-list: (1) if you already have a permit to register, in the College of Education, in Room 104 Administration; (2) if you have not yet secured a permit to register in the College of Education, at the Registrar's Office, 100-A Administration. Students with junior standing in one of the undergraduate colleges who wish to transfer to the College of Education as candidates for the degree of Bachelor of Science in Education should follow the procedure outlined in paragraph 6 on page 7.

Advisers

For candidates for the degree of Bachelor of Science in Education—Dean Benner, College of Education, 104 Administration.

For students in the Curriculum in Agricultural Education—Professor Nolan, 116 Agricultural Building.

For students in the Curriculum in Industrial Education—Professor Mays, 310 Administration.

For students in the Curriculum in Home Economics Education—Miss Robinson, 105 Woman's Building.

For students in the Curriculum in Physical Education—Director Huff, 210 Men's New Gymnasium.

For students in the Curriculum in Music Education—Director Stiven, 100 Smith Memorial Hall.

Sectional Courses

Students in the College of Education will have their sections approved in the Library, to which they should proceed after securing their adviser's signature on Coupon 2 of the study-list.

Class cards may be obtained at the loan desk in the Library.

Registrar's Checking Clerks

Having secured approval of their sections, students in education should go to the Lobby of the Auditorium, where they will find the Registrar's checking clerks and fee clerks representing the Business Office.

REQUIREMENTS FOR ADMISSION

In general, a student must complete two years (60 hours exclusive of military) of a curriculum in the College of Agriculture, Commerce and Business Administration, Engineering, or Liberal Arts and Sciences, or the School of Music before being admitted to the College of Education. The exceptions to this are Athletic Coaching and Physical Education, and Industrial Education. To the former, admission is granted on admission to the University and the passing of a medical and physical examination; to the latter admission is granted on admission to the University.

Juniors entering the College of Education through the College of Liberal Arts and Sciences should have completed the prescribed subjects and the first five group requirements for the degree of Bachelor of Arts. (See pages 12, 16.

Juniors entering through the other colleges should select some curriculum in the college chosen, and complete the first two years.

Juniors entering from other institutions must present 60 hours of a curriculum pursued in that institution.

Students who enter with more than 60 hours of credit will be given advanced standing in the College of Education to the amount which the credit in excess of 60 hours.

REQUIREMENTS FOR THE DEGREE OF BACHELOR OF SCIENCE

The requirements for graduation are as follows:

1. Admission to the College of Education.

2. A curriculum of 70 hours, except in Athletic Coaching and Physical Education, in which 136 hours are required, and in Industrial Education, in which 130 hours are required.

3. A major of 20 hours in education except in Athletic Coaching and Physical Education, in which 25 hours are required, including the following courses: educational psychology, 3 hours; technic of teaching, 3 hours; a teacher's course in the subject of specialization, 2-3 hours; principles of secondary education, 3 hours; and educational practice, 3-5 hours.

4. Students must specialize in two subjects commonly taught in high schools. In the first of these subjects twenty hours of approved courses must be completed (except that in Agricultural Education 49 hours, Home Economics Education 36 hours, Athletic Coaching and Physical Education 41 hours, and Industrial Education 25 hours must be completed). In the other subject of specialization the student must complete 16 hours of approved courses. In computing the hours in the subjects of specialization, courses taken in other colleges prior to admission may be counted.

5. The remainder of the curriculum may be elected from a list of courses approved by the faculty of the College of Education.

SUBJECTS OF SPECIALIZATION FOR STUDENTS IN GENERAL EDUCATION

Agriculture

(Includes all courses in Agronomy, Animal Husbandry, Dairy Husbandry, Horticulture, Farm Mechanics, Farm Organization and Management.)

Art

(Includes Free Hand Drawing, Architecture 21, 23, 25, 27.)

Biology

(A well-balanced program selected from Zoology, Physiology, Entomology, Botany, Bacteriology. Twenty-five to thirty hours are required for a first subject of specialization; eighteen to twenty-two hours are required for a second subject of specialization.)

Botany

(Includes Bacteriology.)

Chemistry

Civics

(Includes Political Science, Sociology and History 44a and b.)

Commercial Subjects

(Include Accountancy, Business Organization and Operation, Business Law, Business Letter Writing, Transportation.)

Economics

English

(Includes all courses in English Literature, Rhetoric, and Public Speaking.)

General Science

(About 30 to 35 hours of beginning sciences for a first subject of specialization. About 20 to 25 hours for a second subject. The total should include at least one year of work in the physical sciences and one year in the biological sciences.)

Geography

(Includes Geology.)

THE COLLEGE OF LAW

Law students should read the General Directions given in paragraphs 1-23 on pages 6-10. Having secured their study-lists they should report at the Dean's Office in 301 Law Building. *Law students are also advised to study carefully the special announcement of the College of Law which may be obtained at the office of the Dean.*

Each student should follow, *point by point,* the directions given on the first coupon of his study-list.

The College of Law offers a three-year curriculum in law leading to the degrees of Bachelor of Laws (LL.B.) and Doctor of Law (J.D.) The degree of Doctor of Law (J.D.) is open to students who fulfil the conditions specified on pages 163-166 of the 1930-31 University Register.

Admission as a Regular Student

The following persons only will be admitted as candidates for law degrees:

1. Graduates of colleges and universities of approved standing.

2. Students in the University of Illinois of senior standing[1] having at least an average grade of C (3.) who are permitted to elect courses in law for the degree of Bachelor of Arts or for the degree of Bachelor of Science.

Six-year Combined Curricula

Thirty hours of law may be credited toward the degree of Bachelor of Arts in the College of Liberal Arts and Sciences or toward the degree of Bachelor of Science in the College of Commerce and Business Administration. In this manner students may secure in six years both a degree in arts or commerce and a degree in law. (See p. 99 of the 1930-1931 register for statement of electives in law in the College of Liberal Arts and Sciences and pp. 115-116 for curriculum in Commerce and Law.) A candidate for both degrees must in his fourth year register in the College of Law, and also register or file a copy of his study-list in his other college, as that college may reqiure.

Students in Other Colleges Electing Law Courses

A student registered in another college of the University who has an average grade of C (3.) and who otherwise is eligible to enrollment in the College of Law may elect courses in law provided that not less than two courses amounting to at least five hours are taken per semester, under the advice of the dean of the College of Law as to the course to be taken, and provided, further, that if any such student desires to take more than six hours of law work, he must register in the College of Law and thus become subject to the regulations of that College.

Prescribed and Suggested Courses
Pre-Legal

Students are advised to plan their pre-legal college work with great care and to consult members of the law faculty in regard to their plans.

Students taking the combined curriculum of either the College of Liberal Arts and Sciences or the College of Commerce and Business Administration and the College of Law must exercise care to comply with the group, major, and minor requirements of the college in which their pre-legal work is taken. Such students are urged to complete all of these requirements and at least one hundred hours of credit before entering the College of Law in order that they may devote their entire fourth year to the first year of the law curriculum.

[1]To obtain senior standing in the University of Illinois a student must have 94 hours of university credit.

The prospective law student is advised to choose his work, beyond those subjects prescribed in the college in which he is registered, from among the following courses: Accountancy; Economics: Principles of Economics, Money and Banking, Corporation Management and Finance, Labor Problems, Public Finance and Taxation; Political Science: American Government, State Government, Municipal Government, International Law and Principles of Jurisprudence; Philosophy: Logic, Introduction to Philosophy and Political and Social Ethics; History: English History, History of the United States, Constitutional History of England, and Constitutional History of the United States; Latin; Psychology; Sociology; English; Rhetoric; Public Speaking.

Professional

Fifteen hours of law work should be enough to occupy a student's full time; he cannot register for more without special permission.

The courses of the second and third years are elective.

Specialization in Certain Fields of the Law

The program of courses is so arranged that a student may enter upon a measure of specialization in some fields. This is accomplished through giving substantial primary courses open to all students and designed to meet the needs of those who desire to prepare themselves only for general practice, and through offering to others, who wish further training in these fields, the opportunity to elect in them separate and advance courses.

THE SCHOOL OF JOURNALISM

DIRECTIONS FOR REGISTRATION

The General Directions for Registration apply to journalism and pre-journalism students. (See pages 6-10). Students who have been admitted to the School of Journalism may secure their study-lists at the office of the Director, 101 University Hall.

Pre-journalism freshmen and sophomores may register "pre-journalism" within the College of Liberal Arts and Sciences and follow the routine prescribed for registration in that college. Juniors, with or without journalism credit, may register in the School of Journalism with junior standing if they present the required work in rhetoric, science, and social sciences. Seniors in the University may register in the School of Journalism with advanced standing

ADVISERS

Junior and Senior in the School of Journalism—Professor Murphy, 101 University Hall.

(Sections will be approved at the University Library).

Graduate students taking work in journalism—Professor Murphy, 101 University Hall.

GENERAL STATEMENT

The School of Journalism offers a two-year curriculum in journalism, based o an entrance requirement of two years of college work (60 semester hours, ex clusive of physical education, military science, and hygiene), leading to the de gree of Bachelor of Science in Journalism.

REQUIREMENTS IN DETAIL

Bachelor of Science in Journalism

Admission: For admission to the School of Journalism as a candidate for degree a student must be able to matriculate in one of the undergraduate co leges and must offer in addition *60 semester hours* of college work of acceptab grade, exclusive of physical education, hygiene, and military; but inclusive the following prescribed subjects:

Rhetoric and Composition, 6 hours (Rhetoric 1 and 2, or a proficiency e amination equivalent to an examination in Rhetoric 2).

Science, 10 hours in any two of the following subjects: zoology, botan chemistry, physics, geology. (Attention is called to the University requireme that a student who enters the University without at least one unit of high-scho work in laboratory science must substitute five hours of a laboratory science f five hours of free electives in the requirements for graduation).

History, political science, economics, and sociology, 8 hours.

As desirable electives the following subjects are suggested: English lite ature, 6 hours; accountancy, 3 hours; newspaper reporting, 6 hours; printi and publishing, 4 hours; introduction to journalism, 2 hours; foreign languag 8 hours.

Graduation requirements are as follows:

(1) Registration in the School of Journalism.

(2) Completion of a total of 130 hours, including the 60 hours required f admission.

(3) Completion of the following work as a part of the 130 hours requir for graduation:

a. At least 30 hours in journalism including: reporting, 6 hours; copyreading, 6 hou printing and publishing, 2 hours; newspaper advertising or business problems, 2 hours; hist of journalism, 3 hours; ethics of journalism, 3 hours; special problems or thesis, 2-4 hou

b. At least 20 hours chosen from the following subjects, with one or more courses n any four of them: history, economics, sociology, political science, business organization d operation.

c. At least 12 hours in literature. (The work in literature may be done in any language. In foreign languages, only courses that are based on two years of college work, or their equivalent, in the given language, may be counted toward these twelve hours.)
d. A course in rhetoric beyond 1 and 2.
e. Three hours in philosophy.

THE LIBRARY SCHOOL

First year Library students should present themselves in Room 300 Library Building, where both their admission and their registration may be completed. Second year students follow directions for registration in the Graduate School.

CURRICULUM IN LIBRARY SCIENCE

The curriculum is two years in length. For graduation a student must receive credit for all courses listed in the curriculum on page 175 of the *Annual Register* except those marked with an asterisk (*), which are elective. The degree of Bachelor of Science in Library Science is conferred on a student when he has completed the required work in the first year's curriculum, and has received credit in courses amounting to 30 hours. Second year students register in the Graduate School as candidates for the Master's degree.

RECOMMENDED PRELIMINARY CURRICULUM

Undergraduates who intend, on the completion of their college work, to apply for admission to the Library School, should select their courses so as to conform in general to the following recommended program of studies preparatory to library work.

English literature, 10[1]; rhetoric, 6.
Latin, 4, in addition to four years of high-school Latin.
German, 12, in addition to two years of high-school German.
French, 8, in addition to two years of high-school French.
German and French begun in college instead of in the high school should be continued for a longer period.
Medieval and modern European history, 6; history of England, 6; history of the United States, 6.
Economics, 6; political science, 4; sociology, 6.
Philosophy, 4; general psychology, 4; education, 6.
Zoology, 6; botany, 4; chemistry or physics, 6.
The total of this work is 104 semester hours, leaving the equivalent of one-half year of a four-year course free for work in other subjects or for more work in the subjects named.

PREPARATION FOR SPECIAL LIBRARIES

Advanced students who desire to prepare themselves for work in special libraries (e.g., normal school, historical, business, agricultural) may, with the approval of the faculty, substitute certain advanced courses in other colleges and schools of the University for certain Library School courses.

LIBRARY VISITS

Each year all the students in the Library School are required to visit the libraries and certain of the book binderies, book stores, and printing establishments of either Chicago and vicinity or St. Louis and vicinity. During this visit, which occupies one week, the students are accompanied by members of the faculty. The expense of this week is about $30 per student.

[1]The figure after each subject denotes the minimum number of semester hours which the student should devote to that subject.

THE GRADUATE SCHOOL

ADMISSION

Admission to the Graduate School may be granted to graduates of institutions whose requirements for the bachelor's degree are equivalent to those of the University of Illinois, and to applicants from other institutions approved by the Executive Faculty. *Admission to the Graduate School does not, however, imply admission to candidacy for an advanced degree, and gives no right or claim to be so admitted. Such candidacy is determined by the Faculty after the student has demonstrated by his work here, for from two to five months, that he has the ability to do major work of graduate character. A mere accumulation of "credits" or "grades" is not sufficient.*

Admission to graduate courses may be granted only to those who have had the requisite undergraduate work in those courses. But a student of mature age who satisfies the Dean and the department concerned of his ability to pursue graduate work in a given line may be enrolled in particular graduate courses, and permitted to carry on such study or investigation under the direction of a department of the University as the department shall recommend and the Dean approve.

REGISTRATION

A candidate for admission to the Graduate School should proceed first to the Registrar's Office, 100-A Administration Building, taking with him his official statement of credits from the college of which he is a graduate.

At the Registrar's Office he will be asked to fill out in duplicate an "application for admission" and file therewith his statement of credits.

A candidate from a college or university of recognized standing will receive: (1) permit to enter; (2) a memorandum of prerequisites to be made up (a blank to be used by his advisers in indicating whether or not he is fully ready to enter upon graduate study in his major and minor subjects); and (3) a study-list.

The candidate should obtain a copy of the circular of the Graduate School, and should note the requirements and regulations explained therein, particularly those under the headings "Registration and Program of Study" and "Degrees." He should then proceed with his registration in accordance with these requirements and regulations and with the "Directions for Registration" given on the first coupon of his study-list.

COURSES OF STUDY

Courses of study open to graduate students are of three classes: (1) graduate courses proper, which are numbered from 100 upwards, in the various departments; (2) courses for graduates and advanced undergraduates, which are an intermediate group of advanced courses open to seniors, and occasionally to juniors, as well as to graduate students; (3) miscellaneous courses which include any course in the University not in the two preceding groups. Miscellaneous courses are not accepted for credit towards a degree, and students are permitted to take them only under certain restrictions.

THE COLLEGE OF FINE AND APPLIED ARTS

DIRECTIONS FOR REGISTRATION

(1) Read the General Directions for Registration, pages 6-10.

(2) Obtain your study-list; (A) if you already have a permit to register in the College of Fine and Applied Arts at the Hall of Casts, Architectural Building.

(B) If you have *not* yet secured a permit to register in the College of Fine and Applied Arts, at the Registrar's Office, 100-A Administration Building.

(3) Follow *point by point,* the directions printed on the first coupon of the study-list, finding your advisers as follows:

Architecture.....210 Architecture Building
Art.....105 Architecture Building
Landscape Architecture.....203 New Agricultural Building
Music.....100-102 Smith Memorial Hall

(4) Each student must secure the approval of his Registration Adviser for the studies he has chosen. This approval must be indicated by officer's signature on the study-list. Each student must then report first to the Library to secure approval of sections in courses other than professional, and afterwards to the Auditorium to make out class cards, and to pay fees. New study-lists will be found in the lobby of the Library.

REQUIREMENTS FOR ADMISSION

Until further notice the requirements for entrance to the various departments of the College of Fine and Applied Arts are as follows:

Architecture—same as the requirements for admission to the College of Engineering.

Art—same as the general requirements for admission to the College of Liberal Arts and Sciences.

Landscape Architecture—same as the requirements for admission to the College of Agriculture.

Music—same as the general requirements for admission to the College of Liberal Arts and Sciences except that the student offers two units of music in lieu of two units of electives from List B. (See Requirements for Admission in current *Annual Register.*)

REQUIREMENTS FOR GRADUATION

Students who have satisfied the University requirements as to registration, residence, and diploma fee, and who have maintained throughout their course a satisfactory record of scholarship and moral character, will, on completion of the curricula hereinafter specified, be graduated and appropriate degrees conferred.

Students who entered the Department of Architecture prior to June 1, 1930 or who have entered with sophomore standing or above in 1930-31 will finish the curricula in effect at that time. Other students will enroll in the curricula with the optional requirements.

Candidates for the degree of Bachelor of Music must offer credit for 13 semester hours, including the prescribed subjects named below, one of which must be piano.

All students enrolled in the School of Music are required to attend the recitals and concerts given every Tuesday. These occur at 11 A.M. on the first

and third weeks of the month, and at 7 P.M. on the second, fourth, and fifth. More than three unexcused absences during the semester will affect the grade of the major applied music subject, of which this required attendance is a part.

Performances being also a part of the course of study in the applied music subjects, all students are required to participate in a program when sufficiently prepared.

TRIPS OF INSPECTION

An inspection trip is one of the regular requirements in the senior year of the curricula leading to the degrees of Bachelor of Science in Architecture and Architectural Engineering. The time required is three or four days, and the places visited are usually in Chicago. The trips are taken during term time under the supervision of the University authorities. The expense to each student varies from $25 to $35.

ELECTIVES AND OPTIONS

Non-technical electives—The non-technical electives for students in the various options in Architecture are subject to the following restrictions:

1. They are restricted to courses offered in the College of Liberal Arts and Sciences, the College of Commerce, courses 1 to 16 in the School of Music, Landscape Architecture 71 and 72, and courses in Education, Group A, in the College of Education.
2. Such courses must not be open to freshman students except in the cases of Library Science 12, Mathematics 5, History 1a and 1b, 2a and 2b, Geography 1, Geology 1, Botany 1, and Zoology 1.
3. Students in Architecture electing the third and fourth years' work in the Reserve Officers' Training Corps may substitute the credit thus received for the required non-technical electives.

Technical electives—Any course in the College of Engineering not prescribed in the curriculum in which the student is registered, excepting only General Engineering Drawing 1 and 2, and courses in the College of Fine and Applied Arts approved by the head of the Department.

REQUIREMENTS IN RHETORIC AND FOREIGN LANGUAGE FOR STUDENTS IN ARCHITECTURE

For the year 1931-32 the definitions and requirements for Rhetoric and foreign language as printed on pages 34-35 under the College of Engineering will prevail.

DIRECTIONS FOR STUDENTS IN THE SCHOOL OF MUSIC

Practice pianos may be secured at the rate of $3 a semester for one hour a day. Six practice organs are installed for the use of organ students at a reasonable fee.

A student matriculated in the School of Music takes throughout his course two applied subjects, one a major (piano, voice, etc.) in which two half-hour lessons a week are taken, and the other a minor, in which two twenty-minute lessons a week are taken.

The University Choral Society, the University Orchestra, and the Glee Clubs are open to qualified persons from any college.

Students from other colleges desiring to take courses in applied music (i.e., piano, voice, etc.) who have not been previously registered for courses, must pass an entrance examination. For particulars consult the Director of the School of Music.

The Course in Public School Music

Candidates for the degree of Bachelor of Science in Music Education will enter the College of Education at the beginning of the third year. For curriculum see page 59.

Bachelor of Music—Vocal Major

The first and second years are the same as in the instrumental major curriculum, except that voice is the major applied subject.

At least eight hours each of French, German, and Italian are required for the vocal major. One of the languages is to be taken in the sophomore year, and a *second* language in the junior year. If the student has not presented at least two units of the *third* language, taken in high school, he must elect this language in the senior year. Otherwise, a course in English is advised for this elective.

Bachelor of Music—Theory Major

A student may take a major in Theory of Music only on recommendation of the Director. In addition to the complete theory course offered in the instrumental major, he must complete the courses in Composition (Music 11a-b, and 12a-b), and in Advanced Orchestration (Music 17 and 18). In addition he must present a recital during the senior year of his own compositions and orchestral arrangements. His work in applied music must be equivalent to that of three years of collegiate study. Thesis required.

DESCRIPTION OF COURSES AND TIME TABLE

EXPLANATION

The arrangement of subjects in the following Time Table is alphabetical. The connections of allied departments are indicated by cross references.

Following the description of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For instance, under Art 14b, Applied Design, the prerequisite given is Art 14a. This course must be completed before Course 14b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Graduate courses are numbered upwards from 100.

Credit is reckoned, *for undergraduate students*, in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drawing room.

The number of hours for which the course counts is shown in the parentheses after each course, except where the course, credits, sections, etc., are tabulated, thus: (2).

Credit for first-year graduate students, candidates for the master's degree, is counted in units. A unit course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study; four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in the following pages. Courses of the intermediate groups "for graduates and advanced undergraduates" are in general (unless otherwise specified by the department concerned) evaluated as follows for graduate credit: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

For second-year graduate students, candidates for the doctor's degree, no record of units is kept.

34. **Crop Materials.**—Collection, preservation, identification, and classification of crop plant materials; seed analysis and germination. Crop inspection, certification, and verification. Corn seedling vigor and disease study. Grain judging; and study of crop damage by disease, insects, weeds, and various causes. *Prerequisite:* Bot. 5. (3). 10, 11 MWF; 600 Agr. Associate Professor PIEPER, Mr. BUCKARDT.

Courses for Advanced Undergraduates and Graduates

7. **Advanced Crop Production.**—*Prerequisite:* Agron. 25, junior standing. (3). Lect., 8 MWF; 302 Agr. Professor BURLISON, Associate Professor DUNGAN.

29. **Field Plot Technic.**—*Prerequisite:* Senior standing. (3). Lect., 10 MWF; 110 Agr. Professor WOODWORTH.

30. **Metabolism of Soil Microorganisms.**—Chemistry and bacteriology of the nitrogen cycle; nitrogen fixation, nitrification, nitrate assimilation, denitrification and synthesis of nitrogen compounds by microorganisms; relation of nitrogen to other cycles. *Prerequisite:* Bact. 5a and 5b (or 20); Chem. 32, junior standing. (3). 11 MWF; 302 Agr. Associate Professor SEARS.

33. **Chemical Methods of Soil Investigation.**—Application of chemical methods to the solution of soil problems from the standpoints of soil formation and properties; availability of nutrients for crop growth; reactions of soils with fertilizers and other soil amendments. (Given 1931-32 and alternate years thereafter). *Prerequisite:* Agron. 28, junior standing. (3). Lect., 1 M, 302 Agr.; Lab. 1, 2, 3 WF, 218 Agr. Professor DETURK and assistant.

Courses for Graduates

101. **Soil Investigations.**—(1 unit). Twice a week. Arrange. 306 Agr. Professor DETURK.

104. **Seminar in Agronomy.**—(¼ unit). Once a week. Arrange. 301 Agr. The staff.

111. **Soil Biology.**—(½-1 unit).* Once a week. Arrange. Professor DETURK.

112. **Advanced Plant Breeding.**—(1 unit). Twice a week. Arrange. Professor WOODWORTH.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

[1]Corresponding sections in lecture and quiz should be scheduled.

118. Research.—(½-4 units).* Arrange.
(a) **Soil Fertility.**—Professor DeTurk.
(b) **Soil Physics.**—Professor R. S. Smith.
(c) **Soil Biology.**—Professor DeTurk.
(d) **Plant Breeding.**—Professor Woodworth.
(e) **Field Crops.**—Professor Burlison, Associate Professor Dungan.

ANIMAL HUSBANDRY

Courses for Undergraduates

Note: Certain courses in this department require laboratory fees varying from $1 to $5.

1. Introduction to Animal Husbandry.—Required of students not having had livestock judging in high school. (No credit in this course allowed to juniors and seniors.) (2). 3, 4 TT; S. P. Mr. Crawford.

3. Livestock Judging.—*Prerequisite:* An. Husb. 1 or equivalent. (5). 10, 11 MTWTF; S. P. Associate Professor Snapp.

9a-u. Investigation with Thesis.—(This course is continuous throughout the year; credit is not given for either semester separately.) *Prerequisite:* 90 hours of university work, including 20 hours pertinent to the thesis problem; and the approval of the head of the department. (5). Time to be arranged.
(a) **Beef Cattle.**—Professor Rusk, Associate Professor Snapp.
(c) **Horses.**—Professor Edmonds.
(e) **Sheep.**—Assistant Professor Kammlade.
(g) **Swine.**—Professor Carroll.
(j) **Poultry.**—Professor Card.
(l) **Animal Nutrition.**—Professor Mitchell.
(n) **Animal Breeding.**—Associate Professor Roberts.
(q) **Animal Pathology.**—Professor Graham.
(s) **Meats.**—Associate Professor Bull.
(u) **Marketing.**—Associate Professor Ashby.

12. Special Problems.—*Prerequisite:* 90 hours of university work; approval of the head of the department. (5). Time to be arranged. Members of the department.

21. Principles of Feeding.—*Prerequisite:* Chem. 5; An. Husb. 1.

BACTERIOLOGY

For students entering prior to September, 1929

Major: 20 hours chosen from the courses offered by this department. Five hours may be chosen from the following courses offered by other departments: Dairy bacteriology (Dairy Husbandry).

Minors: 20 hours chosen from one or two of the following: Chemistry, botany, zoology, physiology.

---

[1]Sections A, B, C, D, for Home Economic students. Sections A and C open to Fine Arts students.

For students entering after September 1, 1929

Major: 20 hours chosen from the courses offered by this department. Dairy Husbandry 10 (advanced Dairy Bacteriology) may be offered in partial satisfaction of this requirement. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects and taken after the freshman year: Chemistry and botany. At least eight hours must be offered in each subject if two are chosen.

Courses for Undergraduates

Note: Certain courses in this department require laboratory fees varying from $2.50 to $8.

5a. Introductory Bacteriology.—*Prerequisite:* Sophomore standing and one semester of chemistry or consent of the instructor.

Courses for Advanced Undergraduates and Graduates

7a. Thesis and Special Problems.—*Prerequisite:* Junior standing; Bact. 5a and 5b (or 20); and Bact. 26 or 8; consent of the instructor. Hours and credit to be arranged before registration. (3-5).* Professor TANNER and Dr. WALLACE.

10. Epidemiology.—*Prerequisite:* Bact. 5a and 5b (or 20); junior standing and the consent of the instructor. (2). Lect., 11 TT; 301 Chem. Dr. WALLACE.

20. General Bacteriology.—*Prerequisite:* Two years of college chemistry; senior standing; consent of the instructor. Students with credit in Bact. 5a and 5b will not be allowed credit for Bact. 20. (5). Lect., 1 MW, 100 Chem.; Lab., 1, 2, 3 TT, 367 Chem. Dr. WALLACE.

26. Pathological Bacteriology.—*Prerequisite:* Bact. 5a and 5b (or 20); junior standing. (5). Lect., 8 MW; 204 Chem.; Lab., 8, 9 TTS, 367 Chem. Dr. WALLACE.

Courses for Graduates

103. Physiology of Bacteria.—(1 unit). Lect., 8 MW; 163 Chem. Professor TANNER.

107. Research in Bacteriology.—(1-4 units).* Lab., arrange; 365 Chem. Professor TANNER.

118a. Current Literature.—Required of all students majoring in Bacteriology. *Prerequisite:* Graduate standing and the consent of the instructor; 10 hours of bacteriology. (¼ unit). 1 T; 366 Chem. Dr. WALLACE.

BOTANY

For students entering prior to September, 1929

Major: 20 hours of botany exclusive of courses 1, 5, and 11.

Minors: 20 hours chosen in consultation with the head of the department from not more than three subjects in the following list: Agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least 8 hours must be offered in one subject.

Credit for seniors who take Botany 1 or 5 will be reduced one hour.

For students entering after September 1, 1929

Major: 20 hours of botany exclusive of courses 1 and 5 and all courses taken during the freshman year, and inclusive of courses 2a or 2b, 3, and at least 5 hours in courses listed for advanced undergraduates and graduates.

---

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

[1]For advanced students in science.

Botany

Minors: 20 hours, exclusive of courses taken during the freshman year, in one or two departments chosen in consultation with the head of the department from the following list: Agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least eight hours must be offered in each department, if two are chosen.

Courses for Undergraduates

Note: Certain courses in this department require laboratory fees varying from $1 to $3 (per unit in graduate courses).

Accy. 3a	3	A	8	MWF	328 Com.	Filbey
		B	9	MWF	328 Com.	Filbey
		D	11	MWF	326 Com.	Frese
		F	2	MWF	106 Com.	Littleton

3b. Auditing.—*Prerequisite:* Accy. 3a. (3). 10 MWF; 115 Com. Professor Filbey.

4a. Cost Accounting.—*Prerequisite:* Accy. 2a-2b.

Accy. 4a	2	L	10	TT	219 Com.	Schlatter
		M	11	TT	219 Com.	Schlatter
		O	2	TT	219 Com.	Schlatter

4b. Accounting Systems.—*Prerequisite:* Accy. 2b, Econ. 3.

Accy. 4b	2	J	8	TT	119 Com.	Baily
		K	9	TT	119 Com.	Baily

5a. C. P. A. Problems.—*Prerequisite:* Accy. 3a-3b.

Accy. 5a	3	C	10	MWF	317 Com.	Scovill
		D	11	MWF	317 Com.	Scovill

13. Governmental Accounting.—*Prerequisite:* Accy. 3a. (2). 2 TT; 206 Adm. (E). Professor Morey.

30. Budgets and Accounting Control.—*Prerequisite:* Accy. 2b. (3). 9 MWF; 115 Com. Associate Professor Theiss.

90a. Thesis.—Primarily for candidates for High Honors. *Prerequisite:* Senior standing in accountancy. Credit is not given for 90a or 90b separately. (2). Time to be arranged. Associate Professor Theiss.

Courses for Graduates

103. Advanced Theory.—(1 unit). 3-5 T; 209 Com. Professor Littleton.

104. Accounting Systems.—(1 unit). 3-5 Th; 126 Com. Professor Scovill.

---

[1]Students who have failed in Accountancy 1a are permitted to register in Accountancy 1e and will receive 3 hours' credit if their final grade is C or above.

120. Income Tax Development.—(1 unit). Time to be arranged. Professor FILBEY.

129. Thesis.—(1 unit). Time to be arranged. Professor LITTLETON and others.

B. BUSINESS ORGANIZATION AND OPERATION

Courses for Undergraduates

1. Industrial Organization and Management.—*Prerequisite:* Economics 1 or 2; 45 credit hours. Junior and senior engineering students admitted with consent of instructor.

10. Newspaper Advertising.—For students specializing in journalism (offered first semester only). *Prerequisite:* Journ. 5 and 6. (3). 11 MWF; 215 Com. Professor RUSSELL.

20. Credits and Collections.—*Prerequisite:* B. O. & O. 2. (3). 11 MWF; 307 Com. Professor CONVERSE.

75. Management of Public Utilities.—*Prerequisite:* Econ. 1 and Accy. 2a. (3). 8 MWF; 126 Com. Assistant Professor GRAY.

90a. Thesis.—Primarily for candidates for High Honors. *Prerequisite:* Senior standing in B. O. & O. (2). Credit is not given for 90a or 90b separately. Time to be arranged. Professor CONVERSE.

Courses for Graduates

102. Marketing Policies and Problems.—(1 unit). Arrange. Professor CONVERSE.

104. Scientific Management.—(1 unit). Arrange. Associate Professor ANDERSON.

107. Sales Campaigns.—(1 unit). Arrange. Professor RUSSELL.

129. Thesis.—(1 unit). Time to be arranged. Professor RUSSELL and members of the staff.

C. BUSINESS LAW

Courses for Undergraduates

1a. General Principles of Business Law.—*Prerequisite:* Sixty hours of university credit, including Econ. 1 and Accy. 1a-1b.

CERAMIC ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $2 to $7.50.

1. Ceramic Materials.—*Prerequisite:* Chem. 4. (3). Lect., 11 MWF; 214 Cer.

5. Ceramic Bodies.—*Prerequisite:* Cer. 1, 4. (5). 9 MWF, 218 Cer.; 1-4 MF, 2-5 W, 113-114 Cer.

7. Heavy Clay Products.—*Prerequisite:* Cer. 1, 4. (3). Lect. and quiz, 11 TT, 1, W, 218 Cer. Lab., Sec. A, 1-4 T; Sec. B, 1-4 Th; Kiln House.

16. Enamels.—*Prerequisite:* Cer. 14. (3). 10 W, 214 Cer.; 8-11 TT, 102, 113-114 Cer.

18. Ceramic Microscopy.—*Prerequisite:* Chem. 40; Geol. 47 and 49 or equivalent. (3). 1-4 TT, 9-12 S; 312 Cer.

21. Ceramic Pyrometry.—*Prerequisite:* General physics; inorganic chemistry. (1). 4 T; 214 Cer.

22. Kilns and the Burning of Clay Products.—*Prerequisite:* Cer. 5 and 11. (3). 11 MWF; 218 Cer.

23. Dryer and Kiln Design.—*Prerequisite:* Cer. 11; registration in Cer. 22; General Eng. Drawing 1 or 4. (2). 1-4 MF; 212 Cer.

97. Thesis.—(3-5).* Arrange.

99. Inspection Trip.—*Prerequisite:* Senior standing. No credit.

Courses for Graduates

101. The Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (1 unit).

102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. (1 or 2 units).*

CHEMISTRY

For students entering prior to September, 1929

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42b, 43b, 50a, and courses in the industrial, sanitary, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, and 6 and inclusive of courses in quantitative, analytical, and organic chemistry.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

Minors: 20 hours, chosen from not more than three of the following: Bacteriology, botany, geology, mathematics, philosophy, physiology, physics, and zoology.

For students entering after September 1, 1929

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, and all work taken during the freshman year, and inclusive of courses in quantitative, analytical, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours, exclusive of courses taken during the freshman year, chosen from not more than two of the following: Bacteriology, botany, geology, mathematics, philosophy, physiology, physics, and zoology. At least eight hours must be offered in each subject if two are chosen.

Courses for Undergraduates

Note: Certain courses in this department require laboratory fees varying from $3 to $18.

1. Inorganic Chemistry.—*Prerequisite:* One unit of entrance credit in physics, or 2½ units of entrance credit in mathematics, or registration in Math. 1a, or 2, or 3.

Note: Students who have received entrance credit for high-school chemistry are given only three hours' credit for Chem. 1. Seniors, 3 hours only.

95a. History of Science with Particular Reference to Chemistry.—*Prerequisite:* Junior standing and 20 hours of laboratory science. (2). 1 MW; 201 Chem. BARTOW.

Courses for Graduates

101a. Inorganic Chemistry.—(½ unit). (For laboratory work see Chem. 102a.) Twice a week. 8 MW; 303 Chem. Professor HOPKINS.

102a. Inorganic Chemistry.—(Laboratory work to accompany or follow Chem. 101a.) Arrange. (¼-1 unit).* Professor HOPKINS.

105a. Inorganic Seminar and Special Topics.—(¼-1 unit).* Once, twice, or three times per week. Seminar, 11 S; 162 Chem. Special topic: Mechanism of Chemical Reactions. (Dr. Copley). 9 MW; 105 Chem. Annex. Professor HOPKINS.

123a. Qualitative Analysis.—(½ unit). Twice a week. 11 MF; 162 Chem. Laboratory. Arrange. Associate Professor REEDY.

125a. Quantitative Analysis.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) (¼-1 unit).* 9 S; 217 Chem. Professor CLARK.

126a. Quantitative Instrumental and Chemical Methods of Analysis in Organic Chemical Research.—(Ultimate bomb analysis, gas density, polarimetry, refractometry, spectrophotometry, colorimetry, microscopy, etc.). (½-1¼ units).* Twice a week. 8 TT; 308 Chem. Annex. Laboratory, arrange; 305-A Chem. Assistant Professor ENGLIS.

127a. Modern Applications of Radiation to Chemical and Industrial Problems.—(X-rays, radioactivity and optical spectroscopy). (½-1 unit).* 10 TT; 217 Chem. Professor CLARK.

132a. Organic Chemistry.—(First course). (¾ unit). 11 TT; 217 Chem. Professor ADAMS.

134. Organic Chemistry.—Chiefly laboratory work. (½-1 unit).* Arrange. 219 Chem. Professor MARVEL.

135a. Organic Chemistry.—(Seminar). (¼ unit). Once a week. 10 W; 217 Chem. Professor ADAMS.

136a. Organic Chemistry.—Special Topics. (¾ unit). Twice a week. 11 TT; 103 Chem. Associate Professor FUSON.

145a. Physical Chemistry.—(Seminar). (¾ unit). Twice a week. 10-12 S; 176 Chem. Professor RODEBUSH.

152a. Physiological Chemistry.—Chiefly laboratory. (½-1 unit).* Arrange. 463 Chem. Professor ROSE, Assistant Professor DUVIGNEAUD.

155a. Physiological Chemistry.—(Seminar).[1] (¾ unit). Two hours a week. 9-11 F; 456 Chem. Professor ROSE.

160a. Advanced Chemical Technology and Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

161a. Chemical Plant Design.—Calculations and layout of equipment for recently developed processes. *Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 TT; 162 Chem. Associate Professor KRASE.

186a. Sanitary Chemistry.—(½-1¼ units).* Arrange. One to five times a week. 60-B Chem. Professor BUSWELL.

190a. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professors RODEBUSH, CLARK, Associate Professors PHIPPS, REEDY.

Inorganic Chemistry.—Professor HOPKINS; Associate Professor REEDY; Dr. BAILAR, Dr. STILLWELL.

Analytical Chemistry.—Professor CLARK; Assistant Professors SMITH, ENGLIS.

Food Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors NOYES, ADAMS, MARVEL; Associate Professors SHRINER, FUSON; Dr. BAILAR.

Zymochemistry.—Professor BUSWELL.

Physiological Chemistry.—Professor ROSE; Assistant Professor DUVIGNEAUD.

Industrial Chemistry.—Professors PARR, KEYES; Associate Professor KRASE.

Ceramic Chemistry.—Professor PARMELEE.

Phyto-Chemistry.—Assistant Professor ENGLIS.

Animal Chemistry (Nutrition).—Professor GRINDLEY.

THE CLASSICS

For students entering prior to September, 1929

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, 17, and 55.

Minors: 20 hours, chosen from not more than two of the following: Foreign language (Latin being especially recommended), English literature, history, and philosophy.

Latin

Major: 20 hours, excluding Latin 11a-11b, 6, 1a-1b, 13, 20, 56 and including six hours in translation courses for advanced undergraduates and graduates.

Minors: 20 hours, chosen from not more than two of the following: Foreign language (Greek being especially recommended), English literature, history, and philosophy.

Classics

Major: 20 hours in Greek and Latin, excluding Greek 1a-1b, 15, 16, 17, 55, and Latin 11a-11b, 6, 1a-1b, 9, 13, 20, and 56. At least six hours shall be offered in the secondary language and the remaining hours in the primary one.

Minors: 20 hours, chosen from not more than two of the following: Foreign language, English literature, history, and philosophy.

For students entering after September 1, 1929

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, 17, and all courses taken during the freshman year.

GREEK

Courses for Undergraduates

1a. Elementary Greek.—(4). 8 TWTF; 114 L. H. Dr. Mylonas.

3. Second Year Greek. Plato.—*Prerequisite:* Greek 1a-1b. (3). 11 MWF; 114 L. H. Mr. Dunkin.

Courses for Advanced Undergraduates and Graduates

6. Thucydides and Plato.—*Prerequisite:* Greek 3 and 4 or an equivalent. (3). 9 TTS; 114 L. H. Dr. Mylonas.

Greek Life and History

For courses 15, 16, 18, and History 55 a knowledge of Greek is not presupposed.

15. Greek Athletics.—*Prerequisite:* Sophomore standing. (1). 1 T; 202 L. H. Dr. Mylonas.

16. Life of the Ancient Greeks.—*Prerequisite:* Sophomore standing. (1). 3 Th; 120 L. H. Dr. Mylonas.

18. Greek Archaeology.—*Prerequisite:* Sophomore standing. (2). 2 TT; 120 L. H. Dr. Mylonas.

Greek History.—See History 55. 1 MWF; 202 L. H. Professor Oldfather.

Courses for Graduates

Students desiring to take graduate work in Greek should have had at least three years of college Greek or an equivalent.

110a. See Latin 110a.

106a. Greek Drama, Tragedy.—(1 unit). Twice a week. Arrange. Associate Professor Perry.

LATIN

Courses for Undergraduates

11a. Elementary Latin.—(*Note:* Seniors will receive three hours' credit only.) (4). 8 TWTF; 120 L. H. Mr. Rapp.

6. Cicero.—*Prerequisite:* Two entrance units in Latin or Latin 11a-11b. (4). 2 TWTF; 114 L. H. Mr. Dunkin.

1a. Ovid.—*Prerequisite:* Three entrance units in Latin or Latin 6. (4). 1 TWTF; 114 L. H. Mr. Rapp.

12a. Plautus, Terence, Catullus.—*Prerequisite:* Four entrance units in Latin or Latin 1a-1b. (4). 9 TWTF; 120 L. H. Associate Professor Perry.

3. Lucretius and Horace (Odes).—*Prerequisite:* Latin 12a-12b or an equivalent. (3). 10 MWF; 120 L. H. Professor Canter.

5a. Latin Composition.—*Prerequisite:* Three entrance units in Latin or Latin 6. Required to secure the department's recommendation to teach. (1). 4 Th; 120 L. H. Professor Canter.

Roman Life and History

Course 20 presupposes no knowledge of Latin and is open to all students except freshmen.

20. Mythology of Greece and Rome.—*Prerequisite:* Sophomore standing.

Subject	Credits	Section	Hours	Days	Room	Instructor
Latin 20	2	Lect.	2	T	202 L. H.	Perry
		Quiz A	2	Th	202 L. H.	
		Quiz B	3	Th	202 L. H.	

Courses for Advanced Undergraduates and Graduates

21. Tacitus (Annales) and Juvenal.—*Prerequisite:* 12 hours of Latin acceptable for a major. (3). 2 MWF; 120 L. H. Professor Canter.

30a. Honors Course.—Thesis or a special course of study approved by the department. *Prerequisite:* Senior standing and 14 hours of Latin acceptable for a major. (2). Arrange. Professor CANTER.

Courses for Graduates

Students desiring to take graduate work in Latin should have had at least three years of College Latin in addition to the Latin presented to meet entrance requirements.

104. Latin Palaeography.—(1 unit). Twice a week. Arrange. Professor OLDFATHER.

110a. Bibliography and Criticism.—(1 unit). Arrange. Professors OLDFATHER, CANTER, and PERRY.

115. Latin Elegy.—(1 unit). Twice a week. 4-6 T; 120 L. H. Professor CANTER.

118. The Latin Romance.—(1 unit). Twice a week. Arrange. Associate Professor PERRY.

COMMERCIAL LAW

(See Business Organization and Operation.)

COMPARATIVE LITERATURE

(See English 54.)

DAIRY HUSBANDRY

Courses for Undergraduates

Note: Certain courses in this department require laboratory fees varying from $2 to $4.

1. Testing Dairy Products.—*Prerequisite:* Dairy Husb. 24b or 30 hours of university work. (3). 1-4 TT (Lect., Quiz, Lab.); 503 Agr. Assistant Professor OVERMAN, Mr. GARRETT.

6a. Dairy Plant Operations.—*Prerequisite:* Dairy Husb. 1, 11, and 12, or registration therein. (3). Time to be arranged. Associate Professor TRACY, Mr. TUCKEY.

22. Cheese Making.—*Prerequisite:* Dairy Husb. 11, 12, and 24b. (3). 1-5 T; 8 WF; Dairy Mfrs. Bldg. Professor RUEHE.

23a-k. Investigation with Thesis.—(This course is continuous throughout the year; credit is not given for either semester separately.) *Prerequisite:* 90 hours of university work including not less than 20 hours pertinent to thesis problem and approval of head of department. (5). Arrange. 120 Agr.

(a) **Dairy Bacteriology.**—Professor PRUCHA, Assistant Professor BRANNON.
(c) **Dairy Chemistry.**—Assistant Professor OVERMAN.
(e) **Dairy Farming and Economic Milk Production.**—Professor FRASER.
(g) **Dairy Manufactures.**—Professor RUEHE, Associate Professor TRACY.
(j) **Dairy Production.**—Professors GAINES, YAPP; Associate Professor NEVENS.

24a. Elementary Dairy Production.—(*Note:* Juniors and seniors allowed 2 hours' credit only.)

Subject	Credits	Section	Hours	Days	Room	Instructor
D. Husb. 24a	3	Lect.	9	M	127 New Agr.	NEVENS,
		Lab.	8, 9	W	S. P.	KUHLMAN, and
		Quiz	9	F	205 Agr.	SHAW

24b. Elementary Testing and Manufacture of Dairy Products.—*Prerequisite:* Credit or registration in Chem. 1 or 2. (*Note:* Juniors and seniors allowed 2 hours' credit only.)

Courses for Advanced Undergraduates and Graduates

4. Ice Cream Making.—*Prerequisite:* Dairy Husb. 1, 11, 12; and 60 hours of university work. This course is accompanied by an inspection trip costing from $15 to $20. (5). 1-4 TT, 4 MWF; D. Mfrs. Associate Professor TRACY.

10. Advanced Dairy Bacteriology.—*Prerequisite:* Bact. 5a and 5b; 60 hours of university work. (4). 1-4 MWF; 456 Agr. Professor PRUCHA, Assistant Professor BRANNON.

17. Advanced Study of Dairy Breeds.—*Prerequisite:* Dairy Husb. 2 and 60 hours of university work. (3). 10 MWF; 553 Agr. Professor YAPP.

20. Economic Problems in Dairy Farming.—*Prerequisite:* 60 hours of university work. (3). 9 MWF; 553 Agr. Professor FRASER.

Courses for Graduates

101. Economic Milk Production.—(½-2 units).* Arrange. Professor FRASER.

104. Dairy Bacteriology.—(½-1 unit).* 2 lectures a week. Arrange. Professor PRUCHA.

105. Dairy Manufactures.—(½-2 units).* Arrange. Professor RUEHE, Associate Professor TRACY.

106. Dairy Bacteriology.—(½-2 units).* Arrange. Professor PRUCHA.

107. Dairy Chemistry.—(½-2 units).* Arrange. Assistant Professor OVERMAN.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

108. Physiology of Lactation.—(½-2 units).* Arrange. Professor GAINES.

112a-f. Research.—(1-4 units).* Arrange.

Note: Graduate students writing a thesis should so indicate when registering in Dairy Husbandry 112.

(a) **Dairy Bacteriology.**—Professor PRUCHA.
(b) **Dairy Chemistry.**—Assistant Professor OVERMAN.
(c) **Dairy Cattle Breeding.**—Professor YAPP.
(d) **Dairy Cattle Feeding.**—Associate Professor NEVENS.
(e) **Milk Production.**—Professor GAINES.
(f) **Dairy Manufactures.**—Professor RUEHE, Associate Professor TRACY.

DRAWING, GENERAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $1.50.

1. Elements of Drawing.—*Prerequisite:* Plane geometry.

ENTOMOLOGY

For students entering prior to September, 1929

Major: 20 hours from courses offered in the department, except Entom. 1, 2, and 31.

Minors: 20 hours in not more than three of the following: Zoology, botany, physiology, chemistry, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite, and may be followed by any of the other courses for undergraduates or by 6, 10, 20, or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Students preparing for service as economic entomologists should take as many of the courses offered as possible and should consult the head of the department.

For students entering after September 1, 1929

Major: 20 hours exclusive of Entomology 1, 2, 31, and all courses taken during the freshman year. At least five hours must be offered from the advanced group.

Minors: 20 hours, excluding courses taken during the freshman year, in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: Zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite, and may be followed by any of the other courses for undergraduates or by 6, 10, 20, or 21 in the senior year. MATHEMATICS

For students entering prior to September, 1929

Major: 20 hours made up from any undergraduate courses offered by the department except Math. 1a, 2, 3, 4, 5, and 8. The courses selected must include Math. 7 and 9, and at least one of the following courses: Math. 10, 16, 18, 20, 21, 30, 40, 90. For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: Math. 1; or first semester, Math. 2 (or 3) and 4; second semester, Math. 6. Sophomore year: first semester, Math. 7 (Section T); second semester, Math. 9 (Section T) and 19.

Minors: 20 hours selected from not more than three of the following subjects: Astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, and surveying. At least 8 hours must be offered in some one subject.

Credit for seniors who take Math. 1a, 1b, 2, 3, 4, 5, 6, or 6a will be reduced one hour.

For students entering after September 1, 1929

Major: 20 hours, exclusive of Math. 1a, 1b, 2, 3, 4, 5, 6, 6a, 8a, and 8b (and all courses taken during the freshman year); inclusive of Math. 7 and 9, and two semesters of 70, 71, 72.

For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: Math. 1; or first semester, Math. 2 (or 3) and 4; second semester, Math. 6. Sophomore year: first semester, Math. 7 (Section T); second semester, Math. 9 (Section T) and 19.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: Astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Credit for seniors who take Math. 1a, 1b, 2, 3, 4, 5, 6, or 6a will be reduced one hour.

Courses for Undergraduates

1a. Introduction to College Mathematics.—This course is designed as a two-semester course to give in a unified way an introduction to mathematics, including material from college algebra, trigonometry, analytical geometry, and elementary calculus. A student taking Math. 1a and 1b will not take

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

Math. 2, 3, 4, or 6. *Prerequisite:* Entrance algebra, 1½ units; plane geometry, 1 unit. *Note:* Seniors will receive 4 hours' credit only.

Courses for Graduates

Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week; time to be arranged. Associate Professor Goff.

108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week; time to be arranged. Professor Macintire.

109. Machine Design.—Rational design; the application of mechanics of materials. Individual problems. (1 unit). Twice a week; time to be arranged. Professor Leutwiler.

112. Laboratory Investigation.—Combustion of fuel, boiler economy; steam engines and turbines; gas engines and producers; explosive mixtures; mechanical refrigeration; heating and ventilation. Original work. (1½ units). Three times a week; time to be arranged. Professors Willard, Polson, Kratz, Ham, Macintire.

MECHANICS, THEORETICAL AND APPLIED

Note: Certain courses in this department require laboratory fees varying from $1 to $2.50.

Courses for Advanced Undergraduates and Graduates

41. Advanced Mechanics of Materials.—*Prerequisite:* T. A. M. 3 and 63. (3). Time to be arranged. Professor SEELY.

43. Laboratory Work in Hydraulics.—Advanced experimental work in hydraulics. *Prerequisite:* T. A. M. 4 and 64. (2). Time to be arranged. Professor ENGER.

45. Advanced Technical Statics.—*Prerequisite:* T. A. M. 1, 3, and 63, or equivalent work in mathematics and physics. (3). Time to be arranged. Professor WESTERGAARD.

Courses for Graduates

101. Analytical Mechanics.—(1 unit). Twice a week; time to be arranged. Professor MOORE.

104. Experimental Work in the Laboratory of Applied Mechanics.—(1-2 units).* Twice a week; time to be arranged. Professors MOORE, ENGER, RICHART.

105. Experimental and Analytical Work in Reinforced Concrete.—(1-2 units).* Twice a week; time to be arranged. Professor RICHART.

106. Theory of Elasticity and Applications to Engineering Problems.—(1 unit). Three times a week; time to be arranged. Professor WESTERGAARD.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating that they have been accepted.

Service in the bands takes the place of the regular military drill.

1. Freshman Band.—(1). Twice a week. Days and section to be assigned according to proficiency. Director HARDING.

3. Sophomore Band.—(1). See foregoing. Director HARDING.

5. Junior Band.—Twice a week. Days and section to be assigned. Director HARDING.

7. Senior Band.—See foregoing. Director HARDING.

MILITARY SCIENCE

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b." Students who have had training in a senior R. O. T. C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

PHYSICS

Major: 20 hours from courses offered in the department. At least 5 hours must be offered from the advanced group.

Minors: 20 hours exclusive of courses taken during the freshman year in one or two of the following subjects, with not less than 8 hours in each department, if two subjects are chosen: Mathematics, astronomy, chemistry, education.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering. For undergraduate students taking advanced work or a major in physics, the following courses are suggested.

Freshman year: Trigonometry (Math. 4) and chemistry.
Sophomore year: Physics 1a-1b, 3a-3b, or Physics 7a-7b, 8a-8b.
Junior year: Physics 14, 16, 23, 36, 44.
Senior year: Physics 14, 20, 22, 30, 45, 46, 78, 97, 98.

Introductory Courses for Undergraduates

PHYSIOLOGY

For students entering prior to September, 1929

Major: 20 hours from courses offered in the department exclusive of Physiology 1.

Minors: 20 hours in not more than three of the following: Botany, bacteriology, chemistry, entomology, and zoology.

Seniors registered in Physiology 1, 2, 4, 6 will receive one hour less credit.

For students entering after September 1, 1929

Major: 20 hours from courses offered in the department exclusive of Physiology 1, and all courses taken during the freshman year.

Minors: 20 hours, excluding work taken during the freshman year, in not more than two of the following: Botany, bacteriology, chemistry, entomology, and zoology. At least eight hours must be offered in each subject if two are chosen.

Courses for Undergraduates

Note: Certain courses in this department require a laboratory fee of $3.50.

POLITICAL SCIENCE

For students entering prior to September, 1929

Major: 20 hours from any courses offered by the department. A major may include three hours of constitutional history (Hist. 27, 44, or 62).

Minors: 20 hours, selected from two of the following subjects: History, economics, law, sociology, philosophy, and education.

Courses 1 and 3 give a general survey of national, state, and local government in the United States. Undergraduates beginning the study of political science are advised to take first, course 1, 3, or 16, and those planning for advanced work should take course 1 and either 3 or 16 in their sophomore year. Course 3 is offered the second semester.

For students entering after September 1, 1929

Major: 20 hours from any courses offered by the department. A major may include three hours of constitutional history (Hist. 27, 44, or 62).

Minors: 20 hours exclusive of courses taken during the freshman year, selected from two of the following subjects: History, economics, law, sociology, philosophy, and education. At least eight hours must be offered in each subject, if two are chosen.

Courses for Advanced Undergraduates and Graduates

3. Social Evolution.—*Prerequisite:* Sociol. 1 and junior standing. (3). 11 MWF; 202 L. H. Mr. AHRENS.

4. Social Control.—*Prerequisite:* Sociol. 1 and either 2 or 3. Sociology 2 or 3 may be taken concurrently with this course.

Sociol. 4	2	A	10	TT	334 L. H.	ALBIG
		B	11	TT	334 L. H.	ALBIG

6. Urban Sociology.—*Prerequisite:* Sociol. 1 and junior standing. (3). 8 MWF; 304 L. H. Assistant Professor TYLOR.

8. Charities.—*Prerequisite:* Sociol. 1 and Sociol. 2 or 4 and economic theory or 5 hours of history. Sociol. 2 or 4 may be taken concurrently with this course. (3). 10 MWF; 304 L. H. Assistant Professor TIMMONS.

9. Criminology.—*Prerequisite:* Sociol. 1 and senior standing.

Sociol. 9	3	A	9	MWF	305 L. H.	TAFT
		B	3	MWF	334 L. H.	TAFT

14. Group Opinion.—*Prerequisite:* Sociol. 4 and consent of instructor. (3). 2 MWF, 334 L. H. Assistant Professor ALBIG.

17. Methods of Sociological Research.—*Prerequisite:* 8 hours' credit in sociology. Sociol. 17 is required of all graduate majors in sociology. (3). 10 TT and two hours of supervised research weekly at time to be arranged; 326 L. H. Associate Professor HILLER.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which he intends to take the course, i. e., ½, or 1, or 1½, or 2.

29. **Human Migrations.**—*Prerequisite:* Sociol. 1 and junior standing. (3). 1 MWF; 334 L. H. Professor TAFT.

30. **Races of Mankind.**—*Prerequisite:* Sociol. 1 and junior standing. (3). 10 MWF; 306 L. H. Assistant Professor KELLY.

45. **Prehistoric Archaeology.**—*Prerequisite:* Junior standing. (3). 11 MWF; 306 L. H. Assistant Professor KELLY.

90a. **Honors Course.**—For senior majors in sociology. Consent of instructor required. (2). Arrange. Associate Professor HILLER.

Courses for Graduates

106. **Urban Communities and Urbanization.**—(1 unit). Twice a week. Arrange. 201 L. H. Assistant Professor TYLOR.

109. **Research in Criminology.**—(1 unit). Twice a week. Arrange. 201 L. H. Professor TAFT.

150. **Seminar.**—Preparation of theses. (½-2 units).* Arrange. Members of the department.

TRANSPORTATION

ZOOLOGY

For students entering prior to September, 1929

Major: 20 hours from any courses offered in the department, excluding Zoology 1, and including Zoology 2, 3, 4, 5 (or 7), and 9.

Minors: 20 hours chosen from one or two of the following subjects: Animal husbandry, bacteriology, botany, chemistry, entomology, physics, physiology, psychology, paleontology, and physiography.

Note: Credit for seniors who take Zoology 1, 2 will be reduced one hour.

For students entering after September 1, 1929

Major: 20 hours from any courses offered in the department, excluding Zoology 1, and all courses taken during the freshman year, and including Zoology 2, 3, 4, 5 (or 7), and 9. At least five hours must be offered from the advanced group.

Minors: 20 hours, excluding courses taken during the freshman year, chosen from one or two of the following subjects: Bacteriology, botany, chemistry, entomology, geology, physics, physiology, psychology. At least 8 hours must be offered in each subject, if two are chosen.

Courses for Undergraduates

Note: Certain courses in this department require laboratory fees varying from $1 to $4.50.

1. **General Zoology.**—*Note:* Seniors will receive 4 hours' credit only.

Courses for Graduates

Students entering on graduate study in the department of zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and undergraduates must be preceded by at least one full year's undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

102. Evolution of the Vertebrates.—(½ unit). Time to be arranged. Assistant Professor ADAMS.

106. Topics in Vertebrate Embryology.—(1 unit). Time to be arranged. Professor SHUMWAY.

111. Experimental and Field Ecology.—(½-2 units).* Time to be arranged. Professor SHELFORD.

115. Factors of Individual and Racial Development.—(1 unit). Twice a week. Time to be arranged. Professor ZELENY.

117. Advanced Field and Faunistic Zoology.—(1 unit). 8-12 TT; 420 N. H. Professor VAN CLEAVE.

127. Theories of Animal Phylogeny.—(1 unit). 3 MW; 229 N. H. Professor WARD.

Individual Research Courses

121. Invertebrate Morphology and Parasitology.—(1-2 units).* Time to be arranged. Professor WARD.

122. Vertebrate Morphology.—(1-2 units).* Time to be arranged. Assistant Professor ADAMS.

123. Faunistic and Systematic Zoology.—(1-2 units).* Time to be arranged. Professor VAN CLEAVE.

124. Experimental Zoology and Genetics.—(1-2 units).* Time to be arranged. Professor ZELENY.

125. Animal Ecology and Behavior.—Time and credits to be arranged. Professor SHELFORD.

126. Embryology and Cytology.—(1-2 units).* Time to be arranged. Professor SHUMWAY.

ANATOMY

1. Anatomy.—(For students in Athletic Coaching only.) *Note:* A laboratory fee of $5.

TIME TABLE FOR COURSES OF INSTRUCTION

SECOND SEMESTER, 1931-1932

EXPLANATION

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments are indicated by cross references.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For instance, under Art 14b, Applied Design, the prerequisites given are Art 2a and 11a. These two courses must be completed before Course 14b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit for undergraduate students is reckoned in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drawing room. The number of hours for which the course counts is shown in the parentheses after each course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in units. A unit course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study; four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of such courses. Courses of the intermediate groups "for graduates and advanced undergraduates" are in general (unless otherwise specified by the department concerned) evaluated as follows for graduate credit: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

For second-year graduate students, candidates for the doctor's degree, no record of units is kept.

Courses for Advanced Undergraduates and Graduates

Agron. 10. Special Work in Soil Physics.—*Prerequisite:* Agron. 28, junior standing. (3). Lect., 1 MWF; 205 Agr. Professor R. S. SMITH.

Agron. 11. Soil Biology.—*Prerequisite:* Agron. 28; Bact. 5a, junior standing. (3). Lect., 8 MWF; 302 Agr. Associate Professor SEARS.

Agron. 13. Soil Management.—Cropping systems; fertilizers; systems of soil treatment and management; soil type response. *Prerequisite:* Agron. 28, senior standing. (3). 9 MWF; 302 Agr. Professor BAUER.

Agron. 22. Plant Breeding.—*Prerequisite:* Zool. 15, junior standing. (3). Lect., 10 MWF; 302 Agr. Professor WOODWORTH, Mr. BONNETT.

Courses for Graduates

Agron. 104. Seminar in Agronomy.—(¼ unit). Once a week. Heads of divisions.

Agron. 114. Crop Production.—(1 unit). Once a week. Arrange. Professor BURLISON, Associate Professor DUNGAN.

Agron. 118. Research.—(½ to 4 units).* Arrange.

(a) **Soil Fertility.**—Professor DETURK.
(b) **Soil Physics.**—Professor R. S. SMITH.
(c) **Soil Biology.**—Professor DETURK.
(d) **Plant Breeding.**—Professor WOODWORTH.
(e) **Field Crops.**—Professor BURLISON, Associate Professor DUNGAN.

Agron. 119. Experiment Station Problems.—(See Animal Husbandry 103.) Professor MUMFORD.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

ANATOMY

(See Zoology.)

ANIMAL HUSBANDRY

Note: Certain courses in this department require laboratory fees varying from $1 to $5.

Courses for Undergraduates

An. Husb. 1. Introduction to Animal Husbandry.—Required of students not having had livestock judging in high school. (No credit in this course allowed to juniors and seniors.) (2). 3-5 TT; S.P. Mr. CRAWFORD, Mr. GARRIGUS.

An. Husb. 6. Livestock Management.—*Prerequisite:* An. Husb. 21. (5). 10 MTWTF; S.P. Professor EDMONDS.

An. Husb. 9b-v. Investigation with Thesis.—(Continuous through the year; credit is not given for either semester separately.) *Prerequisite:* 90 hours of university work, including not less than 20 hours pertinent to thesis problem, and approval of the head of the department. (5). Arrange.

(b) **Beef Cattle.**—Professor RUSK, Associate Professor SNAPP.
(d) **Horses.**—Professor EDMONDS.
(f) **Sheep.**—Assistant Professor KAMMLADE.
(h) **Swine.**—Professor CARROLL.
(k) **Poultry.**—Professor CARD.
(m) **Animal Nutrition.**—Professor MITCHELL.
(p) **Animal Genetics.**—Associate Professor ROBERTS.
(r) **Animal Pathology.**—Professor GRAHAM.
(t) **Meats.**—Associate Professor BULL.
(v) **Marketing.**—Associate Professor ASHBY.

An. Husb. 12. Special Problems.—*Prerequisite:* 90 hours of university work; approval of the head of the department. (5). Arrange. Members of the department.

An. Husb. 21. Principles of Feeding.—*Prerequisite:* Chem. 5; An. Husb. 1.

Credits	Section	Hours	Days	Room	Instructor
3	Lect.	2	W	553 Agr.	BULL and others
	A Quiz	2	MF	553 Agr.

An. Husb. 35. Animal Hygiene, Sanitation, Contagious Diseases of Farm Animals.—*Prerequisite:* An. Husb. 34; Bact. 5a. (2). 3 TT; An. Path. L. Professor GRAHAM.

An. Husb. 37. Poultry Management.—*Prerequisite:* An. Husb. 21. (3 or 4).* 9 MWF; Lab. 3-5 Th; 316 New Agr. Students may register for this course either with or without the laboratory. Professor CARD, Dr. SLOAN.

Courses for Advanced Undergraduates and Graduates

An. Husb. 10. Meat.—*Prerequisite:* An. Husb. 21 and 36. The class will visit a Chicago packing house. The cost of the trip will be about $15. (3). 1-4 TT; 128 Agr. Associate Professor BULL, Mr. OLSON.

An. Husb. 27. Sheep Husbandry.—*Prerequisite:* An. Husb. 3 and 6. (3). 11 MWF; 111 S.P. Assistant Professor KAMMLADE.

An. Husb. 28. History of Breeds of Live Stock.—*Prerequisite:* An. Husb. 3. It is recommended that this course precede An. Husb. 22. (3). 3 MWF; 316 New Agr. Heads of divisions.

An. Husb. 29. Systems of Live Stock Farming.—*Prerequisite:* Farm Man. 1; An. Husb. 6. The cost of farm inspection trips will be about $10. (2). 8 TT; 331 New Agr. Associate Professor WILCOX.

An. Husb. 31. Advanced Course in Animal Nutrition.—*Prerequisite:* 90 hours of university work, including An. Husb. 7. (3). Time to be arranged. Professor MITCHELL.

An. Husb. 32. Marketing Live Stock.—*Prerequisite:* 90 hours of university work; An. Husb. 3. *Prerequisite or concurrent:* An. Husb. 6. Inspection trip to a terminal market required; estimated cost of trip, $18. (2). 9 TT; 316 New Agr. Associate Professor ASHBY.

An. Husb. 33. Horse Production.—*Prerequisite:* An. Husb. 3 and 6. (3). 1 MWF; S.P. Professor EDMONDS.

An. Husb. 39. Poultry Production.—*Prerequisite:* An. Husb. 37. (3). Lect., 10 MW; Lab., 8-10 S; 316 New Agr. Professor CARD.

An. Husb. 41. Animal Genetics.—*Prerequisite:* Zool. 15. (3). 2 MWF; Gen. Bldg. Associate Professor ROBERTS.

Courses for Graduates

An. Husb. 103. Experiment Station Problems.—Once a week. (½ unit). Time to be arranged. Professor MUMFORD.

An. Husb. 112 a-f. Research.—(½ to 2 units).* Arrange.

(a) **Economic Factors in Meat Production.**—One to three times a week. Professor RUSK
(b) **Systems of Live Stock Farming.**—Twice a week. Professor CASE.
(d) **Animal Nutrition.**—Three to five times a week. Professor MITCHELL.
(e) **Animal Genetics.**—Three to five times a week. Associate Professor ROBERTS.
(f) **Poultry Husbandry.**—Three to five times a week. Professor CARD.

These courses may be taken during the summer by special permission.

BACTERIOLOGY

Note: Certain courses in this department require laboratory fees varying from $2.50 to $8.

For students entering prior to September, 1929

Major: 20 hours chosen from the courses offered by this department. Five hours may be chosen from the following courses offered by other departments: Dairy bacteriology (dairy husbandry).

Minors: 20 hours chosen from one or two of the following: Chemistry, botany, zoology, physiology.

For students entering after September 1, 1929

Major: 20 hours chosen from the courses offered by this department. Dairy Husbandry 10 (advanced dairy bacteriology) may be offered in partial satisfaction of this requirement. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects: Chemistry and botany. At least eight hours must be offered in each subject if two are chosen.

Bact. 5a. Introductory Bacteriology and Sanitary Science.—*Prerequisite:* Sophomore standing; or consent of the instructor.

BOTANY

Note: Certain courses in this department require laboratory fees varying from $1 to $3.

For students entering prior to September, 1929

Major: 20 hours of botany exclusive of courses 1, 5, and 11.

Minors: 20 hours chosen in consultation with the head of the department from not more than three subjects in the following list: Agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least 8 hours must be offered in one subject.

Credit for seniors who take Botany 1 or 5 will be reduced one hour.

For students entering after September 1, 1929

Major: 20 hours of botany exclusive of courses 1 and 5, and inclusive of courses 2a or 2b, 3, and at least 5 hours in courses listed for advanced undergraduates and graduates.

Minors: 20 hours in one or two departments chosen in consultation with the head of the department from the following list: Agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least eight hours must be offered in each department, if two are chosen.

Bot. 16. Algae.—*Prerequisite:* Bot. 2a, and junior standing. (3). 8-10 TTS; 204 Entom. Dr. HAGUE.

Bot. 42. Fungi.—*Prerequisite:* Bot. 2a, and junior standing. (3 or 5).* 1-3 MWF; 304 N.H. Professor STEVENS.

Courses for Advanced Undergraduates and Graduates

Note: Time schedule is for 3 hours credit. For more credit arrange.

Bot. 20. Cytology.—*Prerequisite:* 15 hours of botany inclusive of 45, and junior standing. (3 or 5).* 8-10 MWF; 201 Entom. Professor BUCHHOLZ.

Bot. 34. Physiology.—*Prerequisite:* 15 hours of botany inclusive of Bot. 3, and junior standing. (3 or 5).* 1-3 MWF; 155 N.H. Professor HOTTES and assistant.

Bot. 77. Taxonomy of Pathogenic Fungi.—*Prerequisite:* 15 hours of botany inclusive of Bot. 7, and junior standing. (3 or 5).* 11 Tu; the rest arrange; 304 N.H. Professor STEVENS.

Bot. 88. Ecology.—Plant Communities. *Prerequisite:* 15 hours of botany inclusive of Bot. 8, and junior standing. (3 or 5).* 10-12 MWF; 216 N.H. Associate Professor VESTAL.

Bot. 90b. Thesis Course.—*Prerequisite:* 15 hours of botany and senior standing. (2). Time to be arranged.

Bot. 91b. Honors Course.—*Prerequisite:* 15 hours of botany and senior standing. (2). Time to be arranged.

Courses for Graduates

Bot. 110. Botanical Discussion.—No credit. Required of all graduate students in botany and members of the instructional staff. 4 Tu; 258 N.H.

Bot. 112. Discussions in Plant Morphology.—(¼ unit). 4 F; 205 Entom. Professor BUCHHOLZ.

Bot. 113. Discussions in Physiology.—(¼ unit). 4 Th; 155 N.H. Professor HOTTES.

Bot. 117. Discussions in Pathology and Mycology.—(¼ unit). 4 W; 304 N.H. Professor STEVENS.

Bot. 118. Discussions in Ecology.—(¼ unit). 4 M; 204 N.H. Associate Professor VESTAL.

Research Courses

Bot. 120. Embryology of Seed Plants.—(½ to 2 units).* (Bot. 112 to be taken concurrently.) 1 hour on either MWF from 1 to 3, the rest arrange; 201 Entom. Professor BUCHHOLZ.

Bot. 122. Experimental Morphology.—(½ to 2 units).* (Bot. 112 to be taken concurrently.) 1 hour on either MWF from 1 to 3, the rest arrange; 201 Entom. Professor BUCHHOLZ.

Bot. 130. Physiology.—(½ to 2 units).* (Bot. 113 to be taken concurrently.) 1 hour on either MWF from 1 to 3, the rest arrange; Bot. Annex. Professor HOTTES.

CERAMIC ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $2 to $7.50.

Cer.E. 4. Ceramic Materials.—*Prerequisite:* Cer. 1. (3). 1-4 MWF; 113 and 114 Cer.

Cer.E. 8. Glass Technology.—*Prerequisite:* Chem. 40 and Cer. 14. (2). Arrange.

Cer.E. 10. Cements.—*Prerequisite:* Chem. 40 and registration in Cer. 28. (3). 10 MWF; 214 Cer.

Cer.E. 11. Drying Clay Products.—*Prerequisite:* Phys. 1a-1b, 3a-3b; Cer. 1. (3). 11 MWF; 218 Cer.

Cer.E. 14. Glasses and Glazes.—*Prerequisite:* Cer. 5 and registration in Chem. 40. (3). 11 TT; 218 Cer.; 8-11 TT; 113 and 114 Cer.

Cer.E. 20. Refractory Materials.—*Prerequisite:* Chem. 40. (2). 4 TT; 218 Cer.

Cer.E. 24. Ceramic Engineering Design.—*Prerequisite:* Cer. 23; T.A.M. 3. (3). 1-4 MWF; 212 Cer.

Cer.E. 28. Pyrochemical Problems.—*Prerequisite:* Cer. 14; Chem. 40. (2). 9 MW; 214 Cer.

Cer.E. 98. Thesis.—(3-5).* Arrange.

Courses for Graduates

Cer.E. 101. Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (¾ unit). Arrange.

Cer.E. 102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. Lectures; seminar; laboratory. (1 or 2 units).* Arrange.

Cer.E. 104. Technology of Glass.—Lectures and laboratory. (1 or 2 units).* Arrange.

CHEMICAL ENGINEERING

(See Chemistry.)

CHEMISTRY

Note: Certain courses in this department require laboratory fees varying from $3 to $18.

For students entering prior to September, 1929

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42b, 43b, 50a, and courses in the industrial, sanitary, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, and 6 and inclusive of courses in qualitative, quantitative, and organic chemistry.

Minors: 20 hours, chosen from not more than three of the following: bacteriology, botany, geology, mathematics, philosophy, physiology, physics, entomology, and zoology.

For students entering after September 1, 1929

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, and 6 and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours, chosen from not more than two of the following: Bacteriology, botany, geology, mathematics, philosophy, physiology, physics, entomology, and zoology. At least eight hours must be offered in each subject if two are chosen.

Courses for Undergraduates

Chem. 1. Inorganic Chemistry.—*Prerequisite:* One unit of entrance credit in physics, or 2½ units of entrance credit in mathematics, or registration in Math. 1a, or 2, or 3.

Quiz section assignments will be made by the instructor after registration is complete.

(Section C is limited to 20 premedic students.)

Chem. 90b. Thesis.—(Required of seniors in chemistry and chemical engineering.) *Prerequisite:* Chem. 24, 34a, 40, 41, 42b, and 43b or the consent of the head of the department. (3 to 5).* A minimum of five hours required for graduation. The subjects available include inorganic, analytical, organic, physical, electro, food, x-ray, sanitary, physiological, industrial, metallurgical, ceramic, phyto-, and photo-, chemistry. Professor ADAMS, in charge.

Chem. 91b. Elements of Glass-blowing.—*Prerequisite:* Two years' work in chemistry. (1). Arrange. Mr. ANDERS.

---

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

Courses for Advanced Undergraduates and Graduates

Chem. 12b. Teachers' Course.—*Prerequisite:* 13 hours of chemistry and senior or graduate standing. Open to students who expect to teach. (3). No graduate credit to chemistry students. 8 WF; 103 Chem.; practice teaching to be arranged. Dr. R. M. PARR.

Chem. 27. Special Methods and Instruments in Quantitative Analysis.—*Prerequisite:* Chem. 24, 34a, and 40, 41 or registration in 40 and 41. (Limited to 20 students.)

Courses for Graduates

Graduate students whose major subject is in some department other than chemistry must have had the equivalent of 15 university credits in chemistry, and the ground covered should include satisfactory work in general chemistry and in qualitative and quantitative analysis and elementary organic chemistry. Such students are advised to make selections from the following courses: Chemistry 40, 41, 42b, 43b, 27, 34a, 36b and 37b, 50a, 15a, and 97b. Courses of a more special nature will not as a rule be accepted for graduate work unless preceded by one of the courses above. Graduate students who are candidates for an advanced degree in chemistry must have had the equivalent of 25 university credits in chemistry, properly distributed.

Graduate students whose major subject is in some department other than chemistry and who intend to take a first minor in chemistry or any branch of chemistry toward the Ph.D. degree must include among the courses taken Chemistry 40 and 41, or must have had the equivalent.

Graduate students who are candidates for the A.M. or M.S. degree in chemistry must include in the courses taken Chemistry 40 and 41, or must have had the equivalent. Graduate students who are candidates for the Ph.D. degree in any branch of chemistry must include among their courses Chemistry 40, 41, 42b and 43b, or must have had the equivalent. Those courses (with the exception of Chemistry 12b) listed under the heading "Advanced Undergraduate and Graduate Courses" may be all counted toward advanced degrees in chemistry.

Chem. 101b. Inorganic Chemistry.—The less familiar elements and their relationship in the periodic system. (½ unit). (For laboratory work see Chem. 102b.) Twice a week. 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102b. Inorganic Chemistry.—Inorganic preparations and qualitative analysis of the less familiar elements. (Laboratory work to accompany or follow Chem. 101b.) Arrange. (¼ to ¾ unit).* Professor HOPKINS.

Chem. 105b. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Once, twice, or three times per week. Seminar, 11 S; 162 Chem. Special topic: Structure of Inorganic Molecules (Dr. BAILAR). 9 MW; 105 Chem.A. Professor HOPKINS.

Chem. 124b. Quantitative Analysis.—A modern survey of advanced principles, calculations, experimental methods and applications. Lectures with or without laboratory. Twice a week. (½ to 1¼ units).* 11 MF; 116 Chem. Associate Professor REEDY, Assistant Professor SMITH.

Chem. 125b. Analytical Chemistry.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) Once a week. (¼ to 1 unit).* 9 S; 217 Chem. Additional meetings arrange. Professor CLARK.

Chem. 127b. Modern Application of Radiation to Chemical and Industrial Problems.—(X-rays, radio activity, optical spectroscopy.) (½ to 1 unit).* Twice a week. 10 TT; 217 Chem. Laboratory, arrange; 308 Chem. Professor CLARK.

Chem. 133b. Organic Chemistry.—(¾ unit). Twice a week. 11 TT; 217 Chem. Professor ADAMS.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange. 219 Chem. Professor MARVEL.

Chem. 135b. Organic Chemistry.—(Seminar). (¼ unit). Once a week 10 W; 217 Chem. Professor ADAMS.

Chem. 145b. Physical Chemistry.—(Seminar). (¾ unit). Twice a week. 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 150b. Physiological Chemistry.—(¾ unit). Twice a week. 9 TT; 111 Chem. Professor ROSE.

Chem. 152b. Physiological Chemistry.—(½ to 1 unit).* Chiefly laboratory. Arrange. 463 Chem. Professor ROSE, Assistant Professor DU VIGNEAUD.

Chem. 155b. Physiological Chemistry.—(Seminar). Required of all students majoring in physiological chemistry. (¾ unit). Two hours a week. 9-11 F; 456 Chem. Professor ROSE.

Chem. 160b. Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (¾ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

Chem. 161b. Chemical Plant Design.—*Prerequisite:* Chem. 61a and 61b. (¾ unit). Twice a week. 9 TT; 162 Chem. Associate Professor KRASE.

Chem. 186b. Sanitary Chemistry.—(½ to 1¼ units).* Arrange. One to five times a week. 60-B Chem. Professor BUSWELL.

Chem. 190b. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS, Dr. COPLEY.

Inorganic Chemistry.—Professor HOPKINS, Associate Professor REEDY, Dr. BAILAR, Dr. STILLWELL, Dr. COPLEY.

Analytical Chemistry.—Professor CLARK, Associate Professor REEDY, Assistant Professors SMITH, ENGLIS.

Food and Phyto-Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors NOYES, ADAMS, MARVEL, Associate Professors SHRINER, FUSON, Dr. BAILAR.

---

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

Chem. 190b. (Concluded)

Sanitary Chemistry.—Professor BUSWELL.

Physiological Chemistry.—Professor ROSE, Assistant Professor DU VIGNEAUD.

Industrial Chemistry.—Professor KEYES, Associate Professor KRASE.

Ceramic Chemistry.—Professor PARMELEE.

CIVIL ENGINEERING

CLASSICS

For students entering prior to September, 1929

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, 17, and 55.

Minors: 20 hours chosen from not more than two of the following: Foreign language (Latin being especially recommended), English literature, history, and philosophy.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

Latin

Major: 20 hours, excluding Latin 11a-11b, 6, 1a-1b, 13, 20, 56 and including six hours in translation courses for advanced undergraduates and graduates.

Minors: 20 hours, chosen from not more than two of the following: Foreign language (Greek being especially recommended), English literature, history, and philosophy.

Classics

Major: 20 hours in Greek and Latin, excluding Greek 1a-1b, 15, 16, 17, 55, and Latin 11a-11b, 6, 1a-1b, 9, 13, 20, and 56. At least six hours shall be offered in the secondary language and the remaining hours in the primary one.

Minors: 20 hours chosen from not more than two of the following: Foreign language, English literature, history, and philosophy.

For students entering after September 1, 1929

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, and 17.

Minors: 20 hours chosen from not more than two of the following: Foreign language (Latin being especially recommended), English literature, history, and philosophy. At least eight hours must be taken in each subject, if two are chosen.

Latin

Major: 20 hours, excluding Latin 11a-11b, 6, 1a-1b, 13, and 20, and including six hours in translation courses for advanced undergraduates and graduates.

GREEK

Courses for Undergraduates

Greek 1b. Elementary Greek (continuation of 1a).—(4). 8 TWTF; 114 L.H. Dr. MYLONAS.

Greek 4. Homer.—Selections from the Iliad. *Prerequisite:* Greek 3 or an equivalent. (3). 11 MWF; 114 L.H. Mr. DUNKIN.

Greek 17. Greek Drama in English Translation.—*Prerequisite:* Presupposes no knowledge of Greek and is open to all students except freshmen. (2). 2 TT; 114 L.H. Associate Professor PERRY.

Course for Advanced Undergraduates and Graduates

Greek 8. Greek Oratory; Aristotle and Theocritus.—*Prerequisite:* Greek 4 and 5. (3). 9 TTS; 114 L.H. Dr. MYLONAS.

Courses for Graduates

Preparation for graduate work in Greek must include at least two years of preparatory Greek, two years of college Greek, and two years of college Latin.

Greek 105b. Aristotle's Ethics.—(1 unit). Twice a week. Arrange. Professor OLDFATHER.

Greek 106b. Greek Drama, Comedy.—(1 unit). Twice a week. Arrange. Associate Professor PERRY.

Greek 110b. See Latin 110b.

LATIN

Courses for Undergraduates

Latin 11b. Elementary Latin (continuation of 11a).—(4). Three hours credit for seniors. 8 TWTF; 120 L.H. Mr. RAPP.

Latin 1b. Vergil.—*Prerequisite:* Three entrance units in Latin or Latin 6. (4). 1 TWTF; 114 L.H. Mr. DUNKIN.

Latin 12b. Sallust and Cicero (De Senectute).—*Prerequisite:* Four entrance units in Latin or Latin 1a-1b. (4). 9 TWTF; 120 L.H. Mr. RAPP.

Latin 4. Horace and Vergil.—*Prerequisite:* Latin 12a-12b or an equivalent. (3). 10 MWF; 120 L.H. Associate Professor PERRY.

Latin 5b. Latin Composition.—*Prerequisite:* Three entrance units in Latin or Latin 6. Required to secure the department's recommendation to teach. (1). 4 Th; 120 L.H. Professor CANTER.

Latin 9. Teachers' Course.—*Prerequisite:* 14 hours of Latin acceptable for a major. Required to secure the department's recommendation to teach. (2). 11 TT; 114 L.H. Professor CANTER.

Roman Life and History; Roman Archaeology

Latin 13. Roman Life.—*Prerequisite:* Sophomore standing. Knowledge of Latin not required. (1). 3 Th; 202 L.H. Dr. MYLONAS.

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $5.

For students entering prior to September, 1929

Major: 20 hours from courses offered in the department, except Entom. 1, 2, and 31.

Minors: 20 hours in not more than three of the following: Zoology, botany, physiology, chemistry, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite, and may be followed by any of the other courses for undergraduates or by 6, 10, 20, or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Students preparing for service as economic entomologists should take as many of the courses offered as possible and should consult the head of the department.

For students entering after September 1, 1929

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: Zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite, and may be followed by any of the other courses for undergraduates or by 6, 10, 20, or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Students majoring in entomology should take as many of the courses offered as possible, including some work in classification, morphology, and control, and should consult the head of the department.

MATHEMATICS

For students entering prior to September, 1929

Major: 20 hours made up from any undergraduate courses offered by the department except Math. 1a, 2, 3, 4, 5, and 8. The courses selected must include Math. 7 and 9, and at least one of the following courses: Math. 10, 16, 18, 20, 21, 30, 40, 90. For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: Math. 1; or first semester, Math. 2 (or 3) and 4; second semester, Math. 5. Sophomore year: first semester, Math. 7 (Section T); second semester, Math. 9 (Section T) and 19.

Minors: 20 hours selected from not more than three of the following subjects: Astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, and surveying. At least 8 hours must be offered in some one subject.

Credit for seniors who take Math. 1a, 1b, 2, 3, 4, 5, 6, or 6a will be reduced one hour.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

For students entering after September 1, 1929

Major: 20 hours, exclusive of Math. 1a, 1b, 2, 3, 4, 5, 6, 6a, 8a, and 8b (and all courses taken during the freshman year) inclusive of Math. 7 and 9, and two semesters of 70, 71, 72.

For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4; second semester, Math. 6. Sophomore year: first semester, Math. 7 (Section T); second semester, Math. 9 (Section T) and 19.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: Astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Credit for seniors who take Math. 1a, 1b, 2, 3, 4, 5, 6, or 6a will be reduced one hour.

Courses for Undergraduates

Math. 1b. Introduction to College Mathematics.—This course is designed as a two-semester course to give in a unified way an introduction to mathematics, including material from college algebra, trigonometry, analytical geometry, and elementary calculus. A student taking Math. 1a and 1b will not take Math. 2, 3, 4, or 6. *Prerequisite:* Math. 1a.

Courses for Advanced Undergraduates and Graduates

T.A.M. 42. Properties of Engineering Materials: Specifications and Inspection.—*Prerequisite:* T.A.M. 1, 3, and 63. (3 credits or ½ unit). Time to be arranged. Professor SEELY.

T.A.M. 44. Laboratory Work in Testing Materials.—*Prerequisite:* T.A.M. 1, 3, and 63. (3 credits or ½ to 1 unit).* Time to be arranged. Professor MOORE.

T.A.M. 46. Advanced Technical Mechanics.—*Prerequisite:* T.A.M. 1 and 3 or equivalent work in mathematics and physics. (2 credits or ½ unit). Time to be arranged. Professor WESTERGAARD.

Courses for Graduates

T.A.M. 102. Resistance of Materials.—(1 unit). Twice a week. Time to be arranged. Professor MOORE.

T.A.M. 103. Hydraulics and Hydraulic Engineering.—(½ to 1 unit).* Twice a week. Time to be arranged. Professor ENGER.

T.A.M. 104. Experimental Work in the Laboratory of Applied Mechanics.—(½ to 1 unit).* Twice a week. Time to be arranged. Professors ENGER, MOORE, and RICHART.

T.A.M. 105. Experimental and Analytical Work in Reinforced Concrete.—(1 to 2 units).* Twice a week. Time to be arranged. Professor RICHART.

T.A.M. 106. Theory of Elasticity and Applications to Engineering Problems.—(1 unit). Three times a week. Time to be arranged. Professor WESTERGAARD.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating that they have been accepted. Days and sections will be assigned according to proficiency.

Service in the bands takes the place of the regular military drill.

Mil. Bands 2. Freshman Band.—(1). Twice a week, by assignment. Director HARDING.

Mil. Bands 4. Sophomore Band.—(1). Twice a week, by assignment. Director HARDING.

Mil. Bands 6. Junior Band.—Twice a week, by assignment. Director HARDING.

Mil. Bands 8. Senior Band.—Twice a week, by assignment. Director HARDING.

MILITARY SCIENCE AND TACTICS

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b." Students who have had training in a senior R.O.T.C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student mus t put on his study-list, *not* the possible units or credits as shown here, but the number of units or credit s for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $4.50.

Major: 20 hours from courses offered in the department. At least 5 hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than 8 hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, or 6) or education.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering. For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.

Sophomore year: Physics 1a-1b, 3a-3b, and calculus.

Junior year: Physics 14, 16, 36, 44.

Senior year: Physics 20, 22, 23, 30, 45, 46, 78.

PHYSIOLOGY

Note: Certain courses in this department require a laboratory fee of $3.50.

For students entering prior to September, 1929

Major: 20 hours from courses offered in the department, exclusive of Physiol. 1.

Minors: 20 hours in not more than three of the following: Botany, bacteriology, chemistry, entomology, and zoology.

Seniors registered in Physiol. 1, 2, 4, 6 will receive one hour less credit.

For students entering after September 1, 1929

Major: 20 hours from courses offered in the department exclusive of Physiol. 1.

Minors: 20 hours in not more than two of the following: Botany, bacteriology, chemistry, entomology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

TIME TABLE FOR COURSES OF INSTRUCTION

FIRST SEMESTER, 1932-1933

EXPLANATION

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references.

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For instance, under Art 9a, Commercial Art, the prerequisites given are Art 2b and 5a. These two courses must be completed before Course 9b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit for undergraduate students is reckoned in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drawing room. The number of hours for which the course counts is shown in the parentheses after each course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in units. A unit course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study; four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of such courses. Courses of the intermediate groups "for graduates and advanced undergraduates" are in general (unless otherwise specified by the department concerned) evaluated as follows for graduate credit: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

For second-year graduate students, candidates for the doctor's degree, no record of units is kept.

	T Lab.	1–3	F	331 New Agr.	

Agr. Econ. 29. Investigation with Thesis.—(Formerly F.O.M. 10a.) This course is continuous throughout the year; credit is not given for either semester separately. *Prerequisite:* 90 hours of university work, including not less than 20 hours pertinent to the thesis problem; and approval of the head of the department. (5). Arrange. Professor CASE and others.

Agr. Econ. 39. Investigation with Thesis.—(Formerly An. Husb. 9u.) This course is continuous throughout the year; credit is not given for either semester separately. *Prerequisite:* 90 hours of university work, including 20 hours pertinent to the thesis problem; and the approval of the head of the department. (5). Arrange. Associate Professor ASHBY.

Courses for Advanced Undergraduates and Graduates

Agr. Econ. 10. Economics of Agriculture.—(Formerly Econ. 16.) *Prerequisite:* Econ. 1 or 2. (3). 11 MWF; 316 New Agr. Assistant Professor NORTON.

Agr. Econ. 22. Types and Systems of Farming.—(Formerly F.O.M. 2.) *Prerequisite:* Agr. Econ. 20. Lectures and quiz. Local field trips will be arranged; estimated cost, $3. (3). 8 MWF; 316 New Agr. Professor CASE, Associate Professor WILCOX.

Agr. Econ. 24. Farm Operation.—(Formerly F.O.M. 4) *Prerequisite:* Agr. Econ. 20; 90 hours of university work. Local field trips will be arranged; estimated cost, $3. (2). 11 TT; 316 New Agr. Assistant Professor JOHNSTON.

Agr. Econ. 26. Land Tenure.—(Formerly F.O.M. 6.) *Prerequisite:* Econ. 1 or 2; 90 hours of university work. (2). 9 TT; 316 New Agr. Professor CASE.

Agr. Econ. 30. Marketing and Prices of Agricultural Products.—(Formerly Econ. 13.) *Prerequisite:* Econ. 1 or 2; junior standing.

3	Lect.	10	M	111 New Agr.	STEWART
	C Quiz	10	WF	111 New Agr.	STEWART
	D Quiz	11	WF	111 New Agr.	STEWART

Agr. Econ. 36. Marketing Horticultural Products.—(Formerly Hort. 46.) *Prerequisite:* Econ. 1 or 2; 90 hours of university work. Inspection trip, costing about $20, required. (3). 3 MWF; 203 V.G. Professor LLOYD.

Agr. Econ. 38. Livestock Marketing Problems.—(See An. Husb. 12.) *Prerequisite:* 90 hours of university work; approval of the head of the department. (5). Arrange. Members of the department.

Courses for Graduates

Agr. Econ. 109. Seminar. Thesis Course.—(Formerly Econ. 118c and F.O.M. 110.) All graduate students majoring in Agricultural Economics must register in Agr. Econ. 109, but only those students writing theses acceptable for the degree of Master of Science will be given credit. (1 to 2 units).* Once a week. Arrange. Members of the department.

Agr. Econ. 110. Theory of Agricultural Economics.—(Formerly Econ. 130.) (1 unit). Arrange. Associate Professor STEWART.

Agr. Econ. 111. Agricultural Prices and Statistics.—(Formerly Econ. 131.) (1 unit). Arrange. Assistant Professor NORTON.

Agr. Econ. 112. Agricultural Economics Research.—(Formerly Econ. 132.) Only those who write acceptable reports of investigation will receive credit. (1 to 2 units).* Arrange. Associate Professor STEWART.

Agr. Econ. 120. Farm Management Principles and Investigational Methods.—(Formerly F.O.M. 101.) (1 unit). Twice a week. Arrange. Professor CASE.

Agr. Econ. 135. Marketing Fruits and Vegetables.—(Formerly Hort. 105.) (1 to 2 units).* Arrange. Professor LLOYD.

Courses for Advanced Undergraduates and Graduates

Agron. 7. Advanced Crop Production.—*Prerequisite:* Agron. 25, junior standing. (3). Lect., 8 MWF; 302 Agr. Professor Burlison, Associate Professor Dungan.

Agron. 11. Rôle of Micro-organisms in Soil Fertility.—*Prerequisite:* Agron. 28; Bact. 5a, junior standing. (3). Lect., 9 MWF; 302 Agr. Associate Professor Sears.

Agron. 29. Field Plot Technic.—*Prerequisite:* Senior standing. (3). Lect., 10 MWF; 302 Agr. Professor WOODWORTH, Mr. MUMM.

Agron. 32. Physical Methods of Soil Investigation.—Physical properties of soils, their relation to productivity and their investigation by field and laboratory methods. (Given 1932-33 and alternate years thereafter.) *Prerequisite:* Agron. 28, junior standing. (3). 1-3 MWF (Lect., Disc., Lab.); 657 Agr. Mr. STAUFFER.

Courses for Graduates

Agron. 101. Soil Investigations.—(1 unit). Twice a week. Arrange. 306 Agr. Professor DETURK.

Agron. 104. Seminar.—(¼ unit). Once a week. Arrange. 301 Agr. The Graduate Staff.

Agron. 112. Advanced Plant Genetics.—(1 unit). Twice a week. Arrange. Professor WOODWORTH.

Agron. 118. Research.—(½ to 4 units).* Arrange.
Soils.—Professors BAUER, DETURK, R. S. SMITH.
Crops.—Professors BURLISON, WOODWORTH; Associate Professor DUNGAN.

ANATOMY

(See Zoology.)

ANIMAL HUSBANDRY

Note: Certain courses in this department require laboratory fees varying from $1 to $5.

Courses for Undergraduates

An. Husb. 1. Introduction to Animal Husbandry.—Required of students not having had livestock judging in high school. (No credit in this course allowed to juniors and seniors.) (2). 3-5 TT; S. P. Mr. CRAWFORD.

An. Husb. 3. Livestock Judging.—*Prerequisite:* An. Husb. 1 or equivalent. (5). 10-12 MTWTF; S. P. Associate Professor SNAPP.

An. Husb. 9a-u. Investigation with Thesis.—(Continuous throughout the year; credit is not given for either semester separately.) *Prerequisite:* 90 hours of university work, including 20 hours pertinent to the thesis problem; and the approval of the head of the department. (5). Arrange.

(a) **Beef Cattle.**—Professor RUSK, Associate Professor SNAPP.
(c) **Horses.**—Professor EDMONDS.
(e) **Sheep.**—Assistant Professor KAMMLADE.
(g) **Swine.**—Professor CARROLL.
(j) **Poultry.**—Professor CARD.
(l) **Animal Nutrition.**—Professor MITCHELL.
(n) **Animal Genetics.**—Associate Professor ROBERTS.
(q) **Animal Pathology.**—Professor GRAHAM.
(s) **Meats.**—Associate Professor BULL.
(u) **Marketing.**—See Agr. Econ. 39. Associate Professor ASHBY.

An. Husb. 21. Principles of Feeding.—*Prerequisite:* Chem. 5; An. Husb. 1.

Credits	Section	Hours	Days	Room	Instructor
3	Lect.	2	W	553 Agr.	BULL
	A Quiz	2	MF	553 Agr.	BULL

An. Husb. 34. Anatomy and Physiology, and Non-Contagious and Parasitic Diseases of Farm Animals.—*Prerequisite:* An. Husb. 21. (3). 1 MWF; An. Path. L. Professor GRAHAM.

An. Husb. 36. Meat.—(2). 9 TT; 127 Agr. Associate Professor BULL.

An. Husb. 38. Poultry Breeds and Judging.—*Prerequisite:* An. Husb. 37. (3). 3-4:30 MTWTF; Poul. Plant. (This course is concluded at the beginning of the Christmas recess). Dr. SLOAN.
From the students taking or having had this course will be chosen the team to represent the University in the Annual Mid-West Intercollegiate Student Poultry Judging Contest. The class will visit a near-by poultry show. The cost of the trip will be from $10 to $15.

Courses for Advanced Undergraduates and Graduates

An. Husb. 7. Principles of Animal Nutrition.—*Prerequisite:* 90 hours of university work, including An. Husb. 21; Chem. 32. (5). Arrange. 553 Agr. Mr. HAMILTON.

An. Husb. 12. Special Problems.—*Prerequisite:* 90 hours of university work; approval of the head of the department. (5). Arrange. Members of the department.

An. Husb. 22. Advanced Stock Judging.—*Prerequisite:* An. Husb. 3. (3). 3 MTWTF; S. P. Heads of divisions.
From the students in this class will be chosen the team to represent the University in the Annual Intercollegiate Student Judging Contest.

An. Husb. 24. Meat.—*Prerequisite:* An. Husb. 10. (2 to 5).* Arrange. Associate Professor BULL.

An. Husb. 25. Beef Production.—*Prerequisite:* An. Husb. 6. (3). 2 MWF; 316 New Agr. Professor RUSK, Associate Professor SNAPP.

An. Husb. 26. Pork Production.—*Prerequisite:* An. Husb. 6. (3). 9 MWF; 316 New Agr. Professor CARROLL.

An. Husb. 40. Economics of Poultry Keeping.—*Prerequisite:* 90 hours of university work, including An. Husb. 37. (3). 8 MWF; 331 New Agr. Professor CARD.

Courses for Graduates

An. Husb. 112a-f. Research.—Arrange. One to three times a week. (½ to 2 units).*

(a) **Economic Factors Involved in Meat Production.**—Professor RUSK.
(b) **Systems of Livestock Farming.**—Professor CASE.
(c) **Animal Pathology.**—Professor GRAHAM.
(d) **Animal Nutrition.**—Professor MITCHELL.
(e) **Animal Genetics.**—Associate Professor ROBERTS.
(f) **Poultry Husbandry.**—Professor CARD.

An. Husb. 117. Animal Genetics.—(1 unit). One to three times a week. Arrange. Associate Professor ROBERTS.

An. Husb. 118. Animal Nutrition Seminar.—(½ unit). Two hours a week. Arrange. Professor MITCHELL.

An. Husb. 119. Laboratory Methods in Animal Nutrition.—(½ to 1 unit).* Two to five times a week. Arrange. Professor MITCHELL.

An. Husb. 120. Laboratory Methods in the Diagnosis of Animal Diseases.—(½ to 1 unit).* Two to five times a week. Arrange. Professor GRAHAM.

An. Husb. 121. Laboratory Methods in Animal Genetics.—(½ to 1 unit).* Two to five times a week. Arrange. Associate Professor ROBERTS.

Courses for Graduates

Cer.E. 101. The Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (1 unit).

Cer.E. 102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. (1 or 2 units).*

CHEMISTRY

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42b, 43b, 50a, and courses in the industrial, sanitary, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, 93a, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

Courses for Undergraduates

Note: Attention is called to the general survey courses, Chemistry 7 and 93a.

Chem. 1. Inorganic Chemistry.—*Prerequisite:* One unit of entrance credit in physics, or 2½ units of entrance credit in mathematics, or registration in Math. 1a or 2 or 3. Students may register in either lecture section but are required to take the quiz and laboratory in some one section.

[1]Students who have received entrance credit for high school chemistry are given only 3 hours credit for Chem. 1. Seniors will receive only 3 hours credit.

Chem. 90a. Thesis.—(*Note:* Beginning September 1932 senior research in chemistry and chemical engineering will be optional instead of required. Each student who desires research must receive special permission both from the instructor under whom he is to work and from the head of the division in which the research is to be taken. Such written permission should be presented, at the time of registration, to the adviser for the chemists or chemical engineers.) *Prerequisite:* Chem. 24, 34a, 40, 41, 42, and 43b, or the consent of the head of the department. (3 to 5).* Professor ADAMS (in charge).

Chem. 93a. General Chemistry.—Lectures, demonstrations, and recitations. An elementary résumé of the various fields of chemistry. (*Note:* This course is accepted in partial fulfilment of the general science requirement. It is not accepted as a prerequisite to other chemistry courses.) *Prerequisite:* Junior standing or consent of the instructor. (Registration for 1932-33 limited to 35 students.) (3). 2 MWF; 100 Chem. Professor BUSWELL and assistant.

Courses for Advanced Undergraduates and Graduates

Courses for Graduates

Chem. 101a. Inorganic Chemistry.—(½ unit). (For laboratory work see Chem. 102a.) Twice a week 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102a. Inorganic Chemistry.—(Laboratory work to accompany or follow Chem. 101a.) Arrange. (¼ to 1 unit).* Professor HOPKINS.

Chem. 105a. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Once, twice, or three times per week. Seminar, 11 S; 162 Chem. Special topic: Chemistry of non-aqueous solvents. (Dr. AUDRIETH). 9 MW; 105 Chem.A. Professor HOPKINS.

Chem. 123a. Qualitative Analysis.—(½ to 1¼ units).* Twice a week. 11 MF; 162 Chem. Laboratory. Arrange. Associate Professor REEDY.

Chem. 125a. Quantitative Analysis.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) (¼ to 1 unit).* 9 S; 217 Chem. Professor CLARK.

Chem. 126a. Quantitative Instrumental and Chemical Methods of Analysis in Organic Chemical Research.—(Ultimate bomb analysis, gas density, polarimetry, refractometry, spectrophotometry, colorimetry, microscopy, etc.). (½ to 1¼ units).* Twice a week. 8 TT; 308 Chem.A. Laboratory, arrange; 305-A Chem. Assistant Professor ENGLIS.

Chem. 127a. Modern Applications of Radiation to Chemical and Industrial Problems.—(X-rays, radioactivity and optical spectroscopy). (½ to 1 unit).* 10 TT; 217 Chem. Professor CLARK.

Chem. 132a. Organic Chemistry.—(First course). (¾ unit). 11 TT; 217 Chem. Associate Professor SHRINER.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange. 219 Chem. Professor MARVEL.

Chem. 135a. Organic Chemistry.—(Seminar). (¼ unit). Once a week. 10 W; 217 Chem. Professor ADAMS.

Chem. 136a. Organic Chemistry.—Special Topics. (¾ unit). Twice a week. 11 TT; 103 Chem. Professor MARVEL.

Chem. 145a. Physical Chemistry.—(Seminar). (¾ unit). Twice a week. 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 152a. Physiological Chemistry.—Chiefly laboratory. (½ to 1 unit).* Arrange. 463 Chem. Professor ROSE and assistant.

Chem. 155a. Physiological Chemistry.—(Seminar required of all students majoring in physiological chemistry). (¾ unit). Two hours a week. 9-11 F; 456 Chem. Professor ROSE.

Chem. 160a. Advanced Chemical Technology and Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

Chem. 161a. Chemical Plant Design.—Calculations and layout of equipment for recently developed processes. *Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 9 TT; 162 Chem. Associate Professor KRASE.

Chem. 186a. Sanitary Chemistry.—(½ to 1¼ units).* Arrange. One to five times a week. 60-B Chem. Professor BUSWELL.

Chem. 190a. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS, Dr. COPLEY.

Inorganic Chemistry.—Professor HOPKINS; Associate Professor REEDY; Dr. AUDRIETH, Dr. BAILAR, Dr. STILLWELL, Dr. QUILL, Dr. COPLEY.

Analytical Chemistry.—Professor CLARK; Associate Professor REEDY; Assistant Professors SMITH, ENGLIS.

Food Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK, Dr. STILLWELL.

Organic Chemistry.—Professors NOYES, ADAMS, MARVEL, FUSON; Associate Professor SHRINER; Dr. BAILAR.

Zymochemistry.—Professor BUSWELL.

Phytochemistry.—Assistant Professor ENGLIS.

Physiological Chemistry.—Professor ROSE.

Industrial Chemistry.—Professor KEYES; Associate Professor KRASE; Assistant Professor KISTLER.

Ceramic Chemistry.—Professor PARMELEE.

CLASSICS

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, and 17.

Minors: 20 hours chosen from not more than two of the following: foreign language (Latin being especially recommended), English literature, history, and philosophy. At least eight hours must be taken in each subject, if two are chosen.

Latin

Major: 20 hours, excluding Latin 1a-1b, 6, 11a-11b, 13, and 20, and including six hours in translation courses for advanced undergraduates and graduates.

Minors: 20 hours chosen from not more than two of the following: foreign language (Greek being especially recommended), English literature, history, and philosophy. At least eight hours must be offered in each subject, if two are chosen.

Classics

Major: 20 hours in Greek and Latin, excluding Greek 1a-1b, 15, 16, 17 and Latin 1a-1b, 6, 9, 11a-11b, 13, 20. At least six hours shall be offered in the secondary language and the remaining hours in the primary one.

Minors: 20 hours chosen from not more than two of the following: foreign language, English literature, history, and philosophy. At least eight hours must be offered in each subject, if two are chosen.

A. GREEK

Courses for Undergraduates

Greek 1a. Elementary Greek.—(4). 8 TWTF; 114 L.H. Dr. MYLONAS.

Greek 3. Second Year Greek. Plato.—*Prerequisite:* Greek 1a-1b. (3). 11 MWF; 114 L.H. Mr. DUNKIN.

Courses for Advanced Undergraduates and Graduates

Greek 5. Herodotus and Lyric Poets.—*Prerequisite:* Greek 3 and 4 or an equivalent. (3). 9 TTS; 114 L.H. Associate Professor PERRY.

Greek Life and History

For courses 15, 16, 18, and History 55 a knowledge of Greek is not presupposed.

Greek 15. Greek Athletics.—*Prerequisite:* Sophomore standing. (1). 1 Tu; 202 L.H. Dr. MYLONAS.

Greek 16. Life of the Ancient Greeks.—*Prerequisite:* Sophomore standing. (1). 3 Th; 120 L.H. Dr. MYLONAS.

Greek 18. Greek Archaeology.—*Prerequisite:* Sophomore standing. (2). 2 TT; 120 L.H. Dr. MYLONAS.

Greek History.—See History 55. 1 MWF; 202 L.H. Professor OLDFATHER.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

Courses for Graduates

Students desiring to take graduate work in Greek should have had at least three years of college Greek or an equivalent.

Greek 110a. See Latin 110a.

Greek 121. Thucydides.—(1 unit). Twice a week. Arrange. Associate Professor PERRY.

B. LATIN

Courses for Undergraduates

Latin 6. Cicero.—*Prerequisite:* Two entrance units in Latin or Latin 11a-11b. (4). 2 TWTF; 114 L.H. Mr. DUNKIN.

Latin 1a. Ovid.—*Prerequisite:* Three entrance units in Latin or Latin 6. (4). 1 TWTF; 114 L.H. Mr. RAPP.

Latin 12a. Plautus, Terence, Catullus.—*Prerequisite:* Four entrance units in Latin or Latin 1a-1b. (4). 9 TWTF; 120 L.H. Associate Professor PERRY.

Latin 3. Lucretius and Horace (Odes).—*Prerequisite:* Latin 12a-12b or an equivalent. (3). 10 MWF; 120 L.H. Professor CANTER.

Latin 5a. Latin Composition.—*Prerequisite:* Three entrance units in Latin or Latin 6. Required to secure the department's recommendation to teach. (1). 4 Th; 120 L.H. Professor CANTER.

Roman Life and History

Course 20 presupposes no knowledge of Latin and is open to all students except freshmen.

Latin 20. Mythology of Greece and Rome.—*Prerequisite:* Sophomore standing. (2). 11 TT; 202 L.H. Associate Professor PERRY.

Courses for Advanced Undergraduates and Graduates

Latin 23. Livy, Tibullus, and Propertius.—*Prerequisite:* 12 hours of Latin acceptable for a major. (3). 2 MWF; 120 L.H. Professor CANTER.

Latin 30a. Honors Course.—Thesis or a special course of study approved by the department. *Prerequisite:* Senior standing and 14 hours of Latin acceptable for a major. (2). Arrange. Professor CANTER.

Courses for Graduates

Students desiring to take graduate work in Latin should have had at least three years of College Latin in addition to the Latin presented to meet entrance requirements.

Latin 102. Roman Oratory.—(1 unit). Twice a week. 4 MW; 120 L.H. Professor CANTER.

Latin 104. Latin Paleography.—(1 unit). Twice a week. Arrange. Professor OLDFATHER.

Latin 110a. Bibliography and Criticism.—(1 unit). Arrange. Professors OLDFATHER, CANTER; and Associate Professor PERRY.

DAIRY HUSBANDRY

Note: Certain courses in this department require laboratory fees varying from $2 to $3.

Courses for Undergraduates

D.H. 1. Testing Dairy Products.—*Prerequisite:* D.H. 24b or 30 hours of university work. (3). 1-4 TT; 503 Agr. Assistant Professor OVERMAN, Mr. GARRETT.

D.H. 6a. Dairy Plant Operations.—*Prerequisite:* D.H. 1, 11, and 12, or registration therein. (3). Arrange. Associate Professor TRACY, Mr. TUCKEY.

D.H. 23a-j. Investigation with Thesis.—(Continuous throughout the year; credit is not given for either semester separately.) *Prerequisite:* 90 hours of university work including not less than 20 hours pertinent to thesis problem and approval of head of department. (5). Arrange.

(a) **Dairy Bacteriology.**—Professor PRUCHA, Assistant Professor BRANNON.
(c) **Dairy Chemistry.**—Assistant Professor OVERMAN.
(e) **Dairy Farming and Economic Milk Production.**—Professor FRASER.
(g) **Dairy Manufactures.**—Professor RUEHE, Associate Professor TRACY.
(j) **Dairy Production.**—Professors GAINES, YAPP; Associate Professor NEVENS.

Courses for Advanced Undergraduates and Graduates

D.H. 4. Ice Cream Making.—*Prerequisite:* D.H. 1, 11, 12; and 60 hours of university work. This course is accompanied by an inspection trip costing from $15 to $20. (5). 1-4 TT, 4 MWF; D. Mfrs. Associate Professor TRACY.

D.H. 10. Advanced Dairy Bacteriology.—*Prerequisite:* Bact. 5a and 5b; 60 hours of university work. (4). 1-4 MWF; 456 Agr. Professor PRUCHA, Assistant Professor BRANNON.

D.H. 17. Advanced Study of Dairy Breeds.—*Prerequisite:* D.H. 2 and 60 hours of university work. (3). 10 MWF; 553 Agr. Professor YAPP.

D.H. 20. Economic Problems in Dairy Farming.—*Prerequisite:* 60 hours of university work. (3). 9 MWF; 553 Agr. Professor FRASER.

D.H. 25. Advanced Study of Dairy Cattle Feeding.—*Prerequisite:* D.H. 2; 60 hours of university work. (2). Arrange. Associate Professor NEVENS.

Courses for Graduates

D.H. 101. Economic Milk Production.—(½ to 2 units).* Twice a week. Arrange. Professor FRASER.

D.H. 104. Dairy Bacteriology.—(½ to 1 unit).* Arrange. Professor PRUCHA.

D.H. 105. Dairy Manufactures.—(½ to 2 units).* Arrange. Professor RUEHE, Associate Professor TRACY.

D.H. 106. Dairy Bacteriology.—(½ to 2 units).* Arrange. Professor PRUCHA.

D.H. 107. Dairy Chemistry.—(½ to 2 units).* Arrange. Assistant Professor OVERMAN.

D.H. 108. Physiology of Lactation.—(½ to 2 units).* Once a week. Arrange. Professor GAINES.

D.H. 112a-f. Research.—(1 to 4 units).* Arrange. *Note:* Graduate students writing a thesis should so indicate when registering in Dairy Husbandry 112.

(a) **Dairy Bacteriology.**—Professor PRUCHA.
(b) **Dairy Chemistry.**—Assistant Professor OVERMAN.
(c) **Dairy Cattle Breeding.**—Professor YAPP.
(d) **Dairy Cattle Feeding.**—Associate Professor NEVENS.
(e) **Milk Production.**—Professor GAINES.
(f) **Dairy Manufactures.**—Professor RUEHE, Associate Professor TRACY.

ECONOMICS

(See also Business Organization and Operation, Public Utilities and Transportation, and Agricultural Economics.)

Major: For students in the College of Liberal Arts and Sciences, 20 hours made up of Economics 1 and other courses in economics for which it is a prerequisite.

Minors: 20 hours in any one or two of the following subjects: geography, history, philosophy, political science, and sociology.

Note: Economics 22 and 27 are open only to freshmen, without previous requirements.

Economics 1 is the fundamental course in economics. It is a prerequisite for most of the advanced courses, and students expecting to do advanced work in economics should take it in their sophomore year.

Courses for Undergraduates

Econ. 1. Principles of Economics.—*Prerequisite:* 30 hours of university work.

ENGLISH

(Including Rhetoric, Speech, and Scandinavian Languages.)

Major: 20 hours in English *excluding* Rhetoric 1, 2, 10, 12, 21, 22, English 10a, 10b, 20a, 20b, 41, 42, and *including* at least 10 hours in English literature, at least 3 hours in composition, and two courses from the advanced group in English literature.

Minors: 20 hours in (a) Latin or Greek or French or German or Spanish; or (b) in any two of those languages; or (c) in one of those languages and philosophy; or (d) in one of those languages and history. No language courses may be regarded as satisfying the minor requirement if they are excluded from the major of that department (excepting elementary courses in Greek, Latin, French 2a and Spanish 2a). At least eight hours must be offered in each subject.

Major in Speech

Major: 10 hours in speech, inclusive of Speech 7 and 8 and either 4 or 6; and 10 hours of English, exclusive of English 10a, 10b, 41, 42, and of Rhetoric 1, 2, 10, 12, 21, 22, and inclusive of one course in English literature from the advanced group.

Minors: 20 hours, in any one or two of the following subjects: psychology, philosophy, Greek, Latin, French, German, history, political science, economics, law, or sociology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in English 10 and Rhetoric 1-2.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $5.

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite, and may be followed by any of the other courses for undergraduates or by 6, 10, 20, or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Students majoring in entomology should take as many of the courses offered as possible, including some work in classification, morphology, and control, and should consult the head of the department. Seniors receive reduced credit in Entomology 1.

2	A Lect.	11	TT	202 Entom.	Balduf
	B Lect.	2	TT	202 Entom.	Balduf

Entom. 3a. Classification of Insects: Orders with gradual metamorphosis and principles of systematic entomology.—*Prerequisite:* Entom. 1, and 30 hours of university work. (5). Lab., 8-11 TT; Lect., to be arranged; 310 Entom. Assistant Professor Balduf.

Entom. 7a. Insect Morphology.—*Prerequisite:* Entom. 1, and 30 hours of university work. (3). 10-12 MWF; 312 Entom. Associate Professor Hayes.

Entom. 8a. Advanced Economic Entomology.—*Prerequisite:* Entom. 1, and 30 hours of university work. (3 or 5).* 1-4 TT; 312 Entom. Associate Professor Hayes.

Entom. 31. Essentials of Beekeeping.—*Prerequisite:* 30 hours of university work. (2). 1-3 TT; 104 Viv. Assistant Professor Milum.

Courses for Advanced Undergraduates and Graduates

Entom. 6. Special Problems.—*Prerequisite:* Any of the following: Entom. 3, 7, 8, 10, 20, 21, 22, or 31; senior standing. (2 to 5).* Saturday morning; additional hours to be arranged. Various instructors.

Entom. 20. Insect Control.—*Prerequisite:* Entom. 1 and senior standing. (4). Lab., 1-4 TT; Lect., to be arranged; 109 Entom. Professor Metcalf.

Courses for Graduates

The prerequisite for graduate work in entomology is two years of undergraduate biology, including zoology and entomology.

Entom. 102. Research in the Morphology and Embryology of Insects.—(½ to 2 units).* Arrange. Associate Professor Hayes.

Entom. 107a. Insect Anatomy.—(½ unit). 10-12 MWF; 312 Entom. Associate Professor Hayes.

Entom. 108. Research in Economic Entomology.—(½ to 2 units).* Arrange. Professor Metcalf.

Entom. 109. Research in Systematic Entomology.—(½ to 2 units).* Arrange. Professor Metcalf, Assistant Professor Balduf.

Entom. 110. Research in the Biology and Ecology of Insects.—(½ to 2 units).* Arrange. Professor Metcalf.

MATHEMATICS

Major: 20 hours, exclusive of Math. 1a, 1b, 2, 3, 4, 5, 6, 6a, 8a, and 8b (and all courses taken during the freshman year); inclusive of Math. 7 and 9, and two semesters of 70, 71, 72.

For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4; second semester, Math. 6. Sophomore year: first semester, Math. 7 (Section T); second semester, Math. 9 (Section T) and 19.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Credit for seniors who take Math. 2, 3, 4, 5, 6, or 6a will be reduced one hour.

M.E. 89. Heat Treatment of Metals.—*Prerequisite:* Senior standing in Mechanical or Railway Mechanical Engineering.

3	P	2–4	MWF	Mach. Lab.	
	QW	8–10	MWF	Mach. Lab.	

M.E. 98. Thesis.—*Prerequisite:* Senior standing. (3). Arrange.

M.E. 99. Inspection Trip.—*Prerequisite:* Senior standing. No credit.

Courses for Graduates

Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week. Arrange. Associate Professor GOFF.

M.E. 108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week. Arrange. Professor MACINTIRE.

M.E. 109. Machine Design.—Rational design; the application of mechanics of materials. Individual problems. (1 unit). Twice a week. Arrange. Professor LEUTWILER.

M.E. 112. Laboratory Investigation.—Combustion of fuel, boiler economy; steam engines and turbines; gas engines and producers; explosive mixtures; mechanical refrigeration; heating and ventilation. Original work. (1½ units). Three times a week. Arrange. Professors WILLARD, POLSON, KRATZ, HAM, and MACINTIRE.

MECHANICS

(See Theoretical and Applied Mechanics.)

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating that they have been accepted. Days and sections will be assigned according to proficiency.

Service in the bands takes the place of the regular military drill.

Mil. Bands 1. Freshman Band.—(1). Twice a week, by assignment. Director HARDING.

Mil. Bands 3. Sophomore Band.—(1). Twice a week, by assignment. Director HARDING.

Mil. Bands 5. Junior Band.—Twice a week, by assignment. Director HARDING.

Mil. Bands 7. Senior Band.—Twice a week, by assignment. Director HARDING.

MILITARY SCIENCE

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R. O. T. C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

P.E. 63. Swimming.—(Formerly A.C. 60). *Prerequisite:* Senior standing or consent of instructor. (2). 8 MTWTF; Pool, Old Gym. Mr. MANLEY.

PHYSICAL EDUCATION FOR WOMEN

Freshmen and Sophomores:—Of the four required semesters in physical education, the department requires: one semester of gymnastics (P.E. 42); one semester of swimming (P.E. 45, 46, 54); one semester of dancing (P.E. 47, 49, 51); and one semester of an elective.

Juniors and Seniors may receive credit for four courses in addition to the above requirement.

Major: See Curriculum in Physical Education for Women, page 68 in *Directions for Registration*.

Courses for Undergraduates

P.E. 40a. Swimming, Soccer, and Gymnastics.—For freshmen intending to specialize in physical education. (1). 3 MTWTF[1]; Pool, W.B. Miss Smith, Miss Huelster, Miss Kitzinger.

P.E. 41a. Hockey, Folk Dancing, and Gymnastics.—For sophomores specializing in physical education. (1). 2 MTWTF[1]; W. Gym. Miss Robertson, Miss Johnson, Miss Kitzinger.

P.E. 42. Sports and Gymnastics.—

Professional Courses for Women Specializing in Physical Education

P.E. 90a. History of Physical Education.—(Formerly P.E. 10a). *Prerequisite:* Senior standing. (1). 11 TT; 129 W.Gym. Professor FREER.

P.E. 95a. Methods.—(Formerly P.E. 15a). *Prerequisite:* Junior standing or consent of instructor. (3). 1 MWF; 128 W.Gym. Miss ROBERTSON.

P.E. 96a. Kinesiology.—(Formerly P.E. 16a). *Prerequisite:* Junior standing. (3). 8 MWF; 129 W.Gym. Miss KITZINGER.

P.E. 97a. Educational Practice.—*Prerequisite:* P.E. 95a, 95b, 96 (formerly P.E. 15a, 15b, 16); senior standing. (3). 1 MWF; 129 W.Gym. Assistant Professor LAWSON.

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $4.50.

Major: 20 hours from courses offered in the department. At least 5 hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than 8 hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, or 6) or education.

For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.
Sophomore year: Physics 1a-1b, 3a-3b, and calculus.
Junior year: Physics 14, 16, 36, 44.
Senior year: Physics 23, 30, 45, 46, 71, 72, 78.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering.

Physics 72a. Light Laboratory.—*Prerequisite:* Registration in Physics 71a. (2). 2-5 MW; 313 P.L. Dr. ALMY.

Courses for Graduates

Physics 104a. Electrical and Magnetic Measurements.—(1 unit). Arrange. 112 P.L. Professor KNIPP and Associate Professor WILLIAMS.

Physics 122a. Dynamics.—(1 unit). 8 MWFS; 302 P.L. Professor KUNZ.

Physics 125a. Hydrodynamics.—Especially modern problems in flow and turbulence. (½ unit). 8 TT; 302 P.L. Professor KUNZ.

Physics 127a. Recent Problems in Physics.—Relativity. (1 unit). 10 TTS; 202 P.L. Mr. MOTT-SMITH.

Physics 128a. Problems and Methods in Theoretical Physics.—(1 unit). 9 TTS; 306 P.L. Assistant Professor BARTLETT.

Physics 131a. Investigation of Special Problems.—(½ to 1 unit).* Arrange. Professor KNIPP.

Physics 170a. Light.—(1 to 2 units).* 11 TT, 204 P.L.; 2-5 MW, 313 P.L. Dr. ALMY.

Physics 184. Line Spectra and Atomic Structure.—(1 unit). 10 MWF; 119 P.L. Professor LOOMIS.

Physics 190. Research.—(1 to 3 units).* Arrange. Professors in the department.

Physics 198. Seminar.—(1 to 2 units).* Arrange. Professors in the department.

Physics 199. Physics Colloquium.—(No credit). 7:15 p.m. Th; 119 P.L. Professor LOOMIS.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

PHYSIOLOGY

Note: Certain courses in this department require a laboratory fee of $3.50.

Major: 20 hours from courses offered in the department exclusive of Physiol. 1.

Minors: 20 hours in not more than two of the following: botany, bacteriology, chemistry, entomology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Credit for Seniors who take Physiology 1, 2, or 4 will be reduced one hour.

Courses for Undergraduates

POLITICAL SCIENCE

Major: 20 hours from any courses offered by the department. A major may include three hours of constitutional history (Hist. 44 or 62).

Minors: 20 hours selected from one or two of the following subjects: history, economics, law, sociology, philosophy, and education. At least eight hours must be offered in each subject, if two are chosen.

Courses 1 and 3 give a general survey of national, state, and local government in the United States. Undergraduates beginning the study of political science are advised to take first, course 1, 3, or 16, and those planning for advanced work should take course 1 and either 3 or 16 in their sophomore year. Course 3 is offered the second semester.

Courses for Undergraduates

ZOOLOGY

(Including Anatomy.)

Note: Certain courses in this department require laboratory fees varying from $1 to $5.

Major: 20 hours from any courses offered in the department, excluding Zoology 1, and including Zoology 2, 3, 4, 5 (or 7), and 9. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects: bacteriology, botany, chemistry, entomology, geology, physics, physiology, psychology. At least 8 hours must be offered in each subject, if two are chosen.

Note: Credit for seniors who take Zoology 1 or 2 will be reduced one hour.

Zool. 31. Introduction to Parasitology.—*Prerequisite:* Zool. 1 and 2 and junior standing. (2). 3-5 TT; 330 N.H. Assistant Professor THOMAS.

Zool. 63. Comparative Vertebrate Embryology.—*Prerequisite:* One year of zoology and senior standing. (2 to 5).* Arrange. Professor SHUMWAY.

Courses for Graduates

Students entering on graduate study in the department of zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and undergraduates must be preceded by at least one full year's undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

Zool. 106. Topics in Vertebrate Embryology.—(1 unit). Arrange. Professor SHUMWAY.

Zool. 107. Parasitology.—(1 unit). 3 MW; 229 N.H. Professor WARD.

Zool. 111. Experimental and Field Ecology.—(½ to 2 units).* Arrange. Professor SHELFORD.

Zool. 115. Factors of Individual and Racial Development.—(1 unit). Twice a week. Arrange. Professor ZELENY.

Zool. 117. Advanced Field and Faunistic Zoology.—(1 unit). 8-12 TT; 420 N.H. Professor VAN CLEAVE.

Individual Research Courses

Zool. 121. Invertebrate Morphology and Parasitology.—(1 to 2 units).* Arrange. Professor WARD.

Zool. 122. Vertebrate Morphology.—(1 to 2 units).* Arrange. Assistant Professor ADAMS.

Zool. 123. Faunistic and Systematic Zoology.—(1 to 2 units).* Arrange. Professor VAN CLEAVE.

Zool. 124. Experimental Zoology and Genetics.—(1 to 2 units).* Arrange. Professor ZELENY.

Zool. 125. Animal Ecology and Behavior.—Time and credits to be arranged. Professor SHELFORD.

Zool. 126. Vertebrate Embryology.—(1 to 2 units).* Arrange. Professor SHUMWAY.

TIME TABLE FOR COURSES OF INSTRUCTION

SECOND SEMESTER, 1932-1933

EXPLANATION

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references.

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For instance, under Art 9b, Commercial Art, the prerequisites given are Art 2b and 5a. These two courses must be completed before Art 9b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit for undergraduate students is reckoned in *semester hours,* or simply *hours.* An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drafting room. The number of hours for which each course counts is shown in parentheses in the description of the course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in *units.* A *unit* course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study; four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of such courses. Courses of the intermediate groups "for graduates and advanced undergraduates" generally are evaluated as follows for graduate credit: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

Agr. Econ. 25. **Farm Organization.**—(Formerly F.O.M. 5.) *Prerequisite:* Agr. Econ. 20. Local field trips will be arranged; estimated cost, $5. (3). 8 MWF; 331 New Agr. Professor CASE, Assistant Professor JOHNSTON.

(See also Animal Husbandry 29, Systems of Live Stock Farming.)

Agr. Econ. 34. **Marketing Dairy Product.**—(Formerly Dairy Husbandry 26.) *Prerequisite:* Junior standing. (2). Arrange; D. Mfrs. Dr. C. A. BROWN. (Inspection trip requirement waived for 1932-1933)

Agr. Econ. 37. **Marketing Live Stock.**—(Formerly Animal Husbandry 32.) *Prerequisite:* Senior standing; An. Husb. 3. *Prerequisite or concurrent:* An. Husb. 6. (2). 9 TT; 316 New Agr. Associate Professor ASHBY. (Inspection trip requirement waived for 1932-1933)

Courses for Graduates

Agr. Econ. 109. **Seminar. Thesis Course.**—(Formerly Econ. 118c and F.O.M. 110.) All graduate students majoring in Agricultural Economics must register in Agr. Econ. 109, but only those students writing theses acceptable for the degree of Master of Science will be given credit. (1 to 2 units).* Once a week. Arrange. Members of the department.

Agr. Econ. 110. **Theory of Agricultural Economics.**—(Formerly Econ. 130.) (1 unit). Time to be arranged. Associate Professor STEWART.

Agr. Econ. 111. **Agricultural Prices and Statistics.**—(Formerly Econ. 131.) (1 unit). Time to be arranged. Assistant Professor NORTON.

Agr. Econ. 112. **Agricultural Economics Research.**—(Formerly Econ. 132.) Only those who write acceptable reports of successful investigation will receive credit. (1 to 2 units).* Time to be arranged. Associate Professor STEWART.

Agr. Econ. 120. **Farm Management Principles and Investigational Methods.**—(Formerly F.O.M. 101.) (1 unit). Twice a week. Time to be arranged. Professor CASE.

Agr. Econ. 135. **Marketing Fruits and Vegetables.**—(Formerly Hort. 105.) (1 to 2 units).* Time to be arranged. Professor LLOYD.

Courses for Advanced Undergraduates and Graduates

Agron. 10. Genesis, Morphology, Classification and Geography of Soils.—*Prerequisite:* Agron. 28, junior standing. (3). Lect., 1 MWF; 205 Agr. Professor R. S. SMITH.

Agron. 13. Soil Productivity, its Variation, Modification and Maintenance.—*Prerequisite:* Agron. 28, senior standing. (3). 9 MWF; 302 Agr. Professor BAUER.

Agron. 22. Plant Genetics and Breeding.—*Prerequisite:* Zool. 15, junior standing. (3). Lect., 10 MWF; 302 Agr. Professor WOODWORTH, Mr. BONNETT.

Agron. 31. Biological Methods of Soil Investigations.—Characteristics of the soil micro-flora; conditions affecting its activity; bacteriological and biochemical technique involved in the study of organisms in the soil and under laboratory conditions. (Given 1932-33 and alternate years thereafter.) *Prerequisite:* Agron. 11, senior standing. (3). 8-10 MWF (Lab., Demonstration, Disc.); 323 Agr. Associate Professor SEARS.

Courses for Graduates

Agron. 104. Seminar in Agronomy.—(¼ unit). Once a week. Heads of divisions.

Agron. 114. Crop Production.—(1 unit). Once a week. Arrange. Professor BURLISON, Associate Professor DUNGAN.

Agron. 118. Research.—(½ to 4 units).* Arrange.
Soils.—Professors BAUER, DETURK, R. S. SMITH.
Crops.—Professors BURLISON, WOODWORTH; Associate Professor DUNGAN.

Agron. 119. Experiment Station Problems.—(See Animal Husbandry 103.) Professor MUMFORD.

ANIMAL HUSBANDRY

Note: Certain courses in this department require laboratory fees varying from $1 to $5.

Courses for Undergraduates

An. Husb. 1. Introduction to Animal Husbandry.—Required of students not having had livestock judging in high school. (No credit in this course allowed to juniors and seniors.) (2). 3-5 TT; S.P. Mr. CRAWFORD, Mr. GARRIGUS.

An. Husb. 6. Livestock Management.—*Prerequisite:* An. Husb. 21. (5). 10 MTWTF; S.P. Professor EDMONDS.

An. Husb. 9b-t. Investigation with Thesis.—*Prerequisite:* Senior standing, including not less than 20 hours pertinent to thesis problem, and approval of the head of the department. This course is continuous through the year; credit is not given for either semester separately. (5). Arrange.
(b) **Beef Cattle.**—Professor RUSK, Associate Professor SNAPP.
(d) **Horses.**—Professor EDMONDS.
(f) **Sheep.**—Assistant Professor KAMMLADE.
(h) **Swine.**—Professor CARROLL.
(k) **Poultry.**—Professor CARD.
(m) **Animal Nutrition.**—Professor MITCHELL.
(p) **Animal Genetics.**—Associate Professor ROBERTS.
(r) **Animal Pathology.**—Professor GRAHAM.
(t) **Meats.**—Associate Professor BULL.

An. Husb. 12. Special Problems.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange. Members of the department.

An. Husb. 21. Principles of Feeding.—*Prerequisite:* Chem. 5; An. Husb. 1.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

An. Husb. 39. Poultry Production.—*Prerequisite:* An. Husb. 37. (3). Time to be arranged; 316 New Agr. Professor CARD.

An. Husb. 41. Animal Genetics.—*Prerequisite:* Zool. 15. (3). 2 MWF; Gen. Bldg. Associate Professor ROBERTS.

Courses for Graduates

An. Husb. 103. Experiment Station Problems.—Once a week. (½ unit). Time to be arranged. Professor MUMFORD.

An. Husb. 112 a-f. Research.—(½ to 2 units).* Arrange. One to three times a week.

(a) **Economic Factors in Meat Production.**—Professor RUSK.
(b) **Systems of Live Stock Farming.**—Professor CASE.
(d) **Animal Nutrition.**—Professor MITCHELL.
(e) **Animal Genetics.**—Associate Professor ROBERTS.
(f) **Poultry Husbandry.**—Professor CARD.
These courses may be taken during the summer by special permission.

An. Husb. 117. Animal Genetics.—Two to five times a week. (1 unit). Associate Professor ROBERTS.

An. Husb. 118. Animal Nutrition Seminar.—Two hours a week. (½ unit). Professor MITCHELL.

An. Husb. 119. Laboratory Methods in Animal Nutrition.—Two to five times a week. (½ to 1 unit).* Professor MITCHELL.

An. Husb. 120. Laboratory Methods in the Diagnosis of Animal Diseases.—Two to five times a week. (½ to 1 unit).* Professor GRAHAM.

An. Husb. 121. Laboratory Methods in Animal Genetics.—(½ to 1 unit).* Two to five times a week. Time to be arranged. Associate Professor ROBERTS.

ASTRONOMY

Course for Undergraduates

Astron. 2. Descriptive Astronomy.—Continuation of Astron. 1. The sun, stars, nebulae; the galactic system. *Prerequisite:* Astron. 1. (3). 11 MWF, 229 N.H.; one hour Wednesday evening, Observatory. Professor BAKER.

Courses for Graduates

Astron. 102. Seminar.—(1 unit). 1 MWF; Observatory. Professor BAKER.

Astron. 104. Celestial Mechanics.—(1 unit). 11 TTS; Observatory. Professor BAKER.

ATHLETIC COACHING

(See Physical Education for Men.)

BACTERIOLOGY

Note: Certain courses in this department require laboratory fees varying from $4 to $5.

Major: 20 hours chosen from the courses offered by this department. Dairy Husbandry 10 (advanced dairy bacteriology) may be offered in partial satisfaction of this requirement. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects: chemistry and botany. At least eight hours must be offered in each subject if two are chosen.

Courses for Undergraduates

Bact. 5a. Introductory Bacteriology and Sanitary Science.—*Prerequisite:* Sophomore standing or consent of the instructor.

Bot. 15. Diseases of Plants.—*Prerequisite:* Bot. 7. (3). Lab. 10-12 MWF; 304 N.H. Professor STEVENS.

Courses for Advanced Undergraduates and Graduates

Bot. 34. Physiology.—*Prerequisite:* One year of botany inclusive of Bot. 3, and junior standing. (3 or 5).* 1-3 MWF; 155 N.H. Professor HOTTES and assistant.

Bot. 41. Bryophytes.—*Prerequisite:* One year of botany inclusive of Bot. 2a, and junior standing. (3 or 5).* 8-10 TTS; 204 Entom. Dr. HAGUE.

Bot. 44. Spermatophytes.—*Prerequisite:* One year of botany inclusive of Bot. 2b, and junior standing. (3 or 5).* 10-12 TTS; 201 Entom. Professor BUCHHOLZ.

Bot. 77. Taxonomy of Pathogenic Fungi.—*Prerequisite:* One year of botany inclusive of Bot. 7, and junior standing. (3 or 5).* Lect. 9 Tu; lab. arrange; 304 N.H. Professor STEVENS.

Bot. 80. Ecology: Analysis of the Environmental Complex.—*Prerequisite:* One year of botany inclusive of Bot. 8, and junior standing. (3 or 5).* 10-12 MWF; 216 N.H. Field study on two or three Saturdays. Associate Professor VESTAL.

Bot. 90b. Thesis Course.—*Prerequisite:* 15 hours of botany and senior standing. (2). Time to be arranged.

Bot. 91b. Honors Course.—*Prerequisite:* 15 hours of botany and senior standing. (2). Time to be arranged.

Courses for Graduates

Bot. 110. Botanical Discussion.—No credit. Required of all graduate students in botany and members of the instructional staff. 4 Tu; 258 N.H.

Bot. 112. Discussions in Plant Morphology.—(¼ unit). 4 F; 205 Entom. Professor BUCHHOLZ.

Bot. 113. Discussions in Physiology.—(¼ unit). 4 Th; 155 N.H. Professor HOTTES.

Bot. 117. Discussions in Pathology and Mycology.—(¼ unit). 4 W; 304 N.H. Professor STEVENS.

Bot. 118. Discussions in Ecology.—(¼ unit). 4 M; 204 N.H. Associate Professor VESTAL.

Research Courses

Bot. 120. Morphology.—(½ to 2 units).* (Botany 112 to be taken concurrently.) 1 hour on either MWF from 1 to 3, the rest arrange; 201 Entom. Professor BUCHHOLZ.

Bot. 130. Physiology.—(½ to 2 units).* (Botany 113 to be taken concurrently.) 1 hour on either MWF from 1 to 3, the rest arrange; Botany Annex. Professor HOTTES.

Bot. 170. Pathology or Mycology.—(½ to 2 units).* (Botany 117 to be taken concurrently.) Arrange. 304 N.H. Professor STEVENS.

Bot. 180. Plant Ecology or Geography.—(½ to 2 units).* (Botany 118 to be taken concurrently.) Conference 1 Tu; the rest arrange. Associate Professor VESTAL.

CERAMIC ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $2 to $7.50.

Courses for Undergraduates

Cer.E. 4. Ceramic Materials.—*Prerequisite:* Cer. 1. (3). 1-4 MWF; 113 and 114 Cer.

Cer.E. 8. Glass Technology.—*Prerequisite:* Chem. 40 and Cer. 14. (2). Arrange.

Cer.E. 10. Cements.—*Prerequisite:* Chem. 40 and registration in Cer. 28. (2). 10 MW; 214 Cer.

Cer.E. 11. Drying Clay Products.—*Prerequisite:* Phys. 1a-1b, 3a-3b; Cer. 1. (3). 11 MWF; 218 Cer.

Cer.E. 14. Glasses and Glazes.—*Prerequisite:* Cer. 5 and registration in Chem. 40. (3). 11 TT; 218 Cer.; 8-11 TT; 113 and 114 Cer.

Cer.E. 20. Refractory Materials.—*Prerequisite:* Chem. 40. (2). 9 MW; 218 Cer.

Cer.E. 24. Ceramic Engineering Design.—*Prerequisite:* Cer. 23; T.A.M. 3. (3). 1-4 MWF; 212 Cer.

Cer.E. 28. Pyrochemical Problems.—*Prerequisite:* Cer. 14; Chem. 40. (2). 3 TT; 214 Cer.

Cer.E. 98. Thesis.—(3 to 5).* Arrange.

Courses for Graduates

Cer.E. 101. Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (¾ unit). Arrange.

Cer.E. 102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. Lectures; seminar; laboratory. (1 or 2 units).* Arrange.

Cer.E. 104. Technology of Glass.—Lectures and laboratory. (1 or 2 units).* Arrange.

Cer.E. 105. Methods of Ceramic Research.—Lectures. (1 unit). Arrange.

*In registering for a course with variable units or credits, as ½ to 2 units or credits, a student must put on his study-list, *not* the possible units or credits as shown here, but the number of units or credits for which *he* intends to take the course, i.e., ½, or 1, or 1½, or 2.

CHEMISTRY

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42, 43, 50a, and courses in the industrial, sanitary, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, 93a, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

Courses for Undergraduates

Chem. 7. General Chemistry.—Not open to students who have earned credit in high school chemistry. This course may be applied toward the science group requirements. After completing Chem. 7, a student is permitted to register in Chem. 2; or upon passing a proficiency examination in Chem. 2, he may register in Chem. 4, 5, or 6.

Courses for Graduates

Graduate students whose major subject is in some department other than chemistry must have had the equivalent of 15 university credits in chemistry, and the ground covered should include satisfactory work in general chemistry and in qualitative and quantitative analysis and elementary organic chemistry. Such students are advised to make selections from the following courses: Chemistry 40, 41, 42, 43, 27, 34a, 36b and 37b, 50a, 15a, and 97b. Courses of a more special nature will not as a rule

be accepted for graduate work unless preceded by one of the courses above. Graduate students who are candidates for an advanced degree in chemistry must have had the equivalent of 25 university credits in chemistry, properly distributed.

Graduate students whose major subject is in some department other than chemistry and who intend to take a first minor in chemistry or any branch of chemistry toward the Ph.D. degree must include among the courses taken Chemistry 40 and 41, or must have had the equivalent.

Graduate students who are candidates for the A.M. or M.S. degree in chemistry must include in the courses taken Chemistry 40 and 41, or must have had the equivalent. Graduate students who are candidates for the Ph.D. degree in any branch of chemistry must include among their courses Chemistry 40, 41, 42, and 43, or must have had the equivalent. Those courses (with the exception of Chemistry 12b) listed under the heading "Advanced Undergraduate and Graduate Courses" may be all counted toward advanced degrees in chemistry.

Chem. 101b. Inorganic Chemistry.—The less familiar elements and their relationship in the periodic system. (½ unit). (For laboratory work see Chem. 102b.) Twice a week. 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102b. Inorganic Chemistry.—Inorganic preparations and qualitative analysis of the less familiar elements. (Laboratory work to accompany or follow Chem. 101b.) Arrange. (¼ to ¾ unit).* Professor HOPKINS.

Chem. 105b. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Once, twice, or three times per week. Seminar, 11 S; 162 Chem. Special topic: The influence of atomic radii and atomic volumes on chemical properties (Dr. QUILL). 9 MW; 105 Chem.A. Professor HOPKINS.

Chem. 124b. Quantitative Analysis.—A modern survey of advanced principles, calculations, experimental methods and applications. Lectures with or without laboratory. Twice a week. (½ to 1¼ units).* 11 MF; 116 Chem. Associate Professor REEDY, Assistant Professor SMITH.

Chem. 125b. Analytical Chemistry.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) Once a week. (¼ to 1 unit).* 9 S; 217 Chem. Additional meetings arrange. Professor CLARK.

Chem. 127b. Modern Application of X-rays to Chemical and Industrial Problems.—(½ to 1 unit).* Twice a week. 10 TT; 217 Chem. Laboratory, arrange; 308 Chem. Professor CLARK.

Chem. 133b. Organic Chemistry.—(¾ unit). Twice a week. 11 TT; 217 Chem. Professor ADAMS.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange. 219 Chem. Professor MARVEL.

Chem. 135b. Organic Chemistry.—(Seminar). (¼ unit). Once a week. 10 W; 217 Chem. Professor ADAMS.

Chem. 145b. Physical Chemistry.—(Seminar). (¾ unit). Twice a week. 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 150b. Physiological Chemistry.—(¾ unit). Twice a week. 9 TT; 111 Chem. Professor ROSE.

Chem. 152b. Physiological Chemistry.—(½ to 1 unit).* Chiefly laboratory. Arrange. 463 Chem. Professor ROSE.

Chem. 155b. Physiological Chemistry.—(Seminar). Required of all students majoring in physiological chemistry. (¾ unit). Two hours a week. 9-11 F; 456 Chem. Professor ROSE.

Chem. 160b. Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

Chem. 161b. Chemical Plant Design.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Twice a week. 9 TT; 162 Chem. Associate Professor KRASE.

Chem. 186b. Sanitary Chemistry.—(½ to 1¼ units).* Arrange. One to five times a week. 60b Chem. Professor BUSWELL.

Chem. 190b. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS, Dr. COPLEY.

Inorganic Chemistry.—Professor HOPKINS, Associate Professor REEDY, Dr. BAILAR, Dr. AUDRIETH, Dr. QUILL, Dr. STILLWELL, Dr. COPLEY.

Analytical Chemistry.—Professor CLARK, Associate Professor REEDY, Assistant Professors ENGLIS, SMITH.

Food and Phyto-Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors NOYES, ADAMS, MARVEL, FUSON; Associate Professor SHRINER, Dr. BAILAR.

Sanitary Chemistry.—Professor BUSWELL.

Physiological Chemistry.—Professor ROSE.

Industrial Chemistry.—Professor KEYES, Associate Professor KRASE, Assistant Professor KISTLER.

Ceramic Chemistry.—Professor PARMELEE.

Zymochemistry.—Professor BUSWELL.

Courses for Graduates

Scand. 101. Old Norse.—(1 unit). Arrange; 209 L.H. Professor FLOM. (May be taken for a single semester).

Scand. 103. Old Swedish.—Introduction to the language. (1 unit). Arrange; 209 L.H. Professor FLOM.

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $5.

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite. It is prerequisite to all other courses in the department except 2, 31, and 32, and may be followed by any of the other courses for undergraduates

or by 6, 10, 20, or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Students majoring in entomology should take as many of the courses offered as possible, including some work in classification, morphology, and control, and should consult the head of the department. Seniors receive reduced credit in Entomology 1.

Courses for Undergraduates

Entom. 1. Destructive and Useful Insects.—Two discussion periods and four hours laboratory a week.

Credits	Section	Hours	Days	Room	Instructor
3[1]	A	10–12	MWF	309 Entom.	METCALF, BALDUF, and KEARNS
[1]Seniors will receive only 2 hours credit.	B	1–3	MWF	309 Entom.	METCALF, MILUM, and KEARNS

Entom. 2. Insects: Their Ways and Their Relations to Man.—A non-technical, cultural course. *Prerequisite:* 30 hours of university work. (Not open to students who have taken Entomology 1.)

2	A Lect.-Quiz	11	TT	310 Entom.	BALDUF and staff
	B Lect.-Quiz	2	TT	310 Entom.	

Entom. 3b. Classification of Insects: Orders with complete metamorphosis.—*Prerequisite:* Entomology 1 and 30 hours of university work. (5). Lab., 8-11 TT; Lect., to be arranged; 310 Entom. Assistant Professor BALDUF.

Entom. 7b. Insect Morphology.—*Prerequisite:* Entom. 1 and 30 hours of university work. (3). 8-11 TT; 312 Entom. Associate Professor HAYES.

Entom. 8b. Insect Pests of Field Crops.—*Prerequisite:* Entom. 1 and 30 hours of university work. (3 or 5).* 1-4 TT; 312 Entom. Associate Professor HAYES.

Entom. 32. Advanced Beekeeping.—*Prerequisite:* Entom. 31 or 30 hours of university work and consent of instructor. (2). 3-5 TT; 104 Viv. Assistant Professor MILUM.

Courses for Advanced Undergraduates and Graduates

Entom. 6. Special Problems.—*Prerequisite:* Any of the following: Entom. 3, 7, 8, 10, 20, 21, 22, or 31; senior standing. (2 to 5).* Saturday morning; additional hours to be arranged. Various instructors.

Entom. 21. Insect Bionomics.—*Prerequisite:* Entom. 1 and senior standing. (3). 11 MWF; 312 Entom. Professor METCALF.

Courses for Graduates

Note: The prerequisite for graduate work in entomology is two years of undergraduate biology, including zoology and entomology.

Entom. 102. Research in the Morphology and Embryology of Insects.—(½ to 2 units).* Time to be arranged. Associate Professor HAYES.

Entom. 107b. Insect Anatomy.—(½ unit). 8-11 TT; 312 Entom. Associate Professor HAYES.

Entom. 108. Research in Economic Entomology.—(½ to 2 units).* Time to be arranged. Professor METCALF.

Entom. 109. Research in Systematic Entomology.—(½ to 2 units).* Time to be arranged. Professor METCALF, Assistant Professor BALDUF.

Entom. 110. Research in the Biology and Ecology of Insects.—(½ to 2 units).* Time to be arranged. Professor METCALF.

Major: 20 hours, exclusive of Math. 1a, 1b, 2, 3, 4, 5, 6, 6a, 8a, and 8b (and all courses taken during the freshman year); inclusive of Math. 7 and 9, and two semesters of 70, 71, 72.

For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4; second semester, Math. 6. Sophomore year: first semester, Math. 7 (Section T); second semester, Math. 9 (Section T) and 19.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Credit for seniors who take Math. 2, 3, 4, 5, 6, or 6a will be reduced one hour.

Courses for Graduates

Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week; time to be arranged. Associate Professor Goff.

M.E. 108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week; time to be arranged. Professor Macintire.

M.E. 109. Machine Design.—Rational design; the application of mechanics of materials. Individual problems. (1 unit). Twice a week; time to be arranged. Professor Leutwiler.

M.E. 112. Laboratory Investigation.—Combustion of fuel, boiler economy; steam engines and turbines; gas engines and producers; explosive mixtures; mechanical refrigeration. Original work. (1½ units). Three times a week; time to be arranged. Professors Willard, Polson, Kratz, Ham, and Macintire.

MECHANICS

(See Theoretical and Applied Mechanics.)

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating the band to which they have been assigned, together with their rehearsal days and hours. Assignments are made according to proficiency. Service in the bands takes the place of the required military courses.

Mil. Bands 2. Freshman Band.—(1). Twice a week, by assignment. Director Harding, Assistant Director Dvorak, Mr. Overgard.

Mil. Bands 4. Sophomore Band.—(1). Twice a week, by assignment. Director Harding, Assistant Director Dvorak, Mr. Overgard.

Mil. Bands 6. Junior Band.—Twice a week, by assignment. Director Harding, Assistant Director Dvorak.

Mil. Bands 8. Senior Band.—Twice a week, by assignment. Director HARDING, Assistant Director DVORAK.

MILITARY SCIENCE

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R. O. T. C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

PHYSICAL EDUCATION FOR WOMEN

Freshmen and Sophomores:—Of the four required semesters in physical education, the department requires: one semester of gymnastics (P.E. 42); one semester of swimming (P.E. 45, 46, 54); one semester of dancing (P.E. 47, 49, 51); and one semester of an elective.

Juniors and Seniors may receive credit for four courses in addition to the above requirement.

Major: See Curriculum in Physical Education for Women, page 68 in *Directions for Registration.*

Courses for Undergraduates

P.E. 40b. **Gymnastics, Rhythms, and Track.**—For freshmen intending to specialize in physical education. (1). 3 MTWTF[1]; W. Gym. Miss KITZINGER, Miss JOHNSON.

P.E. 41b. **Gymnastics, Tap Dancing, and Baseball.**—For sophomores specializing in physical education. (1). 2 MTWTF[1]; W. Gym. Miss KITZINGER, Miss HUELSTER, Miss ROBERTSON.

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $4.50.

Major: 20 hours from courses offered in the department. At least 5 hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than 8 hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, or 6), or education.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering. For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.
Sophomore year: Physics 1a-1b, 3a-3b, and calculus.
Junior year: Physics 14, 16, 36, 44.
Senior year: Physics 23, 30, 45, 46, 71, 72, 78.

EXPLANATION

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references.

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For example, under Art 35a-35b, Commercial Art, the prerequisites given are Art 27b and 31b. These two courses must be completed before Art 35a-35b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit

Credit for undergraduate students is reckoned in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drafting room. The number of hours for which each course counts is shown in parentheses in the description of the course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in *units*. A *unit* course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study; four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of such courses. Courses of the intermediate groups "for graduates and advanced undergraduates" generally are evaluated for graduate credit as follows: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.
